Sociocultural and Historical Contexts of African American English

This work examines the experiences of African Americans under the law and how African American culture has fostered a rich tradition of legal criticism. Moving between novels, music, and visual culture, the essays present race as a significant factor within legal discourse. Essays examine rights and sovereignty, violence and the law, and cultural ownership through the lens of African American culture. The volume argues that law must understand the effects of particular decisions and doctrines on African American life and culture and explores the ways in which African American cultural production has been largely centered on a critique of law.

Race and Gender in the Making of an African American Literary Tradition

The Cambridge Companion to African American Women's Literature covers a period dating back to the eighteenth century. These specially commissioned essays highlight the artistry, complexity and diversity of a literary tradition that ranges from Lucy Terry to Toni Morrison. A wide range of topics are addressed, from the Harlem Renaissance to the Black Arts Movement, and from the performing arts to popular fiction. Together, the essays provide an invaluable guide to a rich, complex tradition of women writers in conversation with each other as they critique American society and influence American letters. Accessible and vibrant, with the needs of undergraduate students in mind, this Companion will be of great

interest to anybody who wishes to gain a deeper understanding of this important and vital area of American literature.

Discourse as Social Interaction

Transcultural Teens provides readers with a window onto the cultural and linguistic creativity of the housing projects, or cités, that ring Paris, showing how young people of Algerian Arab origins play with language in fascinating ways that subvert commonly held notions of intercultural animosity. Provides solid, real-world evidence in the often abstracted theoretical debate on globalization and transnationalism Offers detailed data on linguistic practices that is more focused than generalized anthropological studies Includes the experiences of French-Algerian adolescent girls who remain largely absent from academic and popular discourse Reveals the cultural richness and diversity of a population that is stigmatized and marginalized in a national context

African American Women's Language

How do people engage in and competently manage discourse and interaction with others? Whether in informal, everyday conversations or professional dialogues, people do things while they are speaking or writing. Focusing on the fundamental interactional, social, political and cultural functions of text and talk, this comprehensive volume shows that discourse is not merely form and meaning but also action. This social dimension of discourse is further highlighted by examining the role of social identity and group membership, such as those based on gender, 'race' and ethnicity: How do members of various groups typically speak among each other and how do they communicate with people of other groups or cultures? What is th

African-American English: Structure, History and Use provides a comprehensive survey of linguistic research into African-American English. The main linguistic features are covered, in particular the grammar, phonology and lexicon. Further chapters explore the sociological, political and educational issues connected with African-American English. The editors are the leading experts in the field and along with other key figures, notably William Labov, Geneva Smitherman and Walt Wolfram, they provide an authoritative, diverse guide to this topical subject area. Drawing on many contemporary references: the Oakland School controversy, the rap of Ice-T, the contributors reflect the state of current scholarship on African-American English, and actively dispel many misconceptions, address new questions and explore new approaches. The book is designed to serve as a text for the increasing number of courses on African-American English and as a convenient reference for students of linguistics, black studies and anthropology at both undergraduate and postgraduate level.

At the Heart of It All?

An essential voice has been added to the ongoing national debate and public discourse on race, class, and gender. African American Women Speak Out on Anita Hill-Clarence Thomas is the first commentary on the Anita Hill-Clarence Thomas confrontation written exclusively by African American women. Margaret Walker Alexander, Angela Y. Davis, Darlene Clark Hine, Harriette McAdoo, Julianne Malveaux, and other scholars and writers offer reflections and in-depth analyses on one of the most wrenching public dramas in recent history. Diverse and interdisciplinary in scope, the contributions clarify the significance of the event and examine the broader ramifications for the African American community and the nation.

I Found God in Me

Black Women, Cultural Images and Social Policy offers a critical analysis of the policy-making process. Jordan-Zachery demonstrates how social meanings surrounding the discourses on crime, welfare and family policies produce and reproduce discursive practices that maintain gender and racial hierarchies. Using critical discourse analysis (CDA), she analyzes the values and ideologies ensconced in the various images of black womanhood and their impact on policy formation. This book provides exceptional insight into the racing-gendering process of policy making to show how relations of power and forms of inequality are discursively constructed and impact the lives of African American women.

