Atlas of Laparoscopic and Robotic Urologic Surgery E-Book

Advance your surgical expertise with Atlas of Advanced Operative Surgery! This new resource picks up where other surgical references leave off, providing highly visual, step-by-step guidance on more than 100 advanced and complex procedures in both general and subspecialty areas. Visualize every procedure thanks to more than 1,000 illustrations, most in full color - including intraoperative photos, beautifully illustrated color drawings that highlight the relevant anatomy and techniques in specific surgeries, and radiologic images that help you identify variations in anatomy prior to surgery. Grasp each procedure and review key steps quickly with a consistent, highly focused, bulleted format. See the advantages and disadvantages of variations in technique with a Pro/Con section written by expert surgeons. Focus on the advanced practice skills that

are of particular value to those poised to begin practice, as well as surgeons who are already in practice. Benefit from the masterful guidance of Dr. Vijay Khatri, a respected expert and experienced mentor of trainees, junior faculty, and community surgeons. Learn new procedures or refresh your memory on operative details prior to surgery with an easy-to-follow, step-by-step format: pre-operative preparation, operative technique, position, incision, main dissection, closure, alternative technical approaches (with pros/cons), and post-operative care.

Laparoscopic Colorectal Surgery

Comprehensive Video Atlas of Laparoscopic Surgery in Infertility and Gynecology is an extensive video atlas featuring 74 videos which provide instruction on a wide range of laparoscopic procedures. Includes nearly ten hours of video across eight DVDs, with later videos covering special surgery topics such as microsurgery and robotic surgery, and the emerging field of cosmetic gynaecology.

Basic, Advanced, and Robotic Laparoscopic Surgery

The first edition of this superb atlas on surgery of the biliary tract, pancreas, and liver was published nearly 20 years ago. Dr. Cameron has revisited and updated this classic work to include laparoscopic techniques and to demonstrate new procedures and the current status of gastrointestinal surgical procedures. Written for the experienced surgeon, this two-volume work is

beautifully illustrated with anatomical watercolour paintings by co-author Corinne Sandone that elevate the work to a level not seen in other atlases. The goal of this volume is to present the alimentary tract procedures performed - and in some instances initiated - at the Johns Hopkins Hospital in such a fashion that other alimentary tract surgeons can learn these techniques and perform them successfully.

Surgical Atlas of Pancreatic Cancer

Jaypee's Video Atlas of Laparoscopic Surgery

This atlas, containing a wealth of clear operative images, is designed to enable trainee surgeons to visualise the surgical field for procedures specific to laparoscopic colorectal surgery, thereby facilitating understanding and learning of surgical techniques and avoidance of intra- and postoperative complications. Step-by-step guidance is provided for a wide range of procedures employed in patients with benign and malignant tumours, inflammatory bowel disease, diverticular disease, rectal prolapse and other conditions. Examples include right colectomy techniques, sigmoid colectomy, left hemicolectomy, total colectomy, panproctocolectomy, total mesorectal excision, Hartmann's procedure and its reversal and rectopexy. Throughout, meticulous attention is paid to surgical anatomy. Whenever considered necessary, additional line drawings are included to aid comprehension of particular steps in

the surgery. Readers seeking to improve their comprehension of surgical anatomy and how to perform these operative procedures will find the atlas to be an unparalleled source of information and assistance. A complementary book from the same authors focuses on open colorectal surgery.

Atlas of Laparoscopic Surgical Technique

This is a new edition of one of the modern classics of gynecological surgery. Providing an extensive and beautifully illustrated guide to laparoscopic and hysteroscopic techniques, the book has been extensively revised and updated since publication of the Second Edition. There are few texts that so adequately provide in-depth information on minimally invasive gynaecologic surgery. This informative and thorough work of reference provides both practicing surgeons and trainees with an atlas, a textbook of gynecology, and a surgical manual. The coverage is comprehensive, including extensive sections on gynaecologic oncology, urogynecology, basic principles, and instrumentation. Complications are highlighted with authoritative guidance on how to avoid and manage them.

