Introduction to Electrical Power Systems

The origin of the solar system has been a matter of speculation for many centuries, and since the time of Newton it has been possible to apply scientific principles to the problem. A succession of theories, starting with that of Pierre Laplace in 1796, has gained general acceptance, only to fall from favor due to its contradiction in some basic scientific principle or new heavenly observation. Modern observations by spacecraft of the solar system, the stars, and extra-solar planetary systems continuously provide new information that may be helpful in finding a plausible theory as well as present new constraints for any such theory to satisfy. The Origin and Evolution of the Solar System begins by describing historical (pre-1950) theories and illustrating why they became unacceptable. The main part of the book critically examines five extant theories, including the current paradigm, the solar nebula theory, to determine how well they fit with accepted scientific principles and observations. This analysis shows that the solar nebula theory satisfies the principles and observational constraints no better than its predecessors. The capture theory put forward by the author fares better and also indicates an initial scenario leading to a causal series of events that explain all the major features of the solar system.

The science of fluid mechanics is developing at a rapid rate. It has developed higher levels of understanding that have led to sophisticated designs and applications of fluid systems. Still there are many areas in which only rudimentary information and physical models are available. It provides introduction to fluids, trends in fluid mechanics and covers subjects like fluid properties, fluid motion, surface resistance and many other topics.

Cowan and Steel's Manual for the Identification of Medical Bacteria

Lippincott Manual of Nursing Practice

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of "Sexual Healing"—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town Again* of the music industry.

Howling at the Moon

Henry St George Caulfeild (1851–1943) wrote this autobiography towards the end of his life and called it percipiently, 'A Speck in the Cosmos'. Reading 'A Speck in the Cosmos' reveals a fascinating insight into Henry Caulfeild's life in colonial Ceylon (as Sri Lanka was known), when coffee was grown and where he worked as a plantation manager. When coffee failed there, Henry then moved to Queensland during Australia's era of imported labour from the South Sea Islands for the rapidly developing sugar plantations around Bundaberg, a topic which subsequently became controversial. Written in the somewhat constrained language of the time, this autobiography nevertheless remains a primary historical resource of a lifestyle of that era and puts a first-hand and very personal touch to British and Australian enterprises of the time. Although the autobiography was never formally published at the time, a portion of 'A Speck in the Cosmos' was serialised in a pre-World War II Australian magazine called 'The Steering Wheel and Society & Home'. Sisters Colleen Watts and Louise Brodie, Henry's great grandchildren, have carefully compiled this book, using the previously published pages and a selection of family and historical photographs. Also included is a section of the family tree to give context to the autobiography and the family members mentioned. Caulfeild's Boer War Compendium (an extraordinary amount of material relating to the Boer War and referred to in this autobiography) is housed by the State Library of Queensland, Australia in the John Oxley Library in Brisbane.