Women's Political Discourse

Talkin that Talk

Shirley Wilson Logan analyzes the distinctive rhetorical features in the persuasive discourse of nineteenth-century black women, concentrating on the public discourse of club and church women from 1880 until 1900. Logan develops each chapter in this illustrated study around a feature of public address as best exemplified in the oratory of a particular woman speaker of the era. She analyzes not only speeches but also editorials, essays, and letters. Logan first focuses on the prophetic oratory of Maria Stewart, the first American-born black woman to speak publicly. Turning to Frances Harper, she considers speeches that argue for common interests between divergent communities. And she demonstrates that central to the antilynching rhetoric of Ida Wells is the concept of "presence," or the tactic of enhancing certain selected elements of the presentation. In her discussion of Fannie Barrier Williams and Anna Cooper, Logan shows that when speaking to white club women and black clergymen, both Williams and Cooper employ what Kenneth Burke called identification. To analyze the rhetoric of Victoria Matthews, she applies Carolyn Miller's modification of Lloyd Bitzer's concept of the rhetorical situation. Logan also examines the discourse of women associated with the black Baptist women's movement and those participating in college-affiliated conferences. The book includes an appendix with little-known speeches and essays by Anna Julia Cooper, Selena Sloan Butler, Lucy Wilmot Smith, Mary V. Cook, Adella Hunt Logan, Victoria Earle Matthews, Lucy C. Laney, and Georgia Swift King.

African-American English

The structure of the African American family has been a recurring theme in American discourse on the African American community. The role of African American mothers especially has been the cause of heated debates since the time of Reconstruction in the 19th century. The discourse, which often saw the African American family as something that needed fixing, also put the issue of women's reproductive rights on the political agenda. Taking a long-term perspective from the 1920s to the early 1990s, Anne Overbeck aims to show how normative notions of the American family influenced the perspective on the African American family, especially African American women. The book follows the negotiations on African American women's reproductive rights within the context of eugenics, modernization theory, overpopulation, and the War on Drugs. Thereby it sets out to trace both continuities and changes in the discourse on the reproductive rights of African American women that still influence our perspective on the African American family today.

Contemporary African American Women Playwrights

“The Negroes must have Jesus, Jobs, and Justice,” declared Nannie Helen Burroughs, a nationally known figure among black and white leaders and an architect of the Woman’s Convention of the National Baptist Convention. Burroughs made this statement about the black women’s agenda in 1958, as she anticipated the collapse of Jim Crow segregation and pondered the fate of African Americans. Following more than half a century of organizing and struggling against racism in American society, sexism in the National Baptist Convention, and the racism and paternalism of white women and the Southern Baptist Convention, Burroughs knew that black Americans would need more than religion to survive and to advance socially, economically, and politically. Jesus, jobs, and justice are the threads that weave through two hundred years of black women’s experiences in America. Bettye Collier-Thomas’s groundbreaking book gives us a remarkable account of the religious faith, social and political activism, and extraordinary resilience of black women during the centuries of American growth and change. It shows the beginnings of organized religion in slave communities and how the Bible was a source of inspiration; the enslaved saw in their condition a parallel to the suffering and persecution that Jesus had endured. The author makes clear that while religion has been a guiding force in the lives of most African Americans, for black women it has been essential. As co-creators of churches, women were a central factor in their development. Jesus, Jobs, and Justice explores the ways in which women had to cope with sexism in black churches, as well as racism in mostly white denominations, in their efforts to create missionary societies and form women’s conventions. It also reveals the hidden story of how issues of sex and sexuality have sometimes created tension and divisions within institutions. Black church women created national organizations such as the National Association of Colored Women, the National League of Colored Republican Women, and the National Council of Negro Women. They worked in the interracial movement, in white-led Christian groups such as the YWCA and Church Women United, and in male-dominated organizations such as the NAACP and National Urban League to demand civil rights, equal employment, and educational opportunities, and to protest lynching, segregation, and discrimination. And black women missionaries sacrificed their lives in service to their African sisters whose destiny they believed was tied to theirs. Jesus, Jobs, and Justice restores black women to their rightful place in American and black history and demonstrates their faith in themselves, their race, and their God. From the Hardcover edition.