Laparoscopic and Robot-Assisted Surgery in Urology

This new atlas illustrates 42 advanced laparoscopic procedures in general surgery in crisp detail. Inside each chapter, internationally recognized laparoscopic surgeons discuss indications, contraindications,

patient selection factors, and patient preparation considerations. Next, 10 - 15 meticulous pen-and-ink drawings depict the most important steps of the operation along with descriptions including operating room setup, trocar placement. Chapters end with recommendations for postoperative medications, diet, discharge criteria, and guidelines for return to work or normal activities. Encompasses laparoscopic procedures for diagnosis and staging hepatobiliary surgery esophageal surgery stomach surgery surgery of the duodenum, pancreas, and spleen colorectal surgery and hernia repair. Includes 4 different procedures for the laparoscopic management of gastroesophageal reflux disease. Presents 16 different colorectal procedures, each with its own chapter. Uses a concise and consistent outline format to make each procedure easy to understand and reproduce. Extensively illustrated Internationally recognised authors narrate each chapter

Art of Laparoscopic Surgery Textbook and Atlas (2 Vols.)

Atlas of Laparoscopic Retroperitoneal Surgery

The second volume in the series, this video atlas provides surgeons and trainees with the latest information on complications and revisions in bariatric surgery. The videos demonstrate key procedures in bariatric surgery, showing each in a step by step approach to assist learning. Port positions and patient

positioning are explained in depth. Compiled by South Carolina-based surgeon, Rana Pullatt, the atlas is a culmination of technical improvements resulting from thousands of bariatric procedures performed by experienced surgeons worldwide. The other video atlas currently available focuses on bariatric surgery techniques (9789351529354). Key points Video atlas providing latest information on complications and revisions in bariatric surgery Demonstrates all key procedures in a step by step approach Port positions and patient positioning explained in depth Second volume in Video Atlas of Laparoscopic Surgery series

Hinman's Atlas of Urologic Surgery Revised Reprint

Abundantly illustrated, this unique resource offers you comprehensive and authoritative guidance from internationally known experts on the nuances of minimally invasive pediatric surgery. Step-by-step instructions coupled with 350 exquisite full-color illustrations and 200 line drawings help you perfect even the most difficult laparoscopic and thoracoscopic surgeries. Complete coverage of almost all pediatric surgical conditions is provided through laparoscopic approaches, including gastrointestinal, intra-abdominal, and urologic procedures as well as robotic operations, and a variety of thoracoscopic procedures. Plus, a DVD of 34 video clips of key procedures, running three hours in length, demonstrates the newest techniques, such as laparoscopic fundoplication, laparoscopic excision of a choledochal cyst, thoracoscopic aortopexy,

thoracoscopic right lower lobectomy for a CCAM, and the Nuss procedure, to help you hone your skills to accommodate pediatric patients and avoid pitfalls. Provides the very latest information on minimally invasive endoscopic/thoracoscopic approaches on children to broaden your surgical options and minimize recovery times and post-operative complications. Offers you a step-by-step approach to practice-proven techniques so you know exactly how to proceed and what to expect. Includes a three-hour long DVD, containing 34 video clips of key procedures performed by the physicians who pioneered them to help you master your own technique and avoid potential pitfalls. Presents 350 full-color endoscopic views with 200 corresponding line drawings that illuminate every concept and highlight important anatomical details, giving you superb visual guidance. Follows a consistent chapter organization that helps you find what you need fast.

The SAGES Atlas of Robotic Surgery

This atlas provides sequential pictures for most existing reconstructive urology procedures. Though the use of technology is described, the book has been constructed in such a way that urologists from all countries will be able to pick up the technical tips to perform the laparoscopic procedures using simplified devices.

