What does it take to build an iPhone app with stunning 3D graphics? This book will show you how to apply OpenGL graphics programming techniques to any device running the iPhone OS -- including the iPad and iPod Touch -- with no iPhone development or 3D graphics experience required. iPhone 3D Programming provides clear step-by-step instructions, as well as lots of practical advice, for using the iPhone SDK and OpenGL. You'll build several graphics programs -- progressing from simple to more complex examples -- that focus on lighting, textures, blending, augmented reality, optimization for performance and speed, and much more. All you need to get started is a solid understanding of C++ and a great idea for an app. Learn fundamental graphics concepts, including transformation matrices, quaternions, and more Get set up for iPhone development with the Xcode environment Become familiar with versions 1.1 and 2.0 of the OpenGL ES API, and learn to use vertex buffer objects, lighting, texturing, and shaders Use the iPhone's touch screen, compass, and accelerometer to build interactivity into graphics applications Build iPhone graphics applications such as a 3D wireframe viewer, a simple augmented reality application, a spring system simulation, and more

### **Schaum's Outline of XML**

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written- and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-

rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend-ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream- fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of

course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing

### **Patterson's American Education**

In 2008, Barack Obama lobotomized a generation. For an entire year, otherwise clear-thinking members of the most affluent, over-educated, information-drenched generation in American history fell prey to the most expensive, hi-tech, laser-focused marketing assault in presidential campaign history. Twitter messages were machine-gunned to cell phones at mach speed. Facebook and MySpace groups spread across the Internet like digital fire. YouTube videos featuring celebrities ricocheted across the globe and into college students' in-boxes with devastating regularity. All the while, the mega-money-raising engine whirred like a slot machine stuck on jackpot. The result: an unthinking mass of young voters marched forward to elect the most radical and untested president in U.S. history. Recognized as one of the country's top young conservative activists by Human Events, Jason Mattera created an internet sensation with ambush video interviews that exposed clueless young liberals and cunning Democratic officials. Now he reveals the jaw-dropping lengths Barack Obama and his allies in Hollywood, Washington, and Academia went to in order to

transform a legion of iPod-listening, MTV-watching followers into a winning coalition that threatens to become a long-lasting political realignment. *Obama Zombies* uncovers the true, behind-the-scenes story of the methods and tactics the Obama campaign unleashed on youth culture. Through personal interviews and meticulous original research, Mattera explains why conservatism's future rests upon jolting the young masses from their slumber, yanking out their earphones, and sparking a countercultural conservative battle against the rise of the ignorant Left. The lesson from 2008 is crystal clear: When true conservatives run away, Obama zombies come out to play.

### **Reversible Destiny**

Volume 2 of *A Comparative History of Literatures in the Iberian Peninsula* brings to an end this collective work that aims at surveying the network of interliterary relations in the Iberian Peninsula. No attempt at such a comparative history of literatures in the Iberian Peninsula has been made until now. In this volume, the focus is placed on images (Section 1), genres (Section 2), forms of mediation (Section 3), and cultural studies and literary repertoires (Section 4). To these four sections an epilogue is added, in which specialists in literatures in the Iberian Peninsula, as well as in the (sub)disciplines of comparative history and comparative literary history, search for links between Volumes 1 and 2 from the point of view of general contributions to the field of Iberian comparative studies, and assess the entire project that now reaches completion with contributions from almost one hundred scholars.

Can Detective Conan crack the case...while trapped in a kid's body? Jimmy Kudo, the son of a world-renowned mystery writer, is a high school detective who has cracked the most baffling of cases. One day while on a date with his childhood friend Rachel Moore, Jimmy observes a pair of men in black involved in some shady business. The men capture Jimmy and give him a poisonous substance to rub out their witness. But instead of killing him, it turns him into a little kid! Jimmy takes on the pseudonym Conan Edogawa and continues to solve all the difficult cases that come his way. All the while, he's looking for the men in black and the mysterious organization they're with in order to find a cure for his miniature malady. It's summer! Conan and Rachel are invited to Serena's family beach house. Serena's sister has a fiancé with a family beach house next door, who plans to introduce his bride-to-be to his father and brothers that weekend. But plans go awry when Conan witnesses the fiancé killing his father! To add to the confusion, it turns out the suspected murderer is one of three identical triplets! Can Conan figure out who the real murderer is? Is this marriage over before it even begins?

## **Our Boarding House**

Around the year 1400, the poet Christine de Pizan initiated a public debate in France over the literary "truth" and merit of the Roman of the Rose, perhaps the most renowned work of the French Middle Ages.

She argued against what she considered to be misrepresentations of female virtue and vice in the Rose. Her bold objections aroused the support and opposition of some of the period's most famous intellectuals, notable Jean Gerson, whose sermons on the subject are important literary documents. "The Quarrel of the Rose" is the name given by modern scholars to the collection of these and other documents, including both poetry and letters, that offer a vivid account of this important controversy. As the first dual-language version of the "Quarrel" documents, this volume will be of great interest to medievalists and an ideal addition to the Routledge Medieval Texts series. Along with translations of the actual debate epistles, the volume includes several relevant passages from the Romance of the Rose, as well as a chronology of events and ample biography of source materials.