Recovering the Black Female Body

This volume, based on presentations at a 1998 state of the art conference at the University of Georgia, critically examines African American English (AAE) socially, culturally, historically, and educationally. It explores the relationship between AAE and other varieties of English (namely Southern White Vernaculars, Gullah, and Caribbean English creoles), language use in the African American community (e.g., Hip Hop, women's language, and directness), and application of our knowledge about AAE to issues in education (e.g., improving overall academic success). To its credit (since most books avoid the issue), the volume also seeks to define the term 'AAE' and challenge researchers to address the complexity of defining a language and its speakers. The volume collectively tries to help readers better understand language use in the African American community and how that understanding benefits all who value language variation and the knowledge such study brings to our society.

The Cambridge Companion to African American Women's Literature

The goal of The Oxford Handbook of African American Language is to provide readers with a wide range of analyses of both traditional and contemporary work on language use in African American communities in a broad collective. The Handbook offers a survey of language and its uses in African American communities from a wide range of contexts organized into seven sections: Origins and Historical Perspectives; Lects and Variation; Structure and Description; Child Language Acquisition and Development; Education; Language in Society; and Language and Identity. It is a handbook of research on

African American Language (AAL) and, as such, provides a variety of scholarly perspectives that may not align with each other -- as is indicative of most scholarly research. The chapters in this book "interact" with one another as contributors frequently refer the reader to further elaboration on and references to related issues and connect their own research to related topics in other chapters within their own sections and the handbook more generally to create dialogue about AAL, thus affirming the need for collaborative thinking about the issues in AAL research. Though the Handbook does not and cannot include every area of research, it is meant to provide suggestions for future work on lesser-studied areas (e.g., variation/heterogeneity in regional, social, and ethnic communities) by highlighting a need for collaborative perspectives and innovative thinking while reasserting the need for better research and communication in areas thought to be resolved.

Teaching Modern Foreign Languages

This book explores the way older women are represented in society. Through close readings of novels by major 20th century novelists, compared with the more dominant representations of female ageing to be found in popular culture it suggests that they offer a feminist understanding of the 'invisible' woman sometimes lacking in feminism itself.

African American Communication & Identities

African American Women's Language: Discourse, Education, and Identity is a groundbreaking collection of research on African American Women's Language that is long overdue. It brings together a range of research including variationist, autoethnography, phenomenological, ethnographic, and critical. The authors come from a variety of disciplines (e.g., Sociology, African American Studies, Africana Studies, Linguistics, Sociophonetics, Sociolinguistics, Anthropology, Literacy, Education, English, Ecological Literature, Film, Hip Hop, Language Variation), scientific paradigms (e.g., critical race theory, narrative, interaction, discursive, variationist, post-structural, and post-positive perspectives), and inquiry methods (e.g., quantitative, qualitative, ethnographic, and multimethod) while addressing a variety of African American female populations (e.g., elementary school, middle school, adults) and activity settings (e.g., classrooms, family, community, church, film). Readers will get a good sense of the language, discourse, identity, community, and grammar of African American women.

The essays provide the most current research on African American Women's Language and expand a literature that has too often only focused on male populations at the expense of letting the sistas speak.

The Handbook of Language Variation and Change

Courting Communities focuses on the writing and oratory of nineteenth-century African-American women whose racial uplift projects troubled the boundaries of race, nation and gender. In particular, it reexamines the politics of gender in nationalist movements and black women's creative response within and against both state and insurgent black nationalist discourses. Courting Communities highlights the ideas and rhetorical strategies of female activists considered to be less important than the prominent male nationalists. Yet their story is significant precisely because it does not fit into the pre-established categories of nationalism and leadership bequeathed to us from the past.