Atlas of Single-Incision Laparoscopic Operations in General Surgery

Buchwald's Atlas of Metabolic & Bariatric Surgical Techniques and Procedures, by leading authority Henry Buchwald, MD, PhD, is the first pictorial atlas that demonstrates today's full range of open and laparoscopic bariatric procedures, as well as concurrent surgeries such as hernia repair and tubal ligation. Hundreds of high-quality photographs and illustrations show you how to achieve the best outcomes and manage any complications that may arise. You'll find coverage of such hot new approaches as laparoscopic electrode placement, alternative open electrode placement, laparoscopic vagal pacing, and alternative open vagal pacing. At www.expertconsult.com you can reference the complete text and illustrations from any computer or mobile device. See how to perform today's full range of open and laparoscopic techniques, as well as concurrent surgeries such as hernia repair and tubal ligation, by viewing hundreds of step-by-step photographs and illustrations. Master hot new procedures such as laparoscopic electrode placement, alternative open electrode placement, laparoscopic vagal pacing, and alternative open vagal pacing. Obtain the best results and avoid complications with expert tips and recommendations from Dr. Henry Buchwald, who has chaired or presided over the Surgical Council of the American College of Nutrition, the Central Surgical Association, the American Society for Bariatric Surgery, and other leading organizations. Reference the complete text and illustrations from any computer or mobile device at www.expertconsult.com. Master all types of bariatric surgeries, as well as concurrent and revisional surgeries with step-by-step visual guidance.

Atlas of Advanced Operative Surgery E-Book

Laparoscopic Liver, Pancreas and Biliary Surgery: Textbook and Illustrated Video Atlas is the perfect learning tool for all surgeons managing patients requiring advanced liver, pancreas and biliary surgery minimally invasively. This highly immersive text and video atlas will provide surgeons from trainee to advanced levels of practice, including, general surgeons, hepato-pacreatico-biliary surgeons, transplant surgeons and surgical oncologists, with a step-by-step, multi-media teaching atlas on performing laparoscopic liver surgery, anatomically correct, safely and effectively. The atlas will teach the surgeons to perform anatomic liver resections of each liver segment expertly and logically, and will cover lobectomies, extended resections, advanced laparoscopic pancreas surgery (including Whipple) and other procedures. A special emphasis is placed on reproducibility of excellence in surgical technique. Each video will be supported by outstanding illustrations for each technique and 3D renderings of the relevant anatomy. The educational step-by step high-definition videos teach everything you need to know, including critical aspects like patient positioning, port placement, dissection and much more. Led by the pioneers in laparoscopic liver, pancreas and biliary surgery, Brice Gayet and Claudius Conrad, the textbook-chapters will be authored by world experts and will contain surgical tips and tricks garnered from their unique experiences, to improve care, management of

complications, relevant society guidelines and excellence in oncologic care for patients with hepato-pancreato-biliary cancers.

Atlas of Single-Port, Laparoscopic, and Robotic Surgery

This atlas presents the principles and techniques of minimally invasive urologic oncological surgery. Divided into three sections, the authors discuss anaesthesia and set up, upper tract surgery and lower tract surgery. Each chapter examines a different urologic oncological procedure, comparing both laparoscopic and robotic methods. Written by renowned experts in the US, this atlas includes more than 500 detailed intra-operative photographs depicting critical sequential procedural steps. Key Features Presents principles and techniques of minimally invasive urologic oncological surgery Three sections discuss anaesthesia and set up, upper tract and lower tract surgery Compares laparoscopic and robotic procedures for numerous urologic oncological conditions Renowned US author and editor team More than 500 intra-operative photographs

Operative Atlas of Laparoscopic Reconstructive Urology

This beautifully illustrated book provides a practical step-by-step guide to all the laparoscopic and hysteroscopic procedures performed by gynecologists. Each procedure is described in detail and fully illustrated with color photographs. The

potential complications are described, and the circumstances in which a procedure is contraindicated are examined. The Third Edition of the "Manual of Laparoscopic and Hysteroscopic Techniques" has been expanded and extensively updated with new chapters including: transvaginal hydrolaparoscopy, laparoscopy radical trachelectomy, laparoscopic abdominal cerclage, and hysteroscopy sterilization. "Manual of Laparoscopic and Hysteroscopic Techniques" is an invaluable resource for busy practicing gynecologists who want to learn step-by-step techniques of a surgical procedure.

