Psychedelics for spiritual, therapeutic, and problem-solving use • Presents practices for safe and successful psychedelic voyages, including the benefits of having a guide and how to be a guide • Reviews the value of psychedelics for healing and self-discovery as well as how LSD has facilitated scientific and technical problem-solving • Reveals how microdosing (ultr-low doses) improve cognitive functioning, emotional balance, and physical stamina • This year 600,000 people in the U.S. alone will try LSD for the first time, joining the 23 million who have already experimented with this substance Called “America’s wisest and most respected authority on psychedelics and their use,” James Fadiman has been involved with psychedelic research since the 1960s. In this guide to the immediate and long-term effects of psychedelic use for spiritual (high dose), therapeutic (moderate dose), and problem-solving (low dose and microdose) purposes, Fadiman outlines best practices for safe, sacred entheogenic voyages learned through his more than 40 years of experience--from the benefits of having a sensitive guide during a session (and how to be one) to the importance of the setting and pre-session intention. Fadiman reviews the newest as well as the neglected research into the psychotherapeutic value of visionary drug use for increased personal awareness and a host of serious medical conditions, including his recent study of the reasons for and results of psychedelic use among hundreds

of students and professionals. He reveals new uses for LSD and other psychedelics, including microdosing, extremely low doses, for improved cognitive functioning and emotional balance. Cautioning that psychedelics are not for everyone, he dispels the myths and misperceptions about psychedelics circulating in textbooks and clinics as well as on the internet. Exploring the life-changing experiences of Ram Dass, Timothy Leary, Aldous Huxley, and Huston Smith as well as Francis Crick and Steve Jobs, Fadiman shows how psychedelics, used wisely, can lead not only to healing but also to scientific breakthroughs and spiritual epiphanies.

The man Newsweek once called “the guru of baseball” offers profiles of top managers, sidebars, statistics, and snapshots of each decade. Widely considered to be one of the greatest minds in the history of the game, Bill James has changed the way we think about the sport of baseball. In this chronicle of field generals, strategists, and occasional cannon fodder, James writes with piercing insight about

the men who hold what may be the most important spot in the dugout. For nearly forty years, James has led the vanguard of how we measure the game. From sabermetrics to his Baseball Abstracts, James has influenced even the casual fan all the way up to the top brass. Somewhere in the middle of that spectrum, however, is the manager, and Bill James has penned a guide on some of the most innovative and renowned men to ever hold that position. Some of the game's greatest managers have been Hall of Fame players who put down a bat and picked up a lineup card: Frank Robinson, Mel Ott, Joe Cronin, Tris Speaker, and Rogers Hornsby. Others have achieved greatness from their ability to assemble legendary teams: Billy Martin, Tommy Lasorda, Connie Mack, Joseph McCarthy, Dick Williams, and Leo Durocher. Here, Bill James explores the history of the manager, and its evolution from 1870–1990, in a decade-by-decade chronicle, examining the successes, the failures, and what baseball fans can learn from both. The Bill James Guide to Baseball Managers is a thought-provoking, entertaining, and seminal guide to a vital part of the national pastime, written by one of its most groundbreaking iconoclasts. “A delightful collection that will satisfy baseball fans of all ages.” —Library Journal

Introduction By Lee Streiff "In 1937 James Streiff and Bob Parks created 'the Epic of the Martian Empire'; in 1942 Paul Carter added his vision of the Cosmic Vortex to it, and the Universe was never the same again" Lee Streiff Once we lived in the world of the Martian Empire, but that now seems like a long time ago - it all began in those last remaining years before World War II changed our consciousnesses forever. It was an ephemeral, still time; a quiet space in which we could dream about the future without the burden of its consequences: ghastly war - genocide - the atomic bomb. It was in 1937 and my brother James was 13, and in the eighth grade at Robinson Junior High School in Wichita, Kansas. And in James's mind he was fashioning a cosmic empire filled with strange and wonderful creatures and races - in which a stalwart group of Exiles from the planet Mars were the chief actors and heroes. This Empire, the Martian Empire, eventually spread over most of the known Universe before it finally faded away in 1948'. During the eleven years it flourished however, the Martian Epic became very elaborate - covering some 15 billion years of Martian history - and Martian technology, manners and morals, art, music, religion, language and literature. And it generated a narrative Epic that encompassed many galaxies. Although a number of people became involved in this epic - Bob Parks, John Roth, Robert Frickel, Charles Goodrum, and Robert Arnold, among others - it was first and foremost the vision of James, who worked out and brought together the maps, timelines, the celestial spaces, the customs, and the characters that made up the Martian Empire in all its diverse

