Mastering the Ride

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of "Sexual Healing"—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town Again* of the music industry.

The ultimate reference for Triumph lovers and fans of British motorcycles, *The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today* collects all of the motorcycles from this iconic brand in a single illustrated volume. In this

revised and updated edition, you'll find the all-new Bonneville lineup introduced for the 2016 model year as well as other Triumphs through 2019. Written by respected Triumph expert Ian Falloon, this luxurious reference covers all of the major and minor models, with an emphasis on the most exemplary, era-defining motorcycles such as the Thunderbird, Tiger, Trophy, Bonneville, and new machines such as the Speed Triple, Thruxton, and Daytona 675. Detailed technical specifications are offered alongside compelling photography, much of it sourced from Triumph's archives. The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today also features important non-production models and factory racing and speed-record-setting motorcycles that have become integral parts of Triumph's stellar reputation. Triumph Bonneville: 60 Years is a celebration one of motorcycling's most iconic and beloved bikes. First manufactured in Great Britain in 1959, Triumph's legendary model resonates deeply with motorcycle enthusiasts worldwide who love its style, sound, performance, and undeniable coolness. It's no surprise that Triumph was Steve McQueen's favorite ride. The Bonneville's story is one of successes and challenges as Triumph grew steadily in the post-World War II decades to become America's most successful "import" motorcycle marque. Triumph won every championship worth winning, owned the world speed record for fifteen years, and wooed Hollywood's hottest stars. Bonneville was Triumph's halo machine, one of the highest performance motorcycles of the 1960s. However, as competing marques eventually eclipsed the Bonneville in the 1970s, Triumph management struggled, leading first to bankruptcy and then to the demise of the company in 1983. Triumph was resurrected by British industrialist John Bloor in the late 1990s to become a twenty-first century global success story, which includes a revived and thoroughly retro-contemporary Bonneville range.

WALNECK'S CLASSIC CYCLE TRADER, JUNE 2009

Best-selling author David Hough is the anti-bad ass of motorcyclists, a serious down-to-earth master of two- (and three-) wheeled street rods who is interested in the safety and road smarts of his fellow motorcyclists. Mastering the Ride is his follow-up book to one that put him on the map, Proficient Motorcycling, and it goes one better. For motorcyclists ready to take their rides to the next level, Mastering the Ride is an exhilarating course in skills, safety, and common sense. Hough's writing style is straightforward and conversational, never professorial, preachy, or boring. With instructional color photographs and drawings, the book covers improving the rider's skills of speed and passing on superslabs, mountain roads, and city streets; anticipating and handling street and road hazards, from treacherous tar snakes to lane-weaving drivers; and learning the limits of sight distances, executing quick stops at sudden hazards as well as curves. The book devotes two full chapters to the skills involved in mastering cornering, with specific advice about rolling on and off the throttle, shifting, braking, countersteering, body steering and positioning, and cornering lines. In the chapter "Mastering the Art of Conspicuity," Hough recommends riders understand and employ conspicuity, that is understanding how motorcyclists and car drivers see their surroundings and getting others to see you on the road by use of hi-viz clothing, LED lights, and other gear. The key to safety rests in increased situational awareness—the topic of the next chapter—the ability to predict how road events will unfold by thinking

through the possibilities way before a potential hazard presents itself. Thanks to Hough's direct and specific instructions to riders for what they need to know, to improve, to avoid, and to do every time they get on their bikes, this chapter and the skills it describes are nothing short of life-saving. In short, *Mastering the Ride* is a crash course in how not to crash—that is, after all is read and done, what every motorcyclists must avoid for his own life and the lives of others on the road. As Eric Trow, a motorcycle safety journalist and instructor states on the back cover, "Mastering the Ride should be required reading for every road-going motorcyclist and become the companion of any rider serious about advancing his or her road craft." Voni Graves, the record-setting million-mile BMW rider, is a long-time Hough fan who relied on Hough's "wisdom" back in the 1970s when the author was a columnist. "The latest from David brings together his years of experience and his unique analysis to make the case for mastery in a conversational way that makes [Mastering the Ride] impossible to put down. The breadth and depth of the information...is astounding." A section on the aging rider, including ways to compensate for older riders' slower reaction times and readapting their skills, is included in the appendix, as is a travelogue of Hough's road trips to some of his favorite locations. A glossary, resources section, and index complete the book.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even

provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
