DVD's, CD's, MP3, Video Games, Furniture, Electronics and so on! Not only that, services such as video, audio, and book streaming were also included eventually. But did Amazon stop there? Not really! They started to dish out proprietary electronic gadgets including the Kindle, Fire TV, and Fire Tablet! But that's not what you are here for right? You are here to know about the latest and greatest creation to swoop the entire industry and take it by storm! The Amazon Echo line of products! What are the Echo you ask? Amazon clearly understood back in 2011 that the whole market and common individuals were slowly shifting towards turning their whole household into futuristic masterpieces through the usage of so-called "Smart" or "Automated" gadgetry. Products which gave the users an opportunity to acquire even a limited amount of automated productivity were selling like hot cakes straight out of the oven, despite having a high price tag! With that understanding, Amazon took a bold move when they tried to penetrate into the market of smart home devices back in 2014 by releasing their first Amazon Echo in hopes that the device would help even more people to get into the hype train and equip their household with a piece of the future by tagging it with a significantly lowered price tag. And not out of surprise I should say, the Amazon Echo became an instant hit and won the hearts of millions of people out there! Flash forward to the year 2016, Amazon released their latest iteration of the Echo product line up and blessed the world with the most affordable and perhaps adorably cute Echo device yet! The Echo Dot.
