This book focuses on participatory capacity-building in ways that address the practical needs and strategic interests of the disadvantaged and disempowered - it examines how differences in class, ethnicity, race, caste, religion, age and gender lead to the 'politics of exclusion'. It offers innovative, accessible tools to enable facilitators from both inside and outside communities to empower those who are frequently omitted from decision-making processes. The style and approach are interactive, stimulating reflection and involvement by all parties. Power, Process and Participation aims to enable facilitators from inside and outside communities to involve and empower those commonly excluded in decision making processes. It provides a balanced overview of how

'participation' has been used in this context and raises the questions that all those involved in this type of activity should ask themselves. There are three distinct sections: Part 1: Definitions, history and issues - which provides an overview of some of the broad issues underlying the themes addressed in this book. A useful brief history is given of well known participatory methodologies and key questions are asked on the use and misuse of 'participation': whose ends does it serve, who is involved and what are the power relations, appropriate time frames and scale and how should it proceed in order to best serve the interests of the people involved? Part 2: Methods and ethics in our research and our use of the mediaN251pp - Whose expertise counts? How is it acknowledged? These are explored in the context of contributors' experience of undertaking research with women in Zimbabwe. Questions of ownership and consent as well as other issues are discussed further in the context of the use of video in participatory communication. Part 3: Tools for environmental and social change - The longest section in the book gives 35 tools and how to use them in facilitating participation. An introductory session explains how to use the section. Tools are cross referenced and for each the purpose, materials, process and estimated time is provided. For a number of the tools, examples of how they have been used in practice are included. Power, Process and Participation describes itself as a manual and although it does not immediately look like one, it is readable, logically arranged and combines instructions on how tools can be used with examples of how they have been used in practice. There are notes on how to use the book and how to choose from

the tools offered. This book would be useful to anyone looking for both an overview of participation and how it can be used and misused; and guidance on facilitating the process.

A Masked Mob Mystery

Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

Bunny is funny, but that doesn't mean she's totally clueless when it comes to more serious matters. With her quick wit and lighthearted personality, Bunny Larrabee can make people laugh about almost anything. She collects knock-knock jokes, riddles, and all kinds of comedy routines to try out on her best friend, Emily. The only thing Bunny doesn't find humor in is her unusual name—she's heard jokes

about it her whole life, and none of them are funny. So when an impossibly gorgeous guy starts talking to her at a concert, Bunny opens her mouth and says two fateful words: "I'm Emily." It's just one tiny lie, but it will drive a wedge between the two best friends. And with what looks like more serious misfortune on the horizon, Bunny will need Emily's friendship and advice more than ever.

We revisit Lipset's law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

Unorthodox Strategies For The Everyday Warrior

How is it possible to feel more at home with your friends than with your own family? Sometimes Calvin Miller really hates that he and his mother, Nina, don't have a home of their own. Instead, they live in Garo's house—well, more precisely, Alan's house. A pilot who is always away, Alan is also Nina's boss. As his live-in housekeeper, Nina raises Alan's son, Garo, right alongside Cal. Luckily, the boys are good friends despite their differences. Though Cal is better at school, Garo is better with people—his outgoing personality makes everyone like him. But sometimes

Cal thinks even his mother is closer to Garo than she is to her own son. Cal figures he must take after his dad, but how can he be sure when the only contact he's had with his father is in the form of three postcards over a course of nine years? As Cal navigates his teenage years, he may be in store for more changes than he realizes.

This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored . The first part starts from the “old” growth theory and bridges to the “new” growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.

