The Panama Papers

The shift from scientific materialism to a multidimensional worldview in harmony with the world's great spiritual traditions • Articulates humanity's critical choice--to be the last decade of an outgoing, obsolete world, or the first of a new and viable one • Presents a new "reality map" to guide us through the environmental, scientific, and geopolitical upheavals we are experiencing Our world is in a Macroshift. The reality we are experiencing today is a substantially new reality--climate change, global corporations, industrialized agriculture--challenging us to change with our rapidly changing world, lest we perish. In this book, Ervin Laszlo presents a new "reality map" to guide us through the world shifts we are experiencing--the problems, opportunities, and challenges we face individually as well as collectively--in order to help us understand what we must do during this time of great transition. Science's cutting edge now views reality as broader, as multiple universes arising in a possibly infinite meta-universe, as well as deeper, extending into dimensions at the subatomic level. Laszlo shows that aspects of human experience that had previously been consigned to the domain of intuition

and speculation are now being explored with scientific rigor and urgency. There has been a shift in the materialistic scientific view of reality toward the multidimensional worldview of multiple interconnected realities long known by the world's great spiritual traditions. By understanding the interconnectedness of our changing world as well as our changing "map" of the world, we can navigate with insight, wisdom, and confidence.

The End of Poverty

For Erik Reece, life, at last, was good: he was newly married, gainfully employed, living in a creekside cabin in his beloved Kentucky woods. It sounded, as he describes it, "like a country song with a happy ending." And yet he was still haunted by a sense that the world--or, more specifically, his country--could be better. He couldn't ignore his conviction that, in fact, the good ol' USA was in the midst of great social, environmental, and political crises--that for the first time in our history, we were being swept into a future that had no future. Where did we--here, in the land of Jeffersonian optimism and better tomorrows--go wrong? Rather than despair, Reece turned to those who had dared to imagine radically different futures for America. What followed was a giant road trip and research adventure through the sites of America's utopian communities, both historical and contemporary, known and unknown, successful and catastrophic. What he uncovered was not just a series of lost histories and broken visionaries but also a

continuing and vital but hidden idealistic tradition in American intellectual history. Utopia Drive is an important and definitive reconstruction of that tradition. It is also, perhaps, a new framework to help us find a genuinely sustainable way forward. " an engaging exploration -- and example -- of the fruitful tunnel-visions of dreamers turned doers." - Publishers Weekly

This collection of essays was the last work planned by Ayn Rand before her death in 1982. In it, she summarizes her view of philosophy and deals with a broad spectrum of topics. According to Ayn Rand, the choice we make is not whether to have a philosophy, but which one to have: rational, conscious, and therefore practical; or contradictory, unidentified, and ultimately lethal. Written with all the clarity and eloquence that have placed Ayn Rand's Objectivist philosophy in the mainstream of American thought, these essays range over such basic issues as education, morality, censorship, and inflation to prove that philosophy is the fundamental force in all our lives.

Finalist for the 2006 Gelber Prize: "A brilliant contribution to the American foreign policy debate."—Anatol Lieven, *New York Times Book Review* At a time when America's dominance abroad was being tested like never before, *Taming American Power* provided for the first time a "rigorous critique of current U.S. strategy" (*Washington Post Book World*) from the vantage point of its fiercest opponents. Stephen M. Walt examines America's place as the world's singular superpower and the strategies that rival states have devised to counter it. Hailed as a "landmark book" by *Foreign Affairs*, *Taming American Power* makes the case that this ever-increasing tide of opposition not only could threaten America's ability to achieve its

foreign policy goals today but also may undermine its dominant position in years to come.

Orange County Noir

From William Dalrymple—award-winning historian, journalist and travel writer—a masterly retelling of what was perhaps the West's greatest imperial disaster in the East, and an important parable of neocolonial ambition, folly and hubris that has

striking relevance to our own time. With access to newly discovered primary sources from archives in Afghanistan, Pakistan, Russia and India—including a series of previously untranslated Afghan epic poems and biographies—the author gives us the most immediate and comprehensive account yet of the spectacular first battle for Afghanistan: the British invasion of the remote kingdom in 1839. Led by lancers in scarlet cloaks and plumed helmets, and facing little resistance, nearly 20,000 British and East India Company troops poured through the mountain passes from India into Afghanistan in order to reestablish Shah Shuja ul-Mulk on the throne, and as their puppet. But after little more than two years, the Afghans rose in answer to the call for jihad and the country exploded into rebellion. This First Anglo-Afghan War ended with an entire army of what was then the most powerful military nation in the world ambushed and destroyed in snowbound mountain passes by simply equipped Afghan tribesmen. Only one British man made it through. But Dalrymple takes us beyond the bare outline of this infamous battle, and with penetrating, balanced insight illuminates the uncanny similarities between the West's first disastrous entanglement with Afghanistan and the situation today. He delineates the straightforward facts: Shah Shuja and President Hamid Karzai share the same tribal heritage; the Shah's principal opponents were the Ghilzai tribe, who today make up the bulk of the Taliban's foot soldiers; the same cities garrisoned by the British are today garrisoned by foreign troops, attacked from the same rings of hills and high passes from which the British faced attack. Dalrymple also makes clear the byzantine complexity of Afghanistan's age-

old tribal rivalries, the stranglehold they have on the politics of the nation and the ways in which they ensnared both the British in the nineteenth century and NATO forces in the twenty-first. Informed by the author's decades-long firsthand knowledge of Afghanistan, and superbly shaped by his hallmark gifts as a narrative historian and his singular eye for the evocation of place and culture, *The Return of a King* is both the definitive analysis of the First Anglo-Afghan War and a work of stunning topicality.