Buchwald's Atlas of Metabolic & Bariatric Surgical Techniques and Procedures

Minimally invasive surgery has become the standard treatment for many diseases and conditions. In the last decade, numerous studies have demonstrated that laparoscopic approaches have improved patients' quality of life if compared with standard open procedures. Atlas of Single-Port, Laparoscopic, and Robotic Surgery serves as a guide in single-port, standard laparoscopy, and robotic surgery and shows how novel techniques, such as single-port laparoscopy and robotics, have recently evolved. The atlas illustrates the unique challenges that the new single-port surgery modality presents, including instruments crowding and articulation, and the advanced laparoscopic skills required to perform these procedures, such as the ability to move and control a flexible camera. It also illustrates how to efficiently and safely utilize the robot to perform most

gynecologic procedures. This exceptional resource provides students, residents, fellows, operating room personnel, and practicing gynecologic surgeons with invaluable information about instrumentation, surgical technique, port systems, and the current research and development in robotics.

Atlas of Minimally Invasive Surgical Techniques

Since its introduction in the 1980s, the use of endoscopic surgery in gynecology has grown tremendously, its equipment improved, and methods refined. Today it is clear that the future of gynecologic surgery lies in the realm of minimally invasive techniques. An Atlas of Operative Laparoscopy and Hysteroscopy, Second Edition is not just a how-to-do-the-surgery book, but also a guide to the pathogenesis, pathophysiology, and epidemiology of the urogynecological area. Thoroughly updated to reflect advances in methods and technology, the book covers established techniques such as laparoscopic tubal anastomosis, endometrial ablation, and ovarian surgery, to cite just a few. It pays special attention to emerging procedures and technologies, including the use of robotics and the treatment of carcinoma. Of particular importance is the section on complications, which shows you how to recognize and avoid potential pitfalls. With more than 850 illustrations, most in full color, An Atlas of Operative Laparoscopy and Hysteroscopy, Second Edition is informative and thorough. As a reference, as a text, and as a surgical manual, it provides the grounding in current and

emerging surgical techniques you need to stay at the top of your field.

Video Atlas of Laparoscopic Surgery: Volume Two

This comprehensive book provides the reader a perspective of the current evidence-based management of Laparoscopic Colorectal Surgery. It covers sections on benign surgery for IBD, diverticulitis, rectal prolapse etc. along with the procedures for colon and rectal cancers, including laparoscopic TME. The accompanying videos complement the text imparting specific operative skills of exposure, retraction, countertraction, dissection, vascular control, hemostasis, laparoscopic Stapling, anastomosis, specimen extraction and stoma formation. This book aims to help surgeons to learn, standardize, practice and master the complex skills of Laparoscopic colorectal surgery. Key Features Provides step by step solution to the difficulties encountered by the beginners by covering a section on bugbears. Caters to General, GI, Oncology and Colorectal surgeons who have the adequate basic laparoscopic skills and have already been doing some advanced laparoscopic surgery in form of laparoscopic Upper GI and bowel surgery and would want to start laparoscopic colorectal surgery. Covers a section on Robotic and single incision laparoscopic surgery providing the contemporary knowledge in this emerging field, whereas a section on trans-anal surgery provides a futuristic dimension to this field.

Atlas of Minimally Invasive Surgery in Esophageal Carcinoma

This video atlas contains ten DVDs illustrating step by step laparoscopic procedures performed by reputed colorectal surgeons. Each DVD presents a different procedure, detailing patient position, port position and surgical steps. This collection of DVDs serves as a highly useful reference tool for colorectal surgeons.

Atlas of Pediatric Laparoscopy and Thoracoscopy

Depend on Hinman's for up-to-date, authoritative guidance covering the entire scope of urologic surgery. Regarded as the most authoritative surgical atlas in the field, Hinman's Atlas of Urologic Surgery, 4th Edition, by Drs. Joseph A. Smith, Jr., Stuart S. Howards, Glenn M. Preminger, and Roger R. Dmochowski, provides highly illustrated, step-by-step guidance on minimally invasive and open surgical procedures, new surgical systems and equipment, and laparoscopic and robotic techniques. New chapters keep you up to date, and all-new commentaries provide additional insight from expert surgeons. Features 10 new chapters, including Radical Cystectomy in the Male, Robotic Urinary Diversion, Laparoscopic and Robotic Simple Prostatectomy, Transrectal Ultrasound-Directed Prostate Biopsy, Transperineal Prostate Biopsy, Prostate Biopsy with MRI Fusion, Focal Therapies in the Treatment of Prostate Cancer, Brachy Therapy, Male Urethral Sling, and Botox Injection for Urologic

Conditions. Includes new commentaries in every chapter from today's leading urologists. Offers a step-by-step incremental approach, highlighted by new illustrations, photos, and images. Keeps you current with significant revisions to all female sling chapters, urethroplasty chapters, and more. Helps you find what you need quickly with a clear, easy-to-use format - now reorganized to make navigation even easier.