Deputy coroner Mattie Winston knows everyone in the charmingly small town of Sorenson, Wisconsin--except the latest body discovered in a desolate field. If a woman this attractive had moved into town, the news would have surely hit the gossip mill in record time. So who was the murdered femme fatale? Whose knife was left planted in her chest? The mystery deepens when detective Steven Hurley takes one look at the body and turns as white as the newly fallen snow. . .and excuses himself from the case. It'll take all of Mattie's forensic skills to unravel the increasingly bizarre clues and find the killer. . .before she herself becomes just another cold case in a frigid Midwest winter! "Academic study of the tantric traditions has blossomed in recent decades, in no small measure thanks to the magisterial contributions of Alexis G.J.S. Sanderson, until 2015 Spalding Professor of Eastern Religions and Ethics at Oxford University. This collection of essays honours him and touches several fields of Indology that he has helped to shape (or, in the case of the Śaiva religions, revolutionised): the history, ritual, and philosophies of tantric Buddhism, Śaivism and Vaiṣṇavism; religious art and architecture; and Sanskrit belles lettres. Grateful former students, joined by other experts influenced by his scholarship, here offer papers that make significant contributions to our understanding of the cultural, religious, political, and intellectual histories of premodern South and Southeast Asia. Once again keeping a keen ear to the needs of the evolving calculus community, Stewart created this text at the suggestion and with the collaboration of professors in the mathematics department at Texas A&M University. With an early introduction to vectors and vector functions, the approach is ideal for engineering students who use vectors early in their

curriculum. Stewart begins by introducing vectors in Chapter 1, along with their basic operations, such as addition, scalar multiplication, and dot product. The definition of vector functions and parametric curves is given at the end of Chapter 1 using a two-dimensional trajectory of a projectile as motivation. Limits, derivatives, and integrals of vector functions are interwoven throughout the subsequent chapters. As with the other texts in his Calculus series, in *Early Vectors* Stewart makes us of heuristic examples to reveal calculus to students. His examples stand out because they are not just models for problem solving or a means of demonstrating techniques - they also encourage students to develop an analytic view of the subject. This heuristic or discovery approach in the examples give students an intuitive feeling for analysis.

Vampires have been a fixture of film since Bela Lugosi brought Bram Stoker's Dracula to life on the big screen in 1931. Over the decades the genre has been far from static, as vampire narratives changed and evolved with the appetites of their viewing public. First depicted as formally dressed villains, vampires would later be portrayed as supernatural beings with some human characteristics, and still later as sympathetic figures. Focusing on 19 representative films and television productions, this critical study tracks the evolutionary changes of the screen vampire. It explores the factors that cause a genre to change and examines the alternating cycles of

audience expectation. The author identifies three distinct modes of depiction: the Malignant Cycle (1931–1948), comprised primarily of the Universal films; the Erotic Cycle (1957–1985), which encompasses Hammer films and popular television shows such as *Dark Shadows*; and the Sympathetic Cycle (1987–present) including recent offerings such as *The Lost Boys*, *Interview with the Vampire* and *Buffy the Vampire Slayer*. Each film is evaluated in seven key areas including the act of the vampire biting the victim; process of the victim’s infection; physical appearance and demeanor of the vampire and the vampire expert; and the eventual destruction of the vampire. Appendices include a complete filmography of the films examined. Instructors considering this book for use in a course may request an examination copy [here](#).

'The only sauce is olive oil - green as sun-struck jade - splashed in small lustrous puddles, through which one skates the flesh, the fat, the bones, the potatoes, the bread. In the last, best drops, one skates a finger.'

Luscious and evocative, *The Umbrian Supper Club* recounts the stories of a small group of Umbrian women who - sometimes with their men and, as often, without them - gather in an old stone house in the hills above Orvieto to cook, to sit down to a beautiful supper, to drink their beloved local wines. And to talk. During the gathering, the preparation, the cooking and the eating, they recount the memories and experiences of their gastronomic lives and, as much, of their more personal histories. For a period of four years, it was Marlena de Blasi's task, her pleasure, to cook for the Supper Club - to choose the elements for supper, to plan the menu and, with the help of one or another of the women in the club, to prepare the meal. What she learnt, what they cooked and ate and drank and how they talked is the fundamental stuff of this book. Including a dozen recipes, drawn from the Supper Club, *The Umbrian Supper Club* is a delight to read and to taste.

