followed by relevant questions, their answers and brief discussions. Section B contains Data Interpretation, ECG, X-ray, coloured photograph of common diseases and few instruments, which are helpful for undergraduate students. An easy book to learn the approach to diagnosis and management of common short cases. Cases have been described in the way a student is expected to approach a medical situation in examinations as well as in day-to-day practice. Provides short notes on various common diseases, which will help the students to get a comprehensive knowledge without going through extensive textbooks. Have about 700 colored photographs and a few X-rays, CT scans, etc. to help students to develop a good clinical eye. Easy to understand, concise, yet full of necessary information.

This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored . The first part starts from the “old” growth theory and bridges to the “new” growth theory (including R&D and human

capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.

In 1888, Samuel F. Cody, a twenty-one-year-old horse wrangler, met Maud Lee, a sixteen-year-old aspiring circus performer, while touring with the Wild West show cast of Adam Forepaugh's Circus. A quick rapport developed between the girl from Norristown, Pennsylvania, and the cowboy who dazzled audiences with his good looks and fancy pistol shooting. *A Pair of Shootists* is the exuberant and sometimes heartbreaking story of the elusive S. F. Cody and his first wife, Maud Lee. Recounting their many dramatic exploits, this biography also overturns the frequently romanticized view of Wild West shows. Living the erratic lives of touring performers, S. F. Cody — who changed his name to capitalize on his resemblance to William F. "Buffalo Bill" Cody — and Maud Lee first appeared together in vaudeville halls and dime museums. Setbacks in the United States made Cody and Lee eager to try their luck abroad, so they traveled to Great Britain, where they played music halls and acted in burlesques on roller-skates and in extravagant arena exhibitions. When the two performers eventually parted ways, author Jerry Kuntz masterfully splits their stories into two. From there, he

follows their individual ups and downs, including Cody's soaring career in pioneer aeronautics and Lee's decline into mental illness and addiction. In an ironic twist, Maud's professional life ended amidst a vast misunderstanding that brought her into conflict with the woman she had been emulating her entire career: Annie Oakley. While other biographies focus mainly on Cody's contribution to aviation, Kuntz uses sources previously unavailable to scholars to paint a more complete picture of Cody's early years and to recover the forgotten — and ultimately tragic — story of Maud Lee.

Rantoul and the former Chanute Air Force Base are inseparably intertwined as primary players in a single historical narrative. Rantoul was first founded as an agriculturally based community in 1848 near an area known as Mink Grove. The settlement boomed with the coming of the Illinois Central Railroad in 1854; a railroad championed by the town's namesake, Robert Rantoul Jr. Disaster followed in 1899 and again in 1901 with devastating fires. Then, in 1917, a U.S. Army flying field was built on the outskirts of Rantoul. Named after the aviation pioneer Octave Chanute, Chanute Field, later Chanute Air Force Base, became a premier technical training facility. A mutually beneficial relationship quickly developed between these civilian and military establishments that would last for over 75 years. Chanute Air Force Base closed in 1993, ushering in yet another new era for the village of Rantoul.

This book is a social—ecological system description and feedback analysis of the Lake Tana Basin, the headwater catchment of the Upper Blue Nile River. This basin is an important local, national, and international resource, and concern about its sustainable development is growing at many levels. boundaries into the Nile River; the lake and surrounding land have recently been proposed as a UNESCO Biosphere Reserve; the basin has been designated as a key national economic growth corridor in the Ethiopian Growth and Transformation Plan. In spite of the Lake Tana Basin's importance, there is no comprehensive, integrated, system-wide description of its characteristics and dynamics that can serve as a basis for its sustainable development. This book presents both the social and ecological characteristics of the region and an integrated, system-wide perspective of the feedback links that shape social and ecological change in the basin. Finally, it summarizes key research needs for sustainable development.

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from

newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

“An important, disturbing, and gripping history” (Kirkus Reviews, starred review), the never-before-told story of the computer scientists and the NSA, Pentagon, and White House policymakers who invent and employ cyber wars—where every country can be a major power player and every hacker a mass destroyer. In June 1983, President Reagan watched the movie *War Games*, in which a teenager unwittingly hacks the Pentagon, and asked his top general if the scenario was plausible. The general said it was. This set in motion the first presidential directive on computer security. From the 1991 Gulf War to conflicts in Haiti, Serbia, Syria, the former Soviet republics, Iraq, and Iran, where cyber warfare played a significant role, *Dark Territory* chronicles a little-known past that shines an unsettling light on our future. Fred Kaplan probes the inner corridors of the National Security Agency, the beyond-top-secret cyber units in the Pentagon, the “information warfare” squads of the military services, and the national security debates in the White House to reveal the details of the officers, policymakers, scientists, and spies who devised this new form of warfare and who have been planning—and (more often than people know) fighting—these wars for decades. “An eye-opening history of our government’s efforts to effectively manage our national security in the face of the largely open global communications network established by the World Wide Web....*Dark Territory* is

The State of Africa series project was conceived by the Africa Institute of South Africa (AISA) during its 2003--04 financial year for purposes of mapping out on a regular basis critical issue areas relating to intra- and inter-African as well as extra-African relations. The first and second volumes of the series were

published in 2004 and 2008 respectively. Volume 1: The State of Africa: Thematic and Factual Review served as an exploratory piece and covered a broad range of issues relating to politics and governance, millennium development goals (MDGs), peace and conflict and regional development. Volume 2: The State of Africa: Post-Conflict Reconstruction and Development focused thematically and examined--from critical and comprehensive perspectives--issues associated with post-conflict in Africa. The volume was grounded on the continent's quest for conflict prevention, management and resolution as a means of creating an enabling environment for the consolidation of democracy and reconstruction of societies affected by crisis in general and war in particular. This volume, Volume 3: Parameters and Legacies of Governance and Issue Areas takes a multi-pronged and multi-faceted approach to some of these issues by providing in-depth analysis of dynamics at national, regional, continental and international levels. The global transformation in the 1980s and 1990s, which witnessed the crumbling of the Soviet Union, the Warsaw Pact and opened a window of opportunities for East--West bipolar rapprochement, particularly between the United States and Russia, also had impact on Africa at the national, regional and continental levels. Focusing on conceptual units, such as the state, indigenous organisations, regional and continental organisations as well as selected priority issues--in particular gender and empowerment, the global South, and space science--the chapters in the book provide useful insights into the nature and impact of the transformation and its impact on the
