brings together 50 of the worst cars ever to grace the roads of Britain. The book features everything from the aesthetically pathetic to the mechanically misguided and includes tales of the most bizarre and appalling cock-ups in motoring history. With full-colour photos to illustrate each entry, this chronicle of classically Crap Cars will transport you back to the beige and brown world of the seventies and eighties and your very own Morris Marina.

Established in Amsterdam in 1935, the International Institute of Social History is one of the world's leading research centres. Its exceptional research collections owe much to its former director Jaap Kloosterman. The contributors offer a rare insight into the history of the institute and the motivation behind devoting a lifetime to collecting social history sources.

A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program for monographs. Visit www.luminosoa.org to learn more. How do keyboards make music playable? Drawing on theories of media, systems, and cultural techniques, *Keys to Play* spans Greek myth and contemporary Japanese digital games to chart a genealogy of musical play and its animation via improvisation, performance, and recreation. As a paradigmatic digital interface, the keyboard forms a field of play on which the book's diverse objects of inquiry—from clavichords to PCs and eighteenth-century musical dice games to the latest rhythm-action titles—enter into analogical relations. Remapping the keyboard's topography by way of Mozart and Super Mario, who head an expansive cast of historical and virtual actors, *Keys to Play* invites readers to unlock ludic dimensions of music that are at once old and new.

160 duotone images of sensuous and sublime female nudes by up-and-coming photographer Pascal Baetens. According to photographer Jeff Dunas, "Baeten's work reveals energy, a discipline, and a love of his subject. Baeten's photography has that essential 'something' - you either have it, or you don't. You can't learn it. That special 'something' is the ability to truly reach your subject - create a vision, and have complete complicity with the object you are photographing." Includes over 150 sublime examples of this up-and-coming photographer's work.

This book tells the story of the renaissance of the Kurna language, the language of Adelaide and the Adelaide Plains in South Australia, principally over the earliest period up until 2000, but with a summary and brief discussion of developments from 2000 until 2016. It chronicles and analyses the efforts of the Nunga community, and interested others, to reclaim and relearn a linguistic heritage on the basis of mid-nineteenth-century materials. This study is breaking new ground. In the Kurna case, very little knowledge of the language remained within the Aboriginal community. Yet the Kurna language has become an important marker of identity and a means by which Kurna people can further the struggle for recognition, reconciliation and liberation. This work challenges widely held beliefs as to what is possible in language revival and questions notions about the very nature of language and its development.

Surgical robotics is a rapidly evolving field. With roots in academic research, surgical robotic systems are now clinically used across a wide spectrum of surgical procedures. *Surgical Robotics: Systems Applications and Visions* provides a comprehensive view of the field both from the research and clinical perspectives. This volume takes a look at surgical robotics from four different perspectives, addressing vision, systems, engineering development and clinical applications of these technologies. The book also:

- Discusses specific surgical applications of robotics that have already been deployed in operating rooms
- Covers specific engineering breakthroughs that have occurred in surgical robotics
- Details surgical robotic applications in specific disciplines of surgery including orthopedics, urology, cardiac surgery, neurosurgery, ophthalmology, pediatric surgery and general surgery

Surgical Robotics: Systems Applications and Visions is an ideal volume for researchers and engineers working in biomedical engineering.

The nature and diversity of presentations at the conference on: "Bee Products: Properties, Applications and Apitherapy" held at Tel-Aviv on May 26--30, 1996, emphasize the increasing interest of physicians, practitioners, scientists, herbalists, dieticians, cosmeticians, microbiologists, and beekeepers in different facets of bee products. This volume consists of a selection of 31 contributions presented at the conference and which provide information on the present status of our knowledge in this area. In spite of their diversity, they reflect the mainstream of the conference, namely: "Imported" Products (honey, pollen and propolis), Exocrine Secretions of Workers (venom, royal jelly). Toxicity and Contaminants, Quality Control, Marketing, Apitherapy, Cosmetics, etc. Since antiquity, honey as well as other bee products were used as food, as a cure for ailments of humans and animals, and as cosmetics. We hope that this volume will contribute to interdisciplinary studies on chemical composition, pharmacological effects, nutrition, and other aspects of bee products. Critical and unbiased experimental research may unravel the yet unknown composition and mode of action of bee products and elucidate many unanswered questions. The noteworthy features of this conference were the participants from all parts of the world and of different cultural backgrounds, who shared their keen interest and curiosity regarding honey bees and their products. We thank all of them for their personal contribution to the success of this conference.