grandeur. In early 1937 I was only four years old - and so it was that most of my childhood and youth were somehow surrounded or suffused with the images and tales of the Epic. However it was not until I reached the age of eleven that I became the brief inheritor of, and participant in the affairs of the Epic itself. It was during World War II in 1943. that I first took over the job of running the business of the Martian Empire while all of its members were away from Wichita, in the Army, Navy, and Air Force. Knowing that he would soon be drafted, James began grooming me for the task early in that year. He reported for active Military duty on June 3, 1943, and that changed the course of my daily life. I was now on my own, with a heavy responsibility, I published The Martian News Letter, the official journal of the group, using carbon paper - and a bit later a hectograph; published, The Order of Shultz, which circulated the business of the inner circle; reorganized The Files; answered correspondence among the far flung Martians scattered around the globe; and did research for a number of topics for James, using my contacts in the world of Science Fiction Fandom. When James returned from active service in February of 1946, my task had been completed, and in any case, my interests were largely turning in other directions. By 1947, in my sophomore year at East High School, I was even leaving Science Fiction itself behind and was now involved in art and literature. But then that is another story. In the Following seven Chapters, Lee Streiff describes in his "Guide to the Epic of the Martian Empire" of how the tales and creation of the Epic all came about.

Finalist for Foreword Magazine's 2011 Book of the Year With his knack for making science intelligible for the layman, and his ability to illuminate scientific concepts through analogy and reference to personal experience, James Zull offers the reader an engrossing and coherent introduction to what neuroscience can tell us about cognitive development through experience, and its implications for education. Stating that educational change is underway and that the time is ripe to recognize

that “the primary objective of education is to understand human learning” and that “all other objectives depend on achieving this understanding”, James Zull challenges the reader to focus on this purpose, first for her or himself, and then for those for whose learning they are responsible. The book is addressed to all learners and educators – to the reader as self-educator embarked on the journey of lifelong learning, to the reader as parent, and to readers who are educators in schools or university settings, as well as mentors and trainers in the workplace. In this work, James Zull presents cognitive development as a journey taken by the brain, from an organ of organized cells, blood vessels, and chemicals at birth, through its shaping by experience and environment into potentially to the most powerful and exquisite force in the universe, the human mind. Zull begins his journey with sensory-motor learning, and how that leads to discovery, and discovery to emotion. He then describes how deeper learning develops, how symbolic systems such as language and numbers emerge as tools for thought, how memory builds a knowledge base, and how memory is then used to create ideas and solve problems. Along the way he prompts us to think of new ways to shape educational experiences from early in life through adulthood, informed by the insight that metacognition lies at the root of all learning. At a time when we can expect to change jobs and careers frequently during our lifetime, when technology is changing society at break-neck speed, and we have instant access to almost infinite information and opinion, he argues that self-knowledge, awareness of how and why we think as we do, and the ability to adapt and learn, are critical to our

Interpreting an ancient book like the Bible can be an intimidating task. Hopefully, this book will demystify or make less complicated the task of Biblical interpretation for the layperson (or seminarian) by the use of a handy and memorable acronym 'SCAR'--where S means sitting with the text to listen to the Biblical author's words over and over again; where C means the literary and cultural-historical contexts; where A means analysis; and finally, where R means God's Redemptive Remedy. Readers are treated to some accessible theory behind Biblical interpretation in Part 1 and examples in Part 2, where SCAR is applied directly to two Old Testament and two New Testament texts. God has revealed himself on the pages of Scripture. He has revealed himself because he wants to be jealously and desperately known; so, my prayer for you is that this small book along with the True Biblical Interpreter, the Holy Spirit, will greatly and patiently escort you in this endeavor so that you fall more in love with our beautiful and gracious God who knows and loves you intimately. And may your growing and maturing love for him manifest itself in your unwavering obedience to him.
