Intended for students and busy pastors, this book addresses the needs of readers struggling with any textual portion of Hebrew Old Testament scripture for a quick and handy reference. The word entries (the actual Hebrew Old Testament vocabulary) are directly taken from the Hebrew text of the Leningrad Codex and linked to the English word definitions and other essential information based on Strong's renowned Hebrew-English lexicon. To be used in conjunction with the Hebrew Old Testament (Tanakh) edition (ISBN 978-3-95935-372-4) and the Word Concordance of the Hebrew Old Testament (ISBN 978-3-95935-362-5) by the same editor.

Much has been said and written about Japan's manufacturing prowess. Most of the comment comes

from people who are merely visitors to the country and can be best classified as 'observers looking in from the outside'. Other views come from the Japanese themselves in which the double barrier of culture and language filters out much information that would be of real value to Western industrialists. Neither of these limitations apply to John Hartley, who has been resident in Japan for the past five years. He understands the culture, can speak the language and has extensive contacts at the highest level. Therefore, he is in a unique position to report on the Japanese scene and its activities in advanced manufacturing technology. This he has been doing on a regular basis to IFS magazines: The Industrial Robot, Assembly Automation, Sensor Review and The FMS Magazine. Most of the material in this book is from John Hartley's 'pen' and represents his most significant contributions on flexible automation in Japan to these journals over the last three years. It is augmented with a few other articles written by leading authorities on new technology in Japanese manufacturing industry.
