How to Build Horsepower, Volume 2

In the late 1950s, a young John Morton was transfixed with sports car racing. His dreams of competition eventually led him to enroll, in 1962, in the Shelby School of High Performance Driving. In a bold moment after the last class, Morton asked Carroll Shelby if he might come to work for the newly formed Shelby American. The answer was “Yes, here's a broom.” Thus ended Morton's college career and began his long racing career. Over the next three years, Morton would be a firsthand witness to the evolution of one of the most iconic sports car builders and racing teams of the 1960s. Inside Shelby American is his personal account of a company overflowing with talent, from designer Pete Brock to fabricator extraordinaire Phil Remington to drivers like Dan Gurney, Ken Miles, Bob Bondurant, and Phil Hill. The cars were equally captivating: AC Cobra, Mustang GT350, Ford GT, Daytona Coupe. In this book, Morton's story is intertwined with the memories of other Shelby staffers of the period, revealing through historic photography and an untold perspective the rousing story of America's most legendary racer and car builder.

The Wages of Affluence

Noted magazine writing veteran Scotty Gosson takes an informative and lighthearted look at the lowly station wagon. Long lauded as a family mover unworthy of respect, the vintage style and quirky functionality of old wagons is now finding favor with enthusiasts and baby boomers alike. Their unique shapes and smile-inducing purpose separates wagons from more typical vintage rides, and in modified or customized form, wagons take on an entirely different personality.

Simply put, this new ebook can make your marriage better and greatly improve your relationships with family members, co-workers, your boss and even your friends. The 100/0 Principle The Secret of Great Relationships, may be the most important book you'll ever read. The message is truly life-changing.

Honey, Honey, Miss Thang

Walt McCall follows up his successful Classic American Ambulances 1900-1979 Photo Archive with a new and expanded title that fills in a heretofore missing chapter in American emergency vehicle history. This book chronicles in words and photos the evolution of the emergency ambulance in America over the past 100 years. From the slow jouncing horse-drawn vehicles in use at the turn of the last century to the fleet electronics-laden advanced life support units on the streets and highways of today - you'll find it all here. A fascinating story that is long overdue. The book is divided into chapters illustrating ambulances by decade. Each chapter begins with 2-4 pages of text describing major innovations and improvements introduced during the decade.

Ford Cortina

Packed with more than a hundred completely charismatic classic cars, this book is the ideal gift for anyone driven to admire these majestic machines. Author Quentin Wilson has hand-picked the most astonishing, appealing, and all-round awesome cars ever to hit the highway. Multi-angle photography reveals the true craftsmanship and beauty of these stunning rides, and the text pays tribute to each vehicle and explains why it's destined to be a classic, now and forever. Test drive this essential car guide, and you'll be hooked.

Andrew Gordon goes to the core of the Japanese enterprise system, the workplace, and reveals a complex history of contest

and confrontation. The Japanese model produced a dynamic economy which owed as much to coercion as to happy consensus. Managerial hegemony was achieved only after a bitter struggle that undermined the democratic potential of postwar society. The book draws on examples across Japanese industry, but focuses in depth on iron and steel. This industry was at the center of the country's economic recovery and high-speed growth, a primary site of corporate managerial strategy and important labor union initiatives. Beginning with the Occupation reforms and their influence on the workplace, Gordon traces worker activism and protest in the 1950s and '60s, and how they gave way to management victory in the 1960s and '70s. He shows how working people had to compromise institutions of self-determination in pursuit of economic affluence. He illuminates the Japanese system with frequent references to other capitalist nations whose workplaces assumed very different shape, and looks to Japan's future, rebutting hasty predictions that Japanese industrial relations are about to be dramatically transformed in the American free-market image. Gordon argues that it is more likely that Japan will only modestly adjust the status quo that emerged through the turbulent postwar decades he chronicles here.

With vivid photography, and insightful commentary, this travel pictorial shines a light on the Buddhist art and architecture of Borobudur. The glorious ninth-century Buddhist stupa of Borobudur—the largest Buddhist monument in the world—stands in the midst of the lush Kedu Plain of Central Java in Indonesia, where it is visited annually by over a million people. Borobudur contains more than a thousand exquisitely carved relief panels extending along its many terraces for a total distance of more than a kilometer. These are arranged so as to take the visitor on a spiritual journey to enlightenment, and one ascends the monument past scenes depicting the world of desire, the life story of Buddha, and the heroic deeds of other enlightened beings—finally arriving at the great circular terraces at the top of the structure that symbolize the formless world of pure knowledge and perfection.

Inside Shelby American

Information is essential to all human activity, and information in electronic form both amplifies and augments human information interactions. This lecture surveys some of the different classical meanings of information, focuses on the ways that electronic technologies are affecting how we think about these senses of information, and introduces an emerging sense of information that has implications for how we work, play, and interact with others. The evolutions of computers and electronic networks and people's uses and adaptations of these tools manifesting a dynamic space called cyberspace. Our traces of activity in cyberspace give rise to a new sense of information as instantaneous identity states that I term proflection of self. Proflections of self influence how others act toward us. Four classical senses of information are described as context for this new form of information. The four senses selected for inclusion here are the following: thought and memory, communication process, artifact, and energy. Human mental activity and state (thought and memory) have neurological, cognitive, and affective facets. The act of informing (communication process) is considered from the perspective of human intentionality and technical developments that have dramatically amplified human communication capabilities. Information artifacts comprise a common sense of information that gives rise to a variety of information industries. Energy is the most general sense of information and is considered from the point of view of physical, mental, and social state change. This sense includes information theory as a measurable reduction in uncertainty. This lecture emphasizes how electronic representations have blurred media boundaries and added computational behaviors that yield new forms of information interaction, which, in turn, are stored, aggregated, and mined to create profiles that represent our cyber identities. Super Boss--king of Diesel Truck Drag Racing

Borobudur: Majestic Mysterious Magnificent

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the

music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of "Sexual Healing"—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town Again* of the music industry.

Nissan Micra (K11 Series) Service and Repair Manual

Dreamed up by drivers trying to outdo each other on the mountain passes of Japan, the art of the sideways descent of a switchback-what Wired described as "the fishtailing ballet of burning rubber called drifting"-has made it to the United States in a big way. What began as a new kind of daredevil driving among teens has, over two decades, become a sanctioned sport, making its way across the Pacific through video games and magazines, anime and the Internet, to take root in California's fertile underground racing culture. Drifting tells the story of drifting from its arrival on the West Coast to its emergence as the hottest form of motorsport in the United States. A dramatic visual record of the sport in America that includes over 400 photos, the book also profiles the people, teams, techniques, web sites, publications, videos, and trends that have made drifting the phenomenon that it is today. For the curious newcomer, author Antonio Alvendia's introduction succinctly explains what drifting is, setting the stage for the thrilling automotive drama that then unfolds. For the veteran drifting fan, this book is the first illustrated book on the latest motorsport to conquer the world.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