Laparoscopic Liver, Pancreas, and Biliary Surgery, Textbook and Illustrated Video Atlas

Both the number of pediatric surgeons using minimally invasive surgery (MIS) and the number of operations involving MIS are increasing. This atlas of anatomy and operative techniques provides a thorough outline of the procedures commonly used in laparoscopic and thoracoscopic pediatric surgery. Step-by-step operative photographs are accompanied by explanatory text, and line diagrams are used to highlight the important anatomy as seen endoscopically. Alternative techniques, instruments, and steps are described when appropriate, and attention is drawn to highlights and pitfalls. While each chapter includes some basic background on the condition in question, the focus is very much on the operative procedures. This atlas will be of special benefit to those establishing a laparoscopic practice as well as to those in training who wish to embark on MIS. It will also serve as a supplementary atlas of anatomy and surgical technique for younger surgeons

and medical students.

Atlas of Laparoscopic Urologic Surgery

This text provides a broad and current review of this field and will serve as a valuable resource for trainees, academic and community surgeons, and members of industry with an interest in LESS. Due to the novelty and complexity of these procedures, the book focuses on detailed descriptions as well as pertinent illustrations for various upper and lower tract urologic procedures. The development of novel minimally invasive and robotic technology for more comfortable performance of these demanding procedures is covered. A complete description of instrumentation, platforms, and optics developed specifically for LESS is another primary focus of this text. Finally, a description of outcomes and complications as well as comparative data defining the status of LESS in relation to other current minimally invasive techniques is offered. Atlas of Laparoscopic and Robotic Single Site Surgery will provide a detailed summary of the current status of LESS that will help guide surgical decision making, encourage investigative efforts, and stimulate industry led technology development.

Operative Atlas of Laparoscopic and Robotic Reconstructive Urology

This book comprehensively discusses advanced surgical techniques for pancreatic cancers, including open, laparoscopic and robotic-assisted surgery, as

well as palliative surgery and total meso-pancreas excision. It also features high-resolution illustrations taken from selected clinical cases to enhance the descriptions of the surgical procedures. Providing details of technical issues and commenting on the outcome, it a timely reference resource for pancreatic surgeons, pancreatic physicians, and interns interested in pancreatic cancer surgery.

An Atlas of Operative Laparoscopy and Hysteroscopy, Second Edition

Operative urology has evolved in recent years to include laparoscopic and robot-assisted surgical procedures, which have resulted in significant improvements in quality of life-related outcome. Nevertheless, training methods in urologic laparoscopy and robot-assisted surgery vary considerably, and a structured training scheme is required to enable the modern urologist to adapt to and make optimal use of these techniques. Accordingly, the main goal of this surgical atlas is to guide the urologist carefully through all the standard laparoscopic and robot-assisted procedures. Each procedure is presented in detail with numerous supporting endoscopic images and diagrams. The reader is thereby acquainted with the different surgical steps and will acquire the knowledge necessary for reliable reproduction of the techniques in clinical practice.

Atlas of Pelvic Anatomy and Gynecologic Surgery

Basic, Advanced, and Robotic Laparoscopic Surgery, by Tommaso Falcone, MD and Jeffrey M. Goldberg, MD, is the ideal way to enhance your skills in this key area of gynecologic surgery. In this volume in the Female Pelvic Surgery Video Atlas Series, edited by Mickey Karram, MD, hours of video footage, together with detailed discussions and illustrations, clarify how to most effectively perform a variety of laparoscopic operations and manage complications. Case-based videos take you step by step through endometriosis surgery, myomectomy, hysterectomy, robotic surgery, and more. Case-based videos, narrated by the authors and with a professional voiceover introduction, take you step by step through a variety of procedures including endometriosis surgery, myomectomy, hysterectomy, and robotic surgery. Highly illustrated, quick-reference chapters discuss all of the possible diagnoses for which each procedure is indicated. Case studies describe the clinical history surrounding each case featured in the videos. Step by step, visual guidance for laparoscopic gynecologic procedures

Atlas of Laparoscopy and Hysteroscopy Techniques

This atlas is composed of 28 chapters with authoritative commentaries and illustrations in a number of surgical procedures amenable to laparoscopic techniques. It is hoped that this atlas will simplify and organize surgical thought for the advanced laparoscopist.

