Lazy days . . . steamy nights . . . and sweltering guys with rippling muscles doing what they do best . . . Luscious by Lori Foster Bethany Churchill just quit her lousy job, dumped her lousy boyfriend and moved into a new apartment. She's not looking for love, but her hot new landlord is determined to change her mind. SWAT officer Lucius Ryder--known to the women in the building as "Luscious," much to his chagrin--is one sexy lawman, and before long Bethany is tempted to find out if he's really as delicious as his nickname. . . It's About Time by Erin McCarthy County

prosecutor Trish Jones has had it with smooth-talking, under-performing suits. And though she's never had a thing for big, brawny guys, one look at Caleb Vancouver's bulges makes her think she might have been missing out. One Harley ride later they're back at her place, and she realizes that she has been missing out . . . on quite a lot . . . Wish You Were Here by Amy Garvey Photographer Mackenzie Pruitt knows exactly what she wants her future to look like, and this summer that means renovating a dilapidated shed into a studio. But when hunky carpenter Leo Dawson shows up, she'd much rather have his capable hands on her than on a hammer. He's not the kind of guy she always thought she'd fall for, but when he touches her, she can't imagine wanting anyone else . . .

"Mining exploration investment in the Latin American and Caribbean region has increased 130 percent in the last five years, a figure which increases to 500 percent, if Chile is excluded." Governments have revamped mining legislation to enable private investment while becoming more sensitive to environmental factors. In light of this legislation, this report examines the environmental effects of artisanal, small, and medium mines in three Latin American Countries: Bolivia, Chile, and Peru. Four of the most important elements to be considered are: □ The age of the mine □ Management of tailings □ The heterogeneity of the artisanal and small mine sectors □ The increasing need to take cultural considerations into account in the decision making process. The paper contains results of the studies on the various mining sectors, strategy and policy recommendations, and country study summaries.

A Touch of Truth

This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored. The first part starts from the "old" growth theory and bridges to the "new" growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.

With the continued application of gaming for training and education, which has seen exponential growth over the past two decades, this book offers an insightful introduction to the current developments and applications of game technologies within educational settings, with cutting-edge academic research and industry insights, providing a greater understanding into current and future developments and advances within this field. Following on from the success of the first volume in 2011, researchers from around the world presents up-to-date research on a broad range of new and emerging topics such as serious games and emotion, games for music education and games for medical training, to gamification, bespoke serious games, and adaptation of commercial off-the shelf games for education and narrative design, giving readers a thorough understanding of the advances and current issues facing developers and designers regarding games for training and education. This second volume of Serious Games and Edutainment Applications offers further insights for researchers, designers and educators who are interested in using serious games for training and educational purposes, and gives game developers with detailed information on current topics and developments within this growing area.

Bicycle Repair Manual

As a leading Confederate general, Braxton Bragg (1817–1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much

more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army--including Bragg's superiors, his fellow generals, and his subordinates--reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

The thoraco-abdominal aortic pathology is not uncommon and represents the ultimate challenge for vascular surgeons. The book deals with the newest endovascular and hybrid approaches, together with more traditional surgical strategies. Written by internationally renowned experts in vascular and cardiac surgery, anesthesiology and radiology, the volume provides a very practical approach to the main problems encountered from diagnosis to postoperative care: general principles of aortic diseases, imaging techniques, surgical and anesthesiologic strategies and techniques and other specific problems are some of the topic dealt with. Numerous pictures illustrate the most important diagnostic findings and depict key techniques and strategies. Vascular and cardiac surgeons, anesthesiologists, perfusionists and radiologists will find in this volume useful and updated information for the treatment of this very challenging condition.

The Build

In *The Race of Sound* Nina Sun Eidsheim traces the ways in which sonic attributes that might seem natural, such as the voice and its qualities, are socially produced. Eidsheim illustrates how listeners measure race through sound and locate racial subjectivities in vocal timbre—the color or tone of a voice. Eidsheim examines singers Marian Anderson, Billie Holiday, and Jimmy Scott as well as the vocal synthesis technology Vocaloid to show how listeners carry a series of assumptions about the nature of the voice and to whom it belongs. Outlining how the voice is linked to ideas of racial essentialism and authenticity, Eidsheim untangles the

relationship between race, gender, vocal technique, and timbre while addressing an undertheorized space of racial and ethnic performance. In so doing, she advances our knowledge of the cultural-historical formation of the timbral politics of difference and the ways that comprehending voice remains central to understanding human experience, all the while advocating for a form of listening that would allow us to hear singers in a self-reflexive, denaturalized way.

The urge has found you daydreaming more than once. The urge to define, bend, shape, fabricate, invent, shove, break. To slide your leg over the seat you finally got back from the leather shop. To twist back the throttle grip you wrapped yourself. To lunge into the darkness of an open highway on a creation all your own. More than a motorcycle, this is about your identity. It's about building something as unique as you are. In *The Build*, Robert Hoekman Jr compiles insights from today's best builders to help you plot out your own beautiful beast. Loaded with photos, *The Build* features firsthand advice from the masters of moto design, including John Ryland (Classified Moto), Alan Stulberg (Revival Cycles), Jared Johnson (Holiday Customs), Jarrod DelPrado (DP Customs), and the legendary Max Hazan (Hazan Motorworks). You've seen what can be done. It's time to do it yourself. Get *The Build*.

The "canopy" in the title refers to the tree-lined streets of Rice's Regina neighbourhood but through his piercing specificity we learn more about "place", in the first decade of a new century. Rice's poems speak eloquently of our connection to the natural world, including the forests and landscapes we have created within our cities. With a voice that speaks unflinchingly of its sources *Life in the Canopy* is an exploration of the history and bones of a modest city in the center of the continent. With a profound authority and honesty Rice examines how we live with each other and how the place we live in shapes our lives. What is a city? Is it more than its public realm; the trees, parks and lake, railways and neighbourhoods? Is it more than the slow unrolling of human experience and event? Here are insightful, moving poems that take on difficult ethical and aesthetic questions.