No villain is safe in 1903 Egypt as feisty archaeologist Amelia Peabody embarks on her ninth adventure. According to an ancient Egyptian papyrus, dreaming of a large cat means good luck. And that's just what Amelia Peabody could use, as her growing family matures in the new century. What's more, Amelia's dashing husband Emerson has received a mysterious warning not to enter the Valley of the Kings. To Emerson's annoyance, Amelia's meddling distracts her attention as she exposes a fraudulent spiritualist, saves a marriage, and plays matchmaker. But diabolical forces are at work when an unknown tomb reveals a shocking murder -- and the Peabody family dodges bullets from an assassin determined to put an end to their discoveries.

This book has been developed from its earlier and far less formal presentment as the proceedings of a symposium entitled The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design that was held at the Solstrand Fjord Hotel in Bergen,

Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry, pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided herein will be of value not only to basic scientists involved in elucidating the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of potential therapeutic agents arising from the efforts of the biochemists and medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methylations (Section B), the regulation of AdoMet, S-adenosylhomocysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section D), and the design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).

Meet Providence Traveler. Providence likes to make things. Not just ordinary things like macaroni pictures, but things that have never been made before. So it is not surprising that her hero is Leonardo da Vinci, the great sixteenth-century artist and inventor. One day at the library, when Providence is taking out her favorite book, Leonardo da Vinci: Boy Was He Busy, she finds a scrap of paper covered with interesting designs for what looks like a mechanical mouse with a key coming out of its back. Diligently she follows the instructions on the paper and builds the intricate mouse. Just as she is putting on the finishing touches, in barge her brother and the meddlesome McMuzzin twins, who turn the key in the mouse's back. Suddenly there is a sound like thunder and a flash of light and the four find themselves transported to Florence, Italy, during the time when Leonardo was alive. Will Providence get to meet her hero? Gifted artist and storyteller Robert Sabuda introduces young readers to an extraordinary new character -- Providence Traveler -- whose curiosity and excitement will match their own. Providence leads readers on an exciting adventure, full of fun and fascinating information.

One for the keeper shelf! Rediscover the heart-stopping thrills of this classic romantic suspense, only from New York Times bestselling author Heather Graham. It was the most dangerous role of her career...and possibly the last. Playing a malicious diva on a popular daytime soap, actress Kelly Trent has garnered more than her fair share of hate mail. She doesn't believe anyone would really confuse her with her character, but when an accident on the set hits too close for the producers' comfort, Kelly is unceremoniously put on hiatus. At her agent's suggestion, she agrees to appear in a music video, thinking the time away filming in the Florida Keys might be just the thing to put her life in perspective. But with two left feet, Kelly only hopes dance instructor Doug O'Casey can work miracles. A former Miami cop, Doug still has a lawman's instinct for trouble, and the continued threats made against Kelly tell him that she is in danger. Now, as a deranged fan closes in, Doug realizes that someone close to Kelly wants more than her character killed off the show—someone wants her stone-cold dead. Originally published in 2005

IBM® invented the virtualization technology starting in the 1960s on the mainframe, and the functionalities evolved and were ported to other platforms and improved the reliability, availability, and serviceability (RAS) features. With virtualization, you achieve better asset utilization, reduced operating costs, and faster responsiveness to

changing business demands. Every technology vendor in the SAP ecosystem understands virtualization as slightly different capabilities on different levels (storage and server hardware, processor, memory, I/O resources or the application, and so on). It is important to understand exactly what functionality is offered and how it supports the client's business requirements. In this IBM Redbooks® publication we focus on server virtualization technologies in the IBM Power Systems™ hardware, AIX®, IBM i, and Linux space and what they mean specifically for SAP applications running on this platform. SAP clients can leverage the technology that the IBM Power Systems platform offers. In this book, we describe the technologies and functions, what they mean, and how they apply to the SAP system landscape.