Atlas of Operative Laparoscopy and Hysteroscopy, Third Edition

Atlas of Minimally Invasive Surgical Techniques, by Drs. Ashley Haralson Vernon and Stanley W. Ashley, provides the guidance you need to master these procedures - used more frequently due to reduced patient risks, improved outcomes, and rapidly advancing technologies. With discussions of complications of adjustable gastric banding, laparoscopic pancreatico-jejunostomy, endoscopic component separation, minimally invasive esophagectomy, laparoscopic Roux-en-Y gastric bypass, and more; high-quality anatomic line drawings; and procedural videos online at www.expertconsult.com, this volume in the Surgical Techniques Atlas Series delivers all the help you need to stay on the cutting edge of minimally invasive surgery. Watch key surgical techniques performed by experts in procedural videos online at www.expertconsult.com, where you'll also find the fully searchable text and a gallery of downloadable images. Master both laparoscopic and endoscopic techniques with step-by-step instructions for a full range of minimally invasive procedures. See exactly how to perform techniques from 200 detailed anatomic line drawings from laparoscopic and endoscopic perspectives rendered from video still shots that correspond to the accompanying videos. Stay current on the latest developments in minimally invasive surgery, including complications of adjustable gastric banding, laparoscopic pancreatico-jejunostomy, endoscopic component separation,

minimally invasive esophagectomy, and laparoscopic Roux-en-Y gastric bypass. Choose the best procedural option for each patient thanks to coverage of variations on techniques (for example, handsewn gastrojejunal anastomosis as an alternative to the linear stapler technique). Master Minimally Invasive Surgical Techniques with step-by-step instruction and visual guidance

Color Atlas of Pediatric Anatomy, Laparoscopy, and Thoracoscopy

Esophageal cancer remains both a life-threatening disease and an everyday challenge for both patients and surgeons. Controversies regarding its management are prevalent, creating confusion and uncertainties. Preoperative mortality and morbidity, limited overall and disease-free survival, and dismal prognosis make decision making regarding the choice of management difficult. Prof. Puntambekar is an enthusiastic surgeon, full of energy and inspiration. This young colleague offers contemporary possibilities for management of esophageal carcinoma. Prof. Cuesta is an experienced surgeon working in Europe. These two authors have compiled their work in this atlas and enrich the reader with experience encompassing two different continents. This book is an update of novel surgical techniques of combined thoracoscopic and laparoscopic approach in minimally invasive management of esophageal carcinoma. Prof. Puntambekar's outstanding experience and expertise in this field is fully illustrated in this book in a step-by-step description of the operative procedures. This

book should be regarded as a landmark for the surgical management of esophageal carcinoma. The book is distinctive and the technical steps are original, reflecting a deep knowledge of the regional anatomy and a unique ability of visual and operative orientation.

Atlas of Gastrointestinal Surgery

This atlas delivers the most current laparoscopic approaches for diagnosing and treating kidney, adrenal, ureter, and lymph node diseases. It thoroughly reviews instrumentation and basic techniques, including stapling and suturing options, retraction, electrocautery, coagulation/hemostasis, and more. Step-by-step instructions, accompanied by nearly 400 superb original line drawings*all from the surgeon's perspective*clearly illustrate and explain the critical steps for every operation. Provides a detailed chapter on the new laparoscopic donor nephrectomy, including patient preparation, positioning, trocar placement, dissection, bowel retraction, and organ retrieval. Features two complete chapters on increasingly popular radical and simple nephrectomy procedures. Organises procedure chapters consistently by subsections: introduction pre-operative patient preparation OR setup patient positioning trocar placement surgical dissection detailed, illustrated descriptions of the actual surgical procedure postoperative considerations and possible complications. Describes the basic, but important techniques, and reviews new equipment and techniques, including stapling and suture options,

retraction, electrocautery, and coagulation/hemostasis. Includes a complete chapter on complications, presenting a detailed description of how to avoid complications and what to do when they occur.

