India is the second largest country in the world with regard to population, the world's largest democracy and by far the largest country in South Asia, and one of the most diverse and pluralistic nations in the world in terms of official languages, cultures, religions and social identities. Indians have for centuries exchanged ideas with other cultures globally and some traditions have been transformed in those transnational and transcultural encounters and become successful innovations with an extraordinary global popularity. India is an emerging global power in terms of economy, but in spite of India's impressive economic growth over the last decades, some of the most serious problems of Indian society such as poverty, repression of women, inequality both in terms of living conditions and of opportunities such as access to education, employment, and the economic resources of the state persist and do not seem to go away. This Handbook contains chapters by the field's foremost scholars dealing with fundamental issues in India's current cultural and social transformation and concentrates on India as it emerged after the economic reforms and the new economic policy of the 1980s and 1990s and as it develops in the twenty-first century. Following an introduction by the editor, the book is divided into five parts: Part I: Foundation Part II: India and the world Part III: Society, class, caste and gender Part IV: Religion and diversity Part V: Cultural change and innovations Exploring the cultural changes and innovations relating a number of contexts in contemporary India, this Handbook is essential reading for students and scholars interested in Indian and South Asian culture, politics and society.

Global Health Care

Interest in policy influences on health care is high, and will remain high as long as health care costs continue to rise and health care reform remains a hot topic in the news. There are inevitable and frequent points of interface between health care public policy and the health professions; in their daily work, clinicians see the problems with the health care system but often feel powerless and unsure how to advocate for system changes. Clinicians and Health Care Advocacy is written by clinicians for clinicians and focuses on how policy works and what individual professionals can do to affect policy. It looks at the facts and processes in an accessible way that employs case-based examples of clinician advocacy to illustrate its points. The book is nonpartisan and will stay neutral on preferences for one public policy solution versus another (single payer vs. market reform, for example). Instead, it encourages a model of clinicians as responsible for healing not only the individual patient but also the larger health care system in which they work.

The quality of feedback students receive from their teachers is one of the most important factors in improving learning. Elements of Grading: A Guide to Effective Practice, Second Edition addresses issues and controversies regarding the primary source of feedback for studentsgrades. Author Douglas Reeves argues that effective grading practices must be FAST: Fair Accurate Specific Timely In addressing these four essential criteria, Elements of Grading does not offer an ultimate answer or perfect system but shows how to begin a constructive, evidence-based conversation about improving grading practices. The second edition of Elements of Grading features a significant amount of new content, including how the Common Core State Standards (CCSS) and new technologies impact grading practices and systems. It promotes a new conversation about grading practices, as evidence is clearly not enough to change opinions and promote change

Complete Novels

With a Foreword by Nathaniel Philbrick, author of the bestseller In the Heart of the Sea If you need an appendectomy, he can do it with a stone scalpel he carved himself. If you have a condition nobody can diagnose—"creeping eruption" perhaps—he can identify what it is, and treat it. A baby with toe-tourniquet syndrome, a human leg that's washed ashore, a horse with Lyme disease, a narcoleptic falling face-first in the street, a hermit living underground—hardly anything is off-

limits for Dr. Timothy J. Lepore. This is the spirited, true story of a colorful, contrarian doctor on the world-famous island of Nantucket. Thirty miles out to sea, in a strikingly offbeat place known for wealthy summer people but also home to independent-minded, idiosyncratic year-rounders, Lepore holds the life of the island, often quite literally, in his hands. He's surgeon, medical examiner, football team doctor, tick expert, unofficial psychologist, accidental homicide detective, occasional veterinarian. When crisis strikes, he's deeply involved. He's treated Jimmy Buffett, Chris Matthews, and various Kennedy relatives, but he makes house calls for anyone and lets people pay him nothing—or anything: oatmeal raisin cookies, a weather-beaten .44 Magnum, a picture of a Nepalese shaman. Lepore can be controversial and contradictory, espousing conservative views while performing abortions and giving patients marijuana cookies. He has unusual hobbies: he's a gun fanatic, roadkill collector, and concocter of pastimes like knitting dog-hair sweaters. Ultimately, *Island Practice* is about a doctor utterly essential to a community at a time when medicine is increasingly money-driven and impersonal. Can he remain a maverick even as a healthcare chain subsumes his hospital? Every community has—or, some would say, needs—a Doctor Lepore, and his island's drive to retain individuality in a cookie-cutter world is echoed across the country.

Island Practice

This book has its origins in the 1982 Spring College held at the International Centre for Theoretical Physics, Miramare, Trieste. The primary aim is to give a broad coverage of liquids and amorphous solids, at a level suitable for graduate students and research workers in condensed-matter physics, physical chemistry, and materials science. The book is intended for experimental workers with interests in the basic theory. While the topics covered are many, it was planned to place special emphasis on both static structure and dynamics, including electronic transport. This emphasis is evident from

the rather complete coverage of the determination of static structure from both diffraction experiments and, for amorphous solids especially, from model building. The theory of the structure of liquids and liquid mixtures is then dealt with from the standpoint of, first, basic statistical mechanics and, subsequently, pair potentials constructed from the electron theory of simple metals and their alloys. The discussion of static structure is completed in two chapters with rather different emphases on liquid surfaces and interfaces. The first deals with the basic statistical mechanics of neutral and charged interfaces, while the second is concerned with solvation and double-layer effects. Dynamic structure is introduced by a comprehensive discussion of single-particle motion in liquids. This is followed by the structure and dynamics of charged fluids, where again much basic statistical mechanics is developed.

Anthropology and the New Cosmopolitanism inaugurates a new, situated, cosmopolitan anthropology. It examines the rise of postcolonial movements responsive to global rights movements, which espouse a politics of dignity, cultural difference, democracy, dissent and tolerance. The book starts from the premise that cosmopolitanism is not, and never has been, a 'western', elitist ideal exclusively. The book's major innovation is to show the way cosmopolitans beyond the North--in Papua New Guinea, Indonesia and Malaysia, India, Africa, the Middle East and Mexico--juggle universalist commitments with roots in local cultural milieus and particular communities. Anthropology and the New Cosmopolitanism breaks new ground in theorizing the role of social anthropology as a discipline that engages with the moral, economic, legal and political transformations and dislocations of a globalizing world. It introduces the reader to key debates surrounding cosmopolitanism in the social sciences, and is written clearly and accessibly for undergraduates in anthropology and related subjects.