Transcultural Teens

Critical edition of three women's oral slave narratives.

Language and Woman's Place

In the early decades of the twentieth century, tens of thousands of African Americans arrived at Detroit's Michigan Central Station, part of the Great Migration of blacks who left the South seeking improved economic and political conditions in the urban North. The most visible of these migrants have been the male industrial workers who labored on the city's automobile assembly lines. African American women have largely been absent from traditional narratives of the Great Migration because they were excluded from industrial work. By placing these women at the center of her study, Victoria Wolcott reveals their vital role in shaping life in interwar Detroit. Wolcott takes us into the speakeasies, settlement houses, blues clubs, storefront churches, employment bureaus, and training centers of Prohibition- and depression-era Detroit. There, she explores the wide range of black women's experiences, focusing particularly on the interactions between working- and middle-class women. As Detroit's black population grew exponentially, women not only served as models of bourgeois respectability, but also began to reshape traditional standards of deportment in response to the new realities of their lives. In so doing, Wolcott says, they helped transform black politics and culture. Eventually, as the depression arrived, female respectability as a central symbol of reform was supplanted by a more strident working-class activism.

Speaking Lives, Authoring Texts

The 1975 publication of Robin Tolmach Lakoff's *Language and Woman's Place*, is widely recognized as having inaugurated feminist research on the relationship between language and gender, touching off a remarkable response among language scholars, feminists, and general readers. For the past thirty years, scholars of language and gender have been debating and developing Lakoff's initial observations. Arguing that language is fundamental to gender inequality, Lakoff pointed to two areas in which inequalities can be found: Language used about women, such as the asymmetries between seemingly parallel terms like master and mistress, and language used by women, which places women in a double bind between being appropriately feminine and being fully human. Lakoff's central argument that "women's language" expresses powerlessness triggered a controversy that continues to this day. The revised and expanded edition presents the full text of the original first edition, along with an introduction and annotations by Lakoff in which she reflects on the text a quarter century later and expands on some of the most widely discussed issues it raises. The volume also brings together commentaries from twenty-six leading scholars of language, gender, and sexuality, within linguistics, anthropology, modern languages, education, information sciences, and other disciplines. The commentaries discuss the book's contribution to feminist research on language and explore its ongoing relevance for scholarship in the field. This new edition of *Language and Woman's Place* not only makes available once again the pioneering text of feminist linguistics; just as important, it places the text in the context of contemporary feminist and gender theory for a new generation of readers.

Trickster-troping on Black Culture

What makes a speech community? How do they evolve? How are speech communities identified? Speech communities are central to our understanding of how language and interactions occur in societies around the world and in this book readers will find an overview of the main concepts and critical arguments surrounding how language and communication styles distinguish and identify groups. Speech communities are not organized around linguistic facts but around people who want to share their opinions and identities; the language we use constructs, represents and embodies meaningful participation in society. This book focuses on a range of speech communities, including those that have developed from an increasing technological world where migration and global interactions are common. Essential reading for graduate students and researchers in linguistic anthropology, sociolinguistics and applied linguistics.

The Hip Hop Reader

In this book the editors suggest an approach to the study of black women as communicators that centers the knowledge and wisdom conveyed through the 19th and 20th centuries both in the public rhetoric of notable black women and in ordinary women's everyday conversations. The goal is to present what is not found in other communication books and Joomals - an angle of vision on black women's rhetoric and everyday talk that both takes account of the material circumstances and ideological contexts of black women's communication and honors black women's interpretations of discourse. Although the authors employ a variety of contemporary communication concepts and theories, all make the traditions of African American feminist and womanist thought central to their analyses. In Part I a framework for liberatory research is proposed. Each author in Part II endeavors to provide concrete, socially useful description and critique of African American women's discourse. Three of the major themes that interweave in these chapters are multiple consciousness, the value of sisterhood and community, and the culture of resistance.