This historical epic, set in the world of 300, tells of the upsurge and decline of the Persian King's empire, and the ascent of the Grecian realm through Alexander. Written and illustrated by comics luminary and legend, Frank Miller (Sin City, The Dark Knight, 300), and colored by Alex Sinclair (Batman: The Dark Knight III: The Master Race), this companion to Miller's epic masterpiece, 300, brings the historical story of Xerxes to the graphic novel audience with grit and visual style! The ongoing Greek rebellion against Persian tyranny reaches a turning point after the destruction of the city of Sardis and the later battle of Marathon: on a military campaign to vanquish the city of Athens and silence the Greeks once and for all, Xerxes, Persian Prince, watches as his father, King Darius, falls in battle . . . The mantle of king is passed and while his newly-inherited fleet retreats toward home,

Xerxes' hatred is cemented toward Athens--and his incentive to build the Persian empire is fueled. Xerxes becomes the king of all countries--the king of Persia, ruler of Zion, and Pharaoh of Egypt--and his empire is unlike any the world has ever seen, until . . . The mantle is again passed, the god king dies and Darius III continues as the king of all. But then, from the west, a tiger force strikes in Asia Minor and is on a course for collision with Persian forces. This will be the beginning of the end for Persia and the launch of Alexander the Great's rise to power!

Taming American Power: The Global Response to U.S. Primacy

What does it mean to be almost healthy? For Daniel Selvakumar, it was being born with a heart defect that offered a slim chance of surviving past childhood. At 14 months old, he underwent the first of three open-heart surgeries. Grappling with his own mortality, Daniel accepted the big and small gifts of life – a close-knit family, lasting friendships, a business launched, a first love. In his own way, he sought to leave the world a bit better, whether by helping a friend struggling with drug addiction, coaching teenagers or brightening the lives of nurses and fellow hospital patients in his last days. Daniel's heart was deformed by its defect as much as it was enlarged by love. He used it to make each of his 25 years count, and for the brief season that he was alive, left his mark on the hearts of friends, family and strangers, changing them forever. In one of Daniel's final postings on social media, he outlines his approach for a life well lived – Live full, love hard, be

grateful and own that shit. Eloquent, heartrending and pensive, *Stay Gold* is a glowing tapestry of a memoir told through the interwoven perspectives of Daniel, his parents and the people he loved. Poised between past and present with a gaze at the future never to be, Daniel's story asks how an almost healthy boy can find his place in a mostly healthy world, and how a single life can be meaningful when time is running out.

organisations, lawyers and those concerned with human rights. It will also be useful to scholars and researchers of Indian politics, law and sociology.

Fundamentals of Physical Chemistry

Youth Lens on the Silk Roads

This book is about enlightenment, spiritual awakening, self realization, meditation, awareness, consciousness, happiness, love, relationships, psychological suffering and human predicament. Based largely on actual dialogues between Francis Lucille, a spiritual teacher of non-duality, and some of his disciples, the music of freedom that it conveys resonates between the words, and gives the reader an inkling of the peace and happiness that are experienced in the presence of an

authentic master. Francis Lucille was for over twenty years a close friend and disciple of Jean Klein, a well recognized French teacher of non-duality. They both belong to a lineage of Advaita Vedanta teachers stemming from India. (Advaita Vedanta is the main nondualist Hindu spiritual tradition). Jean Klein's guru, Pandit Veeraraghavachar, was a Professor at the Sanskrit College in Bangalore. Their teachings, despite some superficial similarities, are quite different from those of most contemporary western neo Advaita teachers. They emphasize for instance the importance of the direct transmission from guru to disciple, through presence, beyond words, and they recognize that the same universal truth was expressed by various saints, philosophers and teachers throughout history and across the world. That which matters here is not the form of the teaching, direct or gradual for instance, as much as the authenticity of the teacher, the vibrancy of his realization, the outpouring of his love, the freedom of his humour, the brilliancy of his intelligence, the splendor of his poetry, the spontaneous sharing of his peace. Nonduality is the common ground of Buddhism (especially Zen and Dzogchen), Advaita, Sufism, Taoism, the Kabbalah, the Gnosis and the teachings of Jesus in the Thomas Gospel, the teachings of Parmenides, Plotinus, Gaudapada, Abinavagupta, Meister Eckhart, Ramana Maharshi, Atmananda Krishna Menon, Ananda Mai and many others.
