An Environmental Study of Artisanal, Small, and Medium Mining in Bolivia, Chile, and Peru

"This book, a polished, winding meditation on the theory and fractiousness of motorcycles, celebrates both their eccentric history and the wary pleasures of touring."—The New Yorker In a book that is "a must for anyone who has loved a motorcycle" (Oliver Sacks), Melissa Pierson captures in vivid, writerly prose the mysterious attractions of motorcycling. She sifts through myth and hyperbole: misrepresentations about danger, about the type of people who ride and why they do so. The Perfect Vehicle is not a mere recitation of facts, nor is it a polemic or apologia. Its vivid historical accounts—the beginnings of the machine, the often hidden tradition of women who ride, the tale of the defiant ones who taunt death on the racetrack—are intertwined with Pierson's own story, which, in itself, shows that although you may think you know what kind of person rides a motorcycle, you probably don't.

Gary Elringer, an eccentric young computer genius, had sunk most of his company's funds into the construction of Smart House—much to the dismay of stockholders, most of whom were family and friends. But, when Gary invited them all to a game of Assassin in the newly built house, he never dreamed he'd wind up dead for real. And, when one of the stockholders ends up dead, it's clear that nothing less than murder is afoot in Smart House. Constance Leidl and Charlie Meiklejohn's investigations soon show that all of Gary's guests had reasons for wanting him dead—but everyone's alibi is as well constructed as the house itself. Which leads to the next obvious question: Could the house be the killer? Just how smart is Smart House?

Teaching about American Federal Democracy

Ten essays discuss federal democracy, the form of government of the United States. The first essay discusses the origins of American federalism. The second examines why we have a federal system, the functions federalism serves, and the consequences of federalism for the American political system. Federalism in the Constitution and constitutional law are treated in the third essay. The importance of cultural pluralism in American life and the role of American federalism in supporting pluralism are the foci of the fourth essay. The roles that the local community, the states, and political parties play in the federal system are examined in essays 5, 6, and 7, respectively. State, local, and professional roles in citizenship education are discussed in the eighth essay. The ninth essay explores how high school U.S. history and government textbooks approach federalism. The concluding essay describes resources on federalism that can be used in curriculum development at the secondary and college levels. Many of the essays are followed by topics for further study and suggested readings for teachers. (RM)

"Mining exploration investment in the Latin American and Caribbean region has increased 130 percent in the last five years, a figure which increases to 500 percent, if Chile is excluded." Governments have revamped mining legislation to enable private investment while becoming more sensitive to environmental factors. In light of this legislation, this report examines the environmental effects of artisanal, small, and medium mines in three Latin American Countries: Bolivia, Chile, and Peru. Four of the most important elements to be considered are: □ The age of the mine □ Management of tailings □ The heterogeneity of the artisanal and small mine sectors □ The increasing need to take cultural considerations into account in the decision making process. The paper contains results of the studies on the various mining sectors, strategy and policy recommendations, and country study summaries.
