“Lorraine Heath’s books are always magic.” —Cathy Maxwell With Passions of a Wicked Earl, USA Today and New York Times bestseller Lorraine Heath kicks off a new series of delightfully sinful historical romance novels featuring “London’s Greatest Lovers.” The first romantic adventure involving the titled and rakish sons of a scandalous Dowager Duchess and their tales of passion, pleasure, and love, Passions of a Wicked Earl concerns the innocent and unfairly disgraced young wife of the first brother and her brazen attempts to win back the dashing rogue’s heart...by any means necessary!

The old adage of buy low and sell high works, but it is not that cut and dry in today's market. This is especially the case when self-storage is selling for a premium. It is daunting competing for facilities with large, well funded operators and REITS. This book will show you the three step process to successfully purchase self-storage today, even in large markets where the REITS are active, and provide all the resources you will need. By the end of this tutorial you will possess the essential tools to effectively find, analyze risk, and compete with the larger players. You will not only have the knowledge to BUY facilities, but BUY them in a way that fulfills your pre-determined parameters and business plan. Mark Helm, CCIM explains in detail how he did just that, and with very limited startup funds. As the economy improves and more people use self-storage, it is going to be more important than ever to know how to effectively compete with large well funded operators in purchasing facilities.

The gripping true story of Angelina Jolie, from #1 New York Times bestselling biographer Andrew Morton. "I like to collect knives," says Angelina Jolie, "but I also collect first edition books." At first glance, she might seem to be someone without any secrets, talking openly about her love life, sexual preferences, drug use, cutting, and tattoos--and why she kissed her brother on the lips in public. And yet mysteries remain: What was really going on in her brief, impulsive marriages to

Jonny Lee Miller and Billy Bob Thornton, and what was going on in her partnership with Brad Pitt? What's behind the oft-reported feud with her father, the Oscar-winning actor Jon Voight? What drove her to become a mother of six children in six years? And—perhaps most puzzling of all—what about the other side of Angelina: How did this talented but troubled young actress, barely 35 years old, become a respected Goodwill Ambassador for the United Nations as well as the "most powerful celebrity in the world" (unseating Oprah Winfrey) on Forbes' 2009 Celebrity 100 list? The answers that Andrew Morton has uncovered are astonishing, taking us deep inside Angelina's world to show us what shaped her as a child, as an actress, and as a woman struggling to overcome personal demons that have never before been revealed. In this spellbinding biography, Andrew Morton draws upon far-reaching original interviews and research, accompanied by exclusive private photographs, to show us the true story behind both the wild excesses of Angelina's youth and her remarkable work with children and victims of poverty and disaster today.

Jimmy Bullard may not have had the perfect hair-do, his Granada Ghia may not have been the flashiest of cars, and he definitely didn't have a string of Page 3 girls trying to sell kiss and tell stories about him to the tabloids. But what he has in spades is a genuine love for The Beautiful Game that few of his peers can match. One of the last graduates from football's old school, Jimmy actually worked in the real world - including as a painter and decorator - before turning pro. Maybe that's why he played football with a smile on his face, always says what's on his mind, and is no stranger to a spot of mischief. Having played under the likes of Barry Fry,

Engineering Thermodynamics with Applications

This is the single best book ever written on data quality. Clear, concise, and actionable. We all want to leverage our data resources to drive growth, but we too often ignore the fundamentals of data quality, which almost always inhibits our success. Tom lays out a clear path for each organization to holistically improve not only its data quality, but more importantly the performance of its business as a whole. —Jeffrey G. McMillan, Chief Analytics and Data Officer, Morgan Stanley This book lays out the roles everyone, up and down the organization chart, can and must play to ensure that data is up to the demands of its use, in day-in, day-out work, decision-making, planning, and analytics. By now, everyone knows that bad data extorts an enormous toll, adding huge (though often hidden) costs, and making it more difficult to make good decisions and leverage advanced analyses. While the problems are pervasive and insidious, they are also solvable! As Tom Redman, “the Data Doc,” explains in *Getting in Front on Data*, the secret lies in

getting the right people in the right roles to “get in front” of the management and social issues that lead to bad data in the first place. Everyone should see himself or herself in this book. We are all both data customers and data creators—after all, we use data created by others and create data used by others. And all of us must step up to these roles. As data customers, we must clarify our most important needs and communicate them to data creators. As data creators, we must strive to meet those needs by finding and eliminating the root causes of error. Getting in Front on Data proposes new roles for data professionals as: embedded data managers, in helping data customers and creators complete their work, DQ team leads, in connecting customers and creators, pulling the entire program together, and training people on their new roles, data maestros, in providing deep expertise on the really tough problems, chief data architects, in establishing common data definitions, and technologists, in increasing scale and decreasing unit cost. Getting in Front on Data introduces a new role, the data provocateur, the motive force in attacking data quality properly! This book urges everyone to unleash their inner provocateur. Finally, it crystallizes what senior leaders must do if their entire organizations are to enjoy the benefits of high-quality data! Data quality has always been important. But now, in the growing digital economy where business transactions and customer experiences are automated and tailored, data quality is critical. This book comes just in time. —Maria C. Villar, Global Vice President, SAP America, Inc. Winning, and more importantly thriving, in the digital age requires more than stating “Data is a strategic corporate asset.” Leaders and organizations

need a plan of action to make the new vision a reality. Tom's latest book is a how-to for those seeking that reality. —Bob Palermo, Vice President, Performance Excellence, Shell Unconventionals Many, if not most, companies still struggle with their data. With his latest offering, Tom Redman sets out a path they can follow to Get in Front on Data. Based on his decades of experience working with many companies and individuals, this is the most practical guide around. A must read for data professionals, and especially data “provocateurs”. —Ken Self, President IAIDQ This book offers a unique perspective on how to think about data and address Data Quality - offering practical guidance and useful instruction from the perspective of each stakeholder. The process - and processes - to go from business need to having the right quality data to address that need is no small task. —John Nicodemo, Global Leader, Data Quality, Dun & Bradstreet Getting in Front on Data is a clearly written survival handbook for the new data-driven economy. It is a “must read” for the employees of any organization expecting to remain relevant and competitive. The “Data Doc” has an extraordinary talent for explaining key concepts with simple examples and understandable analogies making it accessible to everyone in their organization regardless of their role. —John R. Talburt, Director of the Information Quality Graduate Program University of Arkansas at Little Rock