With the rise in deregulated service-based economies in developed countries over the last forty years, an understanding of the marketing of services is essential to the marketing student, researcher, and practitioner. This four-volume collection is structured around the evolution of services marketing scholarship from 1970 to the present, giving an unprecedented, detailed account of the relationship between the theory and practice of services marketing and the changing social, economic, and technical environments over time. Each volume takes a distinct time period and theme as its subject. Volumes one to three offer the last word on services marketing research of the 20th century, with volume four looking towards a unified marketing approach for the current century.

Airmen Against the Sea

The idea of publishing this book on Perfumes: Art, Science and Technology grew out of the observation that, on the verge of the 1990s, there was really no state-of-the-art compilation of the relevant know-how on which the fragrance industry is based. It was obvious that such a compilation would be well received, not only by perfumers and fragrance chemists, but also by those involved in related trade and marketing or in the development and distribution of consumer products, by researchers from other fields, by students and, finally, by amateurs of perfumes in general. Therefore, we set out to find competent authors who were willing to contribute to the endeavour, and we did not do this unselfishly; on the contrary, we selected a wish-list of specialists who would provide us with new insight and characterize the trends and research priorities determining the future. Thus, we were counting on learning much ourselves in the course of the project. We were more than pleasantly surprised by the reactions to our first letter-and so was Elsevier. We certainly had not expected perfumers who are usually much more 'doers' than 'writers' to react in such an enthusiastic way; especially, the spontaneous affirmative answer from the famous E. Roudnitska created a momentum which contributed significantly to the successful completion of this book. But, of course, we should not

create the impression that the other authors' chapters are less important, and we thank all of them heartily for their invaluable effort.

The Wonders of the Invisible World

Airmen Against The Sea is the fourth in a series of ADTIC studies to determine how military personnel survived under meergency conditions in variaous parts of the world. Its predecessors, 999 Survived, Sun, Sand and Survival, and Down In the North, dealt with survival respectively in the Southwest pacific Tropics, in ther African Deserts, and in the Arctic. This study concerns survival at sea dn, like its predecessors, employs the topical approach. It is not a water survival manual, but is a factual report of what happened to men who bailed out or ditched at sea, and whose only refuge for days on end was a rubber lifeaft. Under such topical headings as bailout versus ditching, survival equipment, the lifeaft, food, hazards, injuries, morale, and many others, the experiences of the survivors themselves are emphasized. The result is a new and fresh insight into the problems of survival at sea which will eb of inteest

to all those who fly over water, and of particular value to those concerned directly with rescue operations, with water survival training, and with the development of survival materiel.

How do we find the right word for the job? Where does that word come from? Why do we spell it like that? And how do we know what it means? Words are all around us - we use them every day to communicate our joys, fears, hopes, opinions, wishes and demands - but we don't often think about them too deeply. In this highly accessible introduction to English words, the reader will discover what the study of words can tell them about the extraordinary richness and complexity of our daily vocabulary and about the nature of language in general. Assuming no prior knowledge of linguistics, the book covers a wide range of topics, including the structure of words, the meaning of words, how their spelling relates to pronunciation, how new words are manufactured or imported from other languages, and how the meaning of words changes with the passage of time. It also investigates how the mind deals with words by highlighting the amazing intellectual feat performed routinely when the right word is retrieved from the mental dictionary. This revised and expanded second

edition brings the study of words right up to date with coverage of text messaging and email and includes new material on psycholinguistics and word meaning. With lively examples from a range of sources - encompassing poetry, jokes, journalism, advertising and clichés - and including practical exercises and a fully comprehensive glossary, English Words is an entertaining introduction to the study of words and will be of interest to anyone who uses them.