Atlas of Laparoscopic Urologic Surgery

A step by step description of key laparoscopic procedures with critical stages accompanied by a colour photograph and line drawing to clarify the techniques involved. The common pitfalls associated with each procedure are highlighted and guidance given on how to avoid them.

Atlas of Laparoscopic and Robotic Urologic Oncological Surgery

Ideal not only for the beginners in the field, but also for urologists looking to expand their knowledge, this clearly presented book adopts a useful step-by-step format to present established laparoscopic procedures. Easy and quick to use, the text includes a wealth of illustrations with important instructions, as well as tips and tricks described by experienced laparoscopic surgeons.

Jaypee's Video Atlas of Laparoscopic Colorectal Surgery

The updated edition of Atlas of Pelvic Anatomy and Gynecologic Surgery richly illustrates pelvic anatomy and surgical operations through full-color anatomic

drawings, correlative surgical artwork with step-by-step photographs, and computer-assisted hybrid photo illustrations. Covering a compendium of gynecologic operations, including major and minor procedures and approaches, the techniques described feature a myriad of laparotomy, laparoscopic, robotic, hysteroscopic, vaginal, vulvar and cystoscopic operations. It is a truly comprehensive resource that's well suited for practicing obstetricians-gynecologists, obstetrics-gynecology residents, general surgeons, subspecialists, nurses, and medical students with an interest in gynecology. Half-tone images and four-color clinical photographs aid in comprehending complex anatomic relationships. Comprehensive coverage of conventional and endoscopic surgeries helps you master the full spectrum of surgical procedures. Expert Consult eBook version included with purchase. This enhanced eBook experience offers access to all of the text, figures, videos, and references from the book on a variety of devices. Brand-new chapters include a third chapter on Pelvic Anatomy, A Comprehensive Atlas of Vulvar Disorders, Avoiding and Managing Mesh Complications, and Appropriate Use of Mesh for Pelvic Organ Prolapse. Accessible through Expert Consult, 24 new cadaver dissection videos enhance your knowledge and skills and provide a realistic view. Correlative drawings and full-color illustrations provide the clearest and best visual understanding on the market. New Robotic Surgery chapter authored by Javier Magrina, renowned minimally invasive and robotic gynecologic surgeon.

Laparoscopic Surgery

This book is intended as a definitive, state of the art guide to robotic surgery that summarizes the field for surgeons at all levels. More specifically, its goals are threefold: to review the basics of robotic surgery, including fundamental principles, technology, operating room setup, and workflow; to describe and illustrate the procedures most commonly performed in a robotic operating room; and to discuss key issues relating to cost, adoption, and training. Procedures from many surgical disciplines are included, which will aid robotic surgeons in supervising and assisting colleagues in these disciplines and simultaneously heighten their awareness of the tricks and tools used in other disciplines that can be retasked for their own purposes. In addition, the future prospects for robotic surgery, including anticipated developments in equipment, are discussed. The Textbook and Atlas of Robotic Surgery will be an excellent aid for residents and fellows entering the field, as well as a welcome update on recent progress for practicing robotic surgeons and an ideal primer for senior surgeons adapting these new technologies to their current practice.

Atlas of Laparoscopic Surgery

Atlas of Laparoscopic Surgery

Written by recognized experts in this fast-changing field, this highly practical text by Drs. Jay T. Bishoff,

Louis R. Kavoussi, and David A. Leavitt has been completely revised and greatly expanded to cover what you need to know about today's laparoscopic and robotic technology and techniques. Atlas of Laparoscopic and Robotic Urologic Surgery is a concise, thorough, superbly illustrated reference, perfect for learning new techniques or briefly reviewing before a case. You'll be guided through today's best minimally invasive approaches using new surgical systems and equipment, including third- and fourth-generation robotic devices. Step-by-step illustrations, tips and tricks, and information on complications helps you sharpen your skills in this high-demand area. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Twenty brand-new chapters on camera and lens systems, instrumentation, the da Vinci surgical system, pyelo/ureterolithotomy, robotic-assisted and laparoscopic simple prostatectomy, and more. Completely revised and updated chapters on laparoscopic partial nephrectomy and endoscopic inguinal lymph node dissection for penile cancer. Cutting-edge topics including matured techniques for nephron sparing surgery, state-of-the-art nerve sparing for radical robotic prostatectomy, innovative approaches to treat ureteral strictures, up-to-date surgical care of malignancies, and novel pediatric surgeries.

