This book presents and analyzes various features of the morphosyntax of Borgomanerese, a Gallo-Italic dialect spoken in the town of Borgomanero, in the Piedmont region of Northern Italy. The study is highly comparative, drawing on the literature on numerous other Italian dialects and Romance languages (as well as English), to inform our understanding of the Borgomanerese phenomena. Christina Tortora takes the many unusual and understudied (and often novel) facts of Borgomanerese grammar as compelling grounds for revisiting and reformulating current analyses of syntactic phenomena in these other languages. The phenomena treated include the syntax and semantics of the weak locative in presentational sentences; the syntax of object clitics and argument prepositions;

the syntax of subjects and subject clitics; the syntax of interrogatives; clausal architecture; and the relationship between orthography and theoretical analysis. The principal value of this book lies both in the rich description of the morphosyntactic phenomena of Borgomanerese, many of which have not been previously reported in the literature, and in the consequent novel analyses developed, which contribute insights for other languages and dialects, and advance our understanding of syntax and syntactic theory in general.

## **A Comparative Grammar of the South African Bantu Language**

Like Carl Darling Buck's Comparative Grammar of Greek and Latin (1933), this book is an explanation of the similarities and differences between Greek and Latin morphology and lexicon through an account of their prehistory. It also aims to discuss the principal features of Indo-European linguistics. Greek and Latin are studied as a pair for cultural reasons only; as languages, they have little in common apart from their Indo-European heritage. Thus the only way to treat the historical bases for their development is to begin with Proto-Indo-European. The only way to make a reconstructed language like Proto-Indo-European intelligible and intellectually defensible is to present at least some of the basis for reconstructing its features and, in the process, to discuss reasoning and methodology of reconstruction (including a weighing of alternative reconstructions). The result is a compendious handbook of Indo-European

## Read Book A Comparative Grammar Of The Sanscrit Zend Greek Latin Lithuanian Gothic German And Sclavoni

phonology and morphology, and a vade mecum of Indo-European linguistics--the focus always remaining on Greek and Latin. The non-classical sources for historical discussion are mainly Vedic Sanskrit, Hittite, and Germanic, with occasional but crucial contributions from Old Irish, Avestan, Baltic, and Slavic.

## **A Comparative Grammar of the Dravidian Or South-Indian Family of Languages**

### **Semitic Languages**

Fulk's Comparative Grammar offers an overview of and bibliographical guide to the study of the phonology and the inflectional morphology of the earliest Germanic languages, with particular attention to Gothic, Old Norse / Icelandic, Old English, Old Frisian, Old Saxon, and Old High German, along with some attention to the more sparsely attested languages. The sounds and inflections of the oldest Germanic languages are compared, with a view to reconstructing the forms they took in Proto-Germanic and comparing those reconstructed forms with what is known of the Indo-European protolanguage. Students will find the book an informative introduction and a bibliographically instructive point of departure for intensive research in the numerous issues that remain profoundly contested in

early Germanic language history.

### **A Comparative Grammar of the Modern Aryan Languages of India**

The first comparative grammar of the Semitic languages, by H. Zimmern, was published a hundred years ago and the last original work of this kind was issued in Russian in 1972 by B.M. Grande. The present grammar, designed to come out in the centenary of the completion of Zimmern's work, fills thus a gap. Besides, it is based on both classical and modern Semitic languages, it takes new material of these last decades into account, and situates the Semitic languages in the wider context of Afro-Asiatic. The introduction briefly presents the languages in question. The main parts of the work are devoted to phonology, morphology, and syntax, with elaborate charts and diagrams. Then follows a discussion of fundamental questions related to lexicographical analysis. The study is supplemented by a glossary of linguistic terms used in Semitics, by a selective bibliography, by a general index, and by an index of words and forms. The book is the result of twenty-five years of research and teaching in comparative Semitic grammar.

### **A Comparative Grammar of the Hittite Language**

Together with Part 1 of the same grammar (Sources, Script and Phonology, Lexicon and Nominals), this two-volume set represents the most detailed and exhaustive description ever done of any language, including Japanese of the Old Japanese language of the Yamato region during the Asuka Nara period.

### **A Comparative Grammar of the Korean Language and the Dravidian Languages of India**

Due to their crucial role one of the major tasks in modern South Asia linguistics is the research of the historical view of the Dravidian Languages. A knowledge of the Dravidian language structure in all its development stages, from their earliest beginnings to today, is necessary for understanding numerous fundamental aspects with the emergence of the indoarian, Munda and other languages of south Asia and of course for the history of the Dravidian language family itself. The Comparative Grammar forms an important part of the historical linguistics. Yet

Richard Caldwell's Comparative Grammar of Dravidian or South Indian Family of Languages (London, 1856, 2/1875, 3/1913) is outdated. An up to date comparative grammar of the Dravidian languages therefore was long overdue. With the work of the renowned Russian Dravidian scientist Mikhail S. Andronov, in which the over 80 known, investigated and described languages and dialects of the Dravidian language family are taken in consideration, this gap has been closed.

### **A Comparative Grammar of the Sanskrit, Zend, Greek, Latin, Lithuanian, Gothic, German, and Slavonic Languages**

Bopp's Vergleichende Grammatik, begun in 1833, was a founding text of comparative philology and Indo-European linguistics. This translation (1845-50) of the first edition of Bopp's work gave English-speaking scholars access to his important findings. This volume covers phonology, nominal inflection, adjectives and numerals.

## Read Book A Comparative Grammar Of The Sanscrit Zend Greek Latin Lithuanian Gothic German And Sclavoni

language guides of Spanish, Portuguese, Italian and French are published year by year. However, all of them teach these languages separately. Here you will find a comparative grammar of the four major Romance languages together based on their grammatical and lexical similarities for you, lovers of foreign languages, to learn and compare Spanish, Portuguese, Italian and French simultaneously. It is an audacious endeavor to find or create a novel way of learning to speak several languages and becoming a multilingual person. It took me over 3 years to finish the book. It consists of over 800 pages, 10 chapters covering all the grammatical aspects of these 4 languages. It includes over 1000 examples, 500 easy-to-follow charts and tables. It contains 138 geographical, historical and cultural facts about Spanish, Portuguese, Italian and French countries. Below I will discuss several reasons why I decided to write this book and why you need it. 1) First of all, this book is written for readers like you who are fond of or would like to learn Spanish, Portuguese, Italian and French simultaneously or just to get an all-round knowledge of all these four Romance languages. It is designed not only for beginners who do not have an extensive knowledge of grammar, yet need a guide through the grammatical concepts of all mentioned above languages, but also intermediate and advanced students who would like to have a reference book of several Romance languages at once. 2) Second of all I spent many years learning these languages separately, which was a complete waste of time before I realized it. This book will hopefully save you a great deal of time and allow you to study and compare at a glance the four main Neo-Latin languages. 3) Knowledge of foreign

## Read Book A Comparative Grammar Of The Sanscrit Zend Greek Latin Lithuanian Gothic German And Sclavoni

languages is fast becoming a necessary requirement for those who are involved in international business, tourism, culture and education. This book offers you four languages to learn, which will make you feel at homewherever you go, whether as a tourist or businessman.4) Learning several languages simultaneously or one by one will train and strengthen your memory and can help stave off such terrible diseases as Alzheimer's.5) If you have never studied several languages at once before and you like challenges, then you should definitely try it. Because it is a really entertaining and challenging task to do.In conclusion, I would like to sincerely thank you for preordering the book and your interest in it. I hope it will help youimprove your languages and become multilingual.
