Oh's Intensive Care Manual E-Book

Jane's All the World's Aircraft

Benn's Media Directory, 1990

This is the only authoritative textbook on metabolic measurement of animals, ranging in mass from fruit flies to whales. It integrates a rigorous theoretical background with detailed practical guidelines for making actual measurements in the field and laboratory.

World Heritage Angkor and Beyond

Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

Aeronautical Engineer's Data Book is an essential handy guide containing useful up to date information regularly needed by the student or practising engineer. Covering all aspects of aircraft, both fixed wing and rotary craft, this pocket book provides quick access to useful aeronautical engineering data and sources of information for further in-depth information. Quick reference to essential data Most up to date information available

John Haynes

The British National Bibliography

For nearly 40 years, Oh's Intensive Care Manual has been the quick reference of choice for ICU physicians at all levels of experience. The revised 8th edition maintains this tradition of excellence, providing fast access to practical information needed every day in today's intensive care unit. This bestselling manual covers all aspects of intensive care in sufficient detail for daily practice while keeping you up to date with the latest innovations in the field. Short, to-the-point chapters distill the essential information you need to

know for safe, effective care of patients in the ICU. Each topic includes theoretical knowledge, practical methods of treating the condition described, a review of the available evidence, and common pitfalls in treatment and management. Ideal for daily quick reference as well as an efficient review for professional examinations in critical care medicine.

The 9/11 Commission Report

This book provides a comprehensive account of the principles and operation of the electronic systems and navigation aids used in civil aviation today. The third edition features important new developments in several fields such as satellite navigation systems, including both Navstar and Glonass, satellite communications, Decca Navigator equipment, and digital audio and radar recording

Field Book for Describing and Sampling Soils

Honda VFR700-750F 86-97

The Bush Diaries

The complete story of the legendary Honda V4 motorcycles and the four-stroke engine design that gave them the name. Including full production histories, comprehensive specification details and over 250 colour illustration, the book covers design

and development of the first Honda V4, the oval piston NR500, and the VF road models from 1982-1988. Also covered: the iconic sport touring bikes, the VFR750, VFR800 and VFR1200F; the worldwide racing success for Honda Racing Corporation's RC30; the 1990 Pan European/ST1100, with its longitudinal V4 engine, and the 2002 ST1300; Honda V4s in MotoGP; details of the 2014 VFR800 and CTX1300 cruiser and finally, owners' experiences and insight from those who worked in the industry. Fully illustrated with 256 colour photographs and comprehensive specification details.

Handbook of Air Conditioning and Refrigeration

International Aerospace Abstracts

[A]fter seeing their Iraq strategy unravel, North Korea get ignored, and the state of Palestine remain a wishful dream-I would dare say that the Bush Administration's foreign policy also needs substantive tuning. In the ultimate, if U.S. foreign policy is made more consistent with our core values, and the Bush Administration uses traditional diplomacy to further policy goals, its Second Term might turn out to be a memorable "American Intifada"! The Bush Diaries captures the true meaning of "freedom and democracy" by allowing an average American citizen to be heard. Author Jack Nargundkar comments, in real time, on the performance of not only President Bush, but also the pundits in the media who evaluate

the presidency. The Wall Street Journal editorialized that the Bush economy had performed in a stellar fashion in 2002. The facts indicated something quite to the contrary-thus began Nargundkar's next couple of years of furious letter writing. Largely based on those letters as well as articles submitted to The Washington Post, The Wall Street Journal, and The New York Times, The Bush Diaries is a chronicle of Nargundkar's views of the George W. Bush era from 2001 to 2005.

Suzuki GSX600F, GSX750F & GSX750 '98-'02

Angkor, the temple and palace complex of the ancient Khmer capital in Cambodia is one of the world's most famous monuments. Hundreds of thousands of tourists from all over the globe visit Angkor Park, one of the finest UNESCO World Heritage Sites, every year. Since its UNESCO listing in 1992, the Angkor region has experienced an overwhelming mushrooming of hotels and restaurants; the infrastructure has been hardly able to cope with the rapid growth of mass tourism and its needs. This applies to the access and use of monument sites as well. The authors of this book critically describe and analyse the heritage nomination processes in Cambodia, especially in the case of Angkor and the temple of Preah Vihear on the Cambodian/Thai border. They examine the implications the UNESCO listings have had with regard to the management of Angkor Park and its inhabitants on the one hand, and to the Cambodian/Thai relationships on the other.

Furthermore, they address issues of development through tourism that UNESCO has recognised as a welcome side-effect of heritage listings. They raise the question whether development through tourism deepens already existing inequalities rather than contributing to the promotion of the poor.

Forthcoming Books

A world list of books in the English language.

Aeronautical Engineer's Data Book

* A broad range of disciplines--energy conservation and air quality issues, construction and design, and the manufacture of temperature-sensitive products and materials--is covered in this comprehensive handbook * Provide essential, up-to-date HVAC data, codes, standards, and guidelines, all conveniently located in one volume * A definitive reference source on the design, selection and operation of A/C and refrigeration systems

Aircraft & Aerospace

InfoWorld

Airman's Information Manual

Code of Federal Regulations

Provides the final report of the 9/11 Commission detailing their findings on the September 11 terrorist attacks.

Observations and Predictions of Eclipse Times by Early Astronomers

Manual on the Implementation of ICAO Language Proficiency Requirements

Eclipses have long been seen as important celestial phenomena, whether as omens affecting the future of kingdoms, or as useful astronomical events to help in deriving essential parameters for theories of the motion of the moon and sun. This is the first book to collect together all presently known records of timed eclipse observations and predictions from antiquity to the time of the invention of the telescope. In addition to cataloguing and assessing the accuracy of the various records, which come from regions as diverse as Ancient Mesopotamia, China, and Europe, the sources in which they are found are described in detail. Related questions such as what type of clocks were used to time the observations, how the eclipse predictions were made, and how these prediction schemes were derived from the available observations are also considered. The results of this investigation have important consequences for how we understand the relationship between observation

and theory in early science and the role of astronomy in early cultures, and will be of interest to historians of science, astronomers, and ancient and medieval historians.
