What if the house you are about to enter was built with the confessed purpose of seducing you, of creating various sensations destined to touch your soul and make you reflect on who you are? Could architecture have such power? This was the assumption of generations of architects at the beginning of modernity. Exploring the role of theatre and fiction in defining character in architecture, Louise Pelletier examines how architecture developed to express political and social intent. Applying this to the modern day, Pelletier considers how architects can learn from these eighteenth century attitudes in order to restore architecture's communicative dimension. Through an in-depth and interdisciplinary analysis of the beginning of modernity, Louise Pelletier encourages today's architects to consider the political and linguistic implications of their tools. Combining theory, historical studies and research, Architecture in Words will provoke thought and

enrich the work of any architect.

Police Administration provides a thorough overview of what police supervisors and administrators need to know. The text examines police administration from four distinct perspectives: a systems perspective (the interrelatedness among units and organizations); a traditional, structural perspective (administrative principles, management functions, and the importance of written guidelines); a human

behavioral perspective (the human element in organizations); and a strategic management perspective (communications and information systems, performance evaluation, strategies and tactics, and promising approaches to increasing police agency effectiveness). What Philosophy Can Tell You About Your Lover

"You ain't gonna like what I have to tell you, but I'm gonna tell you anyway. See, my name is Karen Memery, like memory only spelt with an e, and I'm one of the girls what works in the Hôtel Mon Cherie on Amity Street. Hôtel has a little hat over the o like that. It's French, so Beatrice tells me." Set in the late 19th century—when the city we now call Seattle Underground was the whole town (and still on the surface), when airships plied the trade routes, would-be gold miners were heading to the gold fields of Alaska, and steam-powered mechanicals stalked the waterfront, Karen is a young woman on her own, is making the best of her orphaned state by working in Madame Damnable's high-quality bordello. Through Karen's eyes we get to know the other girls in the house—a resourceful group—and the poor and the powerful of the town. Trouble erupts one night when a badly injured girl arrives at their door, beggin sanctuary, followed by the man who holds her indenture, and who has a machine that can take over anyone's mind and control their actions. And as if that wasn't bad enough, the next night brings a body dumped in their rubbish heap—a streetwalker who has been brutally murdered. Bear brings alive this Jack-the-Ripper yarn of the old west with a light touch in Karen's own memorable voice, and a mesmerizing evocation of classic steam-powered science. Astrology is finally getting personal! From the best-selling author of *The Secret Language of Birthdays* comes a revolution in charting your horoscope based on both the date and time of your birth that makes all other horoscope books irrelevant. With his "Personology" system, Gary Goldschneider has created a unique method which divides each of the twelve signs into five sub-types-such as Aquarius-Pisces Cusp, Pisces I, Pisces II, Pisces III, and Pisces-Aries Cusp-thereby sub-dividing the astrological year into 48 personology periods. The precision this allows is far beyond anything available in any other astrology book and provides a ground-breaking new way for readers to look not only at their own lives, but their interactions with those around them. The book comes packed with easy-to-follow charts covering the sun, eight different planets, and, unique to this book, the rapid fluctuations of the moon for every year from 1900 through 2025. The result is an unprecedented level of precision, as well as a beautifully illustrated volume destined to become the one and only book horoscope readers will treasure for the next twenty years.

To help the researcher understand why and how children react to adults who are doing ethnographic research, Fine and Sandstrom explore the methodological and ethical problems of qualitative research with minors. They correct numerous

fallacies held by researchers that children think like adults and that they cannot hide their thoughts and feelings from adults, especially strangers. Recognizing that age is an important determinant of children's response, they discuss problems and present strategies for conducting research with three age groups of children: preschool children (4 to 6 year olds), preadolescents (10 to 12) and middle adolescents (14 to 16). This is the first major methodological statement on doing participant observation work w

The Vixen Manual

Be warned—in your journey through this volume you will encounter many true stories. Some will make you laugh, others could make you cry, and all are enough to thoroughly embarrass the authors. These stories would never be allowed to see the light of day if they did not open the door to important truths about love. The authors speak to you, sometimes in their own voices, sometimes through dialogue, and sometimes through fiction. You will recognize yourself in their struggles and triumphs. Can the good life be attained without true love? What is jealousy? Is it possible to be a feminist and a heterosexual lover at the same time? What is the logic of the lovers' quarrel? Is rough sex immoral? Is pornography a great lover's friend or a foe? What did Plato, Aristotle, Kant, Nietzsche, Russell, Beauvoir, and other great geniuses of Western history have to say about what goes on under the boardwalk? Is there any freedom in love? Is erotic desire a function of body or spirit? What is the best kind of love? Is there such a thing as a soul mate? You will have to face these questions and more when you dare to ask what philosophy can tell you about your lover. Everyone who has experienced it knows that romantic love truly is a "crazy little thing." It keeps us awake at night and makes us do things we would never have dreamed we were capable of. In this volume twenty-five philosophy professors are gathered together to discuss various connections between romantic love and philosophy. They have left their tweed jackets and spectacles behind. It is as though you have run into them by chance at a bar in some far away city where they are at ease, ready to tell you what they really think. Perhaps you have taken a few philosophy classes, or perhaps you always kind of wanted to. This is your chance to enjoy some deep reflection on one of life's greatest mysteries without any of the scholarly jargon, the academic pretenses, or the impossible exams. This volume will explain the lasting value of their ideas in simple, modern terms without the use of a single footnote.