Atlas of Laparoscopic and Robotic Single Site Surgery

This atlas presents an extensive collection of single-

incision laparoscopic operations in general surgery performed from 2008 to 2013 in Shengjing Hospital of China Medical University. 2000 operations are reported in it. All the figures in it were collected using real time recordings of the operations which will be particularly interesting to the readers. In each specific surgery, authors provide its key surgical steps, complications and management and contraindication. This atlas is intended for clinical surgeons who can evolve these operations soon after reading about them. Patients will also benefit from this book because of the combination of minimal invasiveness and cosmetic effect of single-incision laparoscopic surgery.

Art of Laparoscopic Surgery

This updated title is the ideal reference book for residents and fellows, with step-by-step pictures and only the essential prose. The major part of the book is illustrated with magnificent photographs and diagrams depicting every step of a particular procedure. Instruments are clearly shown and have been photographed from both outside and inside the body. Chapters demonstrate accepted laparoscopic techniques that are the new gold standard in urology. Outcome analyses show that with laparoscopy one can achieve the same oncologic success as with open surgery but will less morbidity.

Atlas of Laparoscopic Gastrectomy for Gastric Cancer

his comprehensive and highly clinical approach to laparoscopic surgery describes common and advanced procedures, and experimental techniques. Written by some of the world's foremost authorities, this text covers instrumentation, diagnostic modalities, and surgical techniques. It is also the first to discuss potential complications. Highly visual with full color illustrations throughout, the reader is presented with a realistic view of laparoscopic surgical procedures

Comprehensive Video Atlas of Laparoscopic Surgery in Infertility and Gynecology

Due to recent advances in laparoscopic gastrectomy for gastric cancer, a high-resolution atlas in this field was felt necessary. This book describes the laparoscopic surgical procedure and precautions of lymph node (LN) dissection, comprehensively. The details of preoperative preparation, regional LN dissection, and digestive tract reconstruction are introduced based on a large numbers of clinical cases. Modified intracorporeal anastomosis procedure and clinical application of indo cyanine green (ICG) in LN dissection are included. This atlas will be of benefit to gastrointestinal surgeons, surgical oncologists, and minimally invasive surgeons.

Lower Gastrointestinal Tract Surgery: Vol.1, Laparoscopic procedures

Table of Contents - 1. Basic Techniques - Access

(Transperitoneal, Retroperitoneal), Retraction, Closure, Staples, Clip Applicators. 2. Laparoscopic Suturing. 3. Simple Nephrectomy Transperitoneal. 4. Radical Nephrectomy Transperitoneal. 5. Radical Nephrectomy Retroperitoneal. 6. Nephroureterectomy. 7. Partial Nephrectomy. 8. Donor Nephrectomy. 9. Hand Assist Nephrectomy - Radical, Simple, Donor. 10. Renal Biopsy. 11. Nephropexy. 12. Calyceal Diverticulum. 13. Renal Cyst Decortication - Simple Cyst, Autosomal Dominant Polycystic Disease. 14. Pyeloplasty. 15. Adrenalectomy. 16. Retroperitoneal Lymph Node Dissection. 17. Pelvic Lymph Node Dissection - Limited, Extensive. 18. Prostatectomy Preperitoneal Approach. 19. Prostatectomy Transperitoneal Approach. 20. Cystectomy - Ileal Conduit, Neobladder. 21. Diverticulectomy. 22. Laparoscopic Sacroculpopexy. 23. Laparoscopic Varicocelectomy. 24. Cryptorchidism. 25. Varicocele Ligation. 26. Treatment of Complications - Vascular, Gastrointestinal, Thoracic.
