"The Celtic Twilight" is a series of stories from Irish folklore by Irish poet W. B. Yeats. Beautifully and poetically written, they present a vivid portrait of those who lived near to the land in Ireland. Highly recommended for poetry lovers and those with an interest in Ireland. William Butler Yeats (13 June 1865 - 28 January 1939) was an Irish poet and one of the most prolific literary figures of the 20th-century. At the forefront of both the British and Irish literary movements, he co-founded the Abbey Theatre and was, along with Lady Gregory, Edward Martyn and others, a driving force behind the Irish Literary Revival. In his later life, Yeats also served as a Senator in Ireland. Many vintage books such as this are becoming

increasingly scarce and expensive. We are republishing this volume now in an affordable, modern, high-quality edition complete with a specially commissioned new biography of the author.

The East India Company (EIC), also known as the Honourable East India Company (HEIC) or the British East India Company and informally as John Company, was an English and later British joint-stock company, which was formed to pursue trade with the East Indies but ended up trading mainly with the Indian subcontinent and Qing China. Originally chartered as the "Governor and Company of Merchants of London trading into the East Indies", the company rose to account for half of the world's trade, particularly in basic commodities including cotton, silk, indigo dye, salt, saltpetre, tea and opium. The company also ruled the beginnings of the British Empire in India.

Experiments which in previous years were made with ornamental plants have already afforded evidence that the hybrids, as a rule, are not exactly intermediate between the parental species. With some of the more striking characters, those, for instance, which relate to the form and size of the leaves, the pubescence of the several parts, etc., the intermediate, indeed, is nearly always to be seen; in other cases, however, one of the two parental characters is so preponderant that it is difficult, or quite impossible, to detect the other in the hybrid. from 4. The Forms of the Hybrid One of the most influential and important scientific works ever written, the 1865 paper Experiments in Plant Hybridisation was all but ignored in its day, and its author, Austrian priest and scientist GREGOR JOHANN MENDEL (1822-1884), died before seeing the dramatic long-term impact of his work, which was rediscovered at the turn of the 20th century and is now considered foundational to modern genetics. A simple, eloquent description of his 1856-1863 study of the inheritance of traits in pea plants Mendel analyzed 29,000 of them this is essential reading for biology students and readers of science history. Cosimo presents this compact edition from the 1909 translation by British geneticist WILLIAM BATESON (1861-1926).

"The Slaves" is nothing but Frederick Douglass's groundbreaking autobiography and his first book "Narrative of the Life of Frederick Douglass, An American Slave, written by Himself". We have renamed the title here as "The Slaves" to keep the title short as well as to establish that Frederick Douglass is no longer a name of a particular slave born in nineteenth-century America, but a name that represents slaves of the entire world and of all time. Even though, we do not wish anyone to be born into slavery anymore like Frederick was, we have taken him as a symbol of all the slaves as a wish that all who are still in slavery may have the spirit of Frederick Douglass and fight their ways to the freedom and work to free other slaves to make the slavery history. The life of Frederick, is in one way or another, is the lives of all other slaves. Hence, we have named this version of his book "The Slaves".

World Geography provides a coherent and organized geography of the world as we now know it - where we are. It studies how people are distributed over the earth, how they make their living from it, and how they transform it. Various geographical regions of the world have been discussed in eighteen chapters with individual nations within each of these regions. Written in a logical, cogent and convincing style, the principles of brevity and clarity have been followed all through the book. Combining informative text with a wealth of latest data, maps and illustrations, this attempt offers a comprehensive coverage of almost all the countries of the world in a single volume. It is hoped that this compact, yet wide-ranging, account will be of immense help to the students and teachers alike.

The first IUPAC Manual of Symbols and Terminology for Physicochemical Quantities and Units (the Green Book) of which this is the direct successor, was published in 1969, with the object of 'securing clarity and precision, and wider agreement in the use of symbols, by chemists in different countries, among physicists, chemists and engineers, and by editors of scientific journals'. Subsequent revisions have taken account of many developments in the field, culminating in the major extension and revision represented by the 1988 edition under the simplified title Quantities, Units and Symbols in Physical Chemistry. This 2007, Third Edition, is a further revision of the material which reflects the experience of the contributors with the previous editions. The book has been systematically brought up to date and new sections have been added. It strives to improve the exchange of scientific information among the readers in different disciplines and across different nations. In a rapidly expanding volume of scientific literature where each discipline has a tendency to retreat into its own jargon this book attempts to provide a readable compilation of widely used terms and symbols from many sources together with brief understandable definitions. This is the definitive guide for scientists and organizations working across a multitude of disciplines requiring internationally approved nomenclature.
