Lectures on Clinical Materia Medica

The Edinburgh encyclopaedia, conducted by D. Brewster

The New Materia Medica is a source book of information on some of the most exciting new crystal, botanical, and animal remedies now in use by practitioners of the Guild of Homeopaths. These remedies, proven through the practice of meditation and with a reputation for remarkable success, are extraordinary for their depth of action, reaching far into a patient's psyche and history. Each entry gives a description of the original substance in its natural state and an outline of its medicinal and traditional uses, along with crystal essence cures where applicable and explanations of the remedies' affinities for the chakras and the associated glands and organs. All the remedies also include detailed information on their mental, emotional, and physical effects on the individual parts of the body. Summarized case notes show clinical evidence of efficacy of these therapies and

Medical Jurisprudence

The study of 'sarcodes' is one of the most grey areas of homeopathic materia medica, which has not yet been thoroughly explored. Most of the sarcodes are not proved as per standard guidelines of Dr Hahnemann nor majority of them been clinically verified. On scrutiny of the available literature on sarcodes, a lot of differences and contradictions are witnessed which lead to confusion in the minds of the readers, particularly in respect to their sources, preparation, clinical applicability, effective potencies and doses etc., There is no clarity whether sarcodes should be earmarked as a separate class of 'animal kingdom'. Moreover the signs and symptoms of each sarcode are not documented uniformly in different homeopathic Materia Medicas, which naturally confounds the readers.

Dr. E. A. Farrington s Clinical Materia Medica is more than 100 years old book, and what a gem it is. Though it is a very nicely written book, it is not as popular as Kent s Lectures on Materia Medica. So, we at B. Jain decided to revamp this jewel.