A devoted fashionata and practical New Yorker, Skylar Blackwell doesn't believe in the supernatural-until she inherits Summerwind Mansion. . . . When her uncle is

brutally murdered, and the cops seem uninterested in following up the case, Skylar journeys to California to seek answers. Her search for clues is soon overshadowed by haunting nightmares of a young woman also murdered in the house. Now the inhabitants of Summerwind are mysteriously dying, leaving no evidence as to how or why, and Skylar finds herself in a deadly race against time to expose the killer-before they strike again. Armed with only wit and Pradas, Skylar begins questioning the servants, but the growing list of suspects includes the sexy and brooding caretaker, Dorian Delacroix, a man desperately trying to forget his tragic past. And a major distraction for Skylar. Determined to play detective-instead of the fashion police-and unravel the dark history of the mansion, Skylar is plunged into an otherworldly mystery that not even she can explain away. As the boundaries between reality and dreams blur, Skylar's greatest challenge is to stay alive long enough to learn the truth.

A circuit of the North Atlantic alone in his 24ft sailing boat may have seemed to William Garnier an exciting and natural extension of his sailing ambitions. Almost universally to everyone else it was madness. Relying heavily on the wisdom and kindness of an eclectic yachting community, as well as his own resourcefulness and self belief, 'Big Bloke, Small Boat: voyage of a madman?' honestly records the highs and lows of a bold journey through inexperience and learning in an unfamiliar offshore world. Sun-kissed and carrying a mixed bag of emotions bulging with tales of whales, gales, dolphins, rum and starlit nights, William returned to Cornwall in 2007 after a year long adventure. Who was to call him mad? About the author: William Garnier lives a largely normal life mostly in Cornwall with his partner and a long dog. He doesn't do much sailing now but is learning to surf.

### **Heritage and Archaeology in the Digital Age**

This book examines how computer-based programs can be used to acquire 'big' digital cultural heritage data, curate, and disseminate it over the Internet and in 3D visualization platforms with the ultimate goal of creating long-lasting "digital heritage repositories." The organization of the book reflects the essence of new technologies applied to cultural heritage and archaeology. Each of these stages bring their own challenges and considerations that need to be dealt with. The authors in each section present case studies and overviews of how each of these aspects might be dealt with. While technology is rapidly changing, the principles laid out in these chapters should serve as a guide for many years to come. The influence of the digital world on archaeology and cultural heritage will continue to shape these disciplines as advances in these technologies facilitate new lines of research.

The book is divided into three sections covering acquisition, curation, and dissemination (the major life cycles of cultural heritage data). Acquisition is one of the fundamental challenges for practitioners in heritage and archaeology, and the chapters in this section provide a template that highlights the principles for present and future work that will provide sustainable models for digital documentation. Following acquisition, the next section highlights how equally important curation is as the future of digital documentation depends on it. Preservation of digital data requires preservation that can guarantee a future for generations to come. The final section focuses on dissemination as it is what pushes the data beyond the shelves of storage and allows the public to experience the past through these new

technologies, but also opens new lines of investigation by giving access to these data to researchers around the globe. Digital technology promises significant changes in how we approach social sciences, cultural heritage, and archaeology. However, researchers must consider not only the acquisition and curation, but also the dissemination of these data to their colleagues and the public. Throughout the book, many of the authors have highlighted the usefulness of Structure from Motion (SfM) work for cultural heritage documentation; others the utility and excitement of crowdsourcing as a 'citizen scientist' tool to engage not only trained students and researchers, but also the public in the cyber-archaeology endeavor. Both innovative tools facilitate the curation of digital cultural heritage and its dissemination. Together with all the chapters in this volume, the authors will help archaeologists, researchers interested in the digital humanities and scholars who focus on digital cultural heritage to assess where the field is and where it is going.

### **White Coolies**

Reversible Destiny traces the history of the Sicilian mafia to its nineteenth-century roots and examines its late twentieth-century involvement in urban real estate and construction as well as drugs. Based on research in the regional capital of Palermo, this book suggests lessons regarding secretive organized crime:

its capacity to reproduce a subculture of violence through time, its acquisition of a dense connective web of political and financial protectors during the Cold War era, and the sad reality that repressing it easily risks harming vulnerable people and communities. Charting the efforts of both the judiciary and a citizen's social movement to reverse the mafia's economic, political, and cultural power, the authors establish a framework for understanding both the difficulties and the accomplishments of Sicily's multifaceted antimafia efforts.

### **Umkhonto We Siswe**

Autobiographical record of the experiences of a group of Australian Army nursing sisters who became prisoners of the Japanese in WWII. First published in 1954 and reprinted many times, it describes the deprivation and harsh conditions experienced during imprisonment and also reveals the courage and comradeship and the occasional humorous episodes which occurred. Compiled from the diary written by one of the sisters during their ordeal.

### **Debating the Roman de la Rose**

Spanning centuries and the vastness of the Roman Empire, *The Last Statues of Antiquity* is the first comprehensive survey of Roman honorific statues in the public realm in Late Antiquity. Drawn from a major research project and corresponding online database that collates all the available evidence for the 'statue habit' across the Empire from the late

third century AD onwards, the volume examines where, how, and why statues were used, and why these important features of urban life began to decline in number before eventually disappearing around AD 600. Adopting a detailed comparative approach, the collection explores variation between different regions-including North Africa, Asia Minor, and the Near East-as well as individual cities, such as Aphrodisias, Athens, Constantinople, and Rome. A number of thematic chapters also consider the different kinds of honorand, from provincial governors and senators, to women and cultural heroes. Richly illustrated, the volume is the definitive resource for studying the phenomenon of late-antique statues. The collection also incorporates extensive references to the project's database, which is freely accessible online.
