### **Qué pasa**

On February 16 2016, motorcycle adventurer Charley Boorman suffered a major road traffic accident in Portugal. Having spent the better part of his life on some form of motorbike, his world came crashing down after he was knocked off a Triumph Tiger Explorer, smashing his right ankle and causing severe damage to his left fibia and tibia. It was unclear if he would ever walk properly again, let alone ride a motorbike. Moving between past and present, Long Way Back recounts Charley's journey back of recovery, the ambulance ride, the numerous operations in a Portuguese hospital, the medivac aircraft flight back to London. In alternating chapters, as his inability to walk for several months provokes introspection, Boorman recounts his childhood, where his passion for motorbikes began, and the formative influences in his life - from his father, a touring film director, to his long-time friend Ewan McGregor, and Sean Connery's son Jason, who first introduced him to bikes. As Charley struggles to cope with this potentially life-changing situation, it is these touchstones who will give him strength on the long way back

to health.

### **BMW GS: Adventure Motorcycles**

Moto-journalist Clement Salvadori has been riding motorcycles since the age of 15 and traveling all of his life, accumulating well over a million miles in the saddle across more than 70 countries on six continents. No Thru Road covers 30 different trips he has taken, to places like Afghanistan and Zimbabwe, since his first ride through western Europe in 1957. The stories are all original, though the subject may have appeared as a magazine article in a very different rendition. The book will appeal to adventure-travel enthusiasts and to motorcyclists and travelers of all persuasions. Adventurous riders will thoroughly appreciate the book, as in the description of kick-starting a 500cc single - never easy to do - at 17,200 feet in the Tibetan Himalayas. Or going up to Cape Tribulation in Australia's Queensland in 1974 when the only access was via a once-a-week ferry across the Daintree River. Or riding a bike to Pamplona, Spain, in 1960 in order to run with the bulls. Activists who want to get on their motorcycles and ride down into Mexico's Copper Canyon will enjoy the book, as will the arm-chair traveler who is happy reading about traveling from Peru's Great Ica Desert over the Andes Mountains to the Amazon basin. Clement's adventures are arranged so the reader can open the book to any chapter, be it India, Nepal, the Sahara, New Zealand or Viet Nam, and not have to worry about following a thread. Lots of adventures, lots of good reading, lots of

photos and illustrations. This book promises excellent entertainment and a glimpse into life as a moto-journalist.

### **Bodies in Motion**

Back in 2010, a new custom motorcycles scene was born in Europe. Hugo Jézégabel and Fred Jourden both decided to quit their salaried lives, Hugo as a landscape designer and Fred as head of marketing for an online company by day and a mechanic by night. Together they created the Paris-based garage 'Blitz Motorcycles', dreaming of building beautiful and unique custom motorcycles only upon commission. This book charts their journey and incarnates their global philosophy. Featuring the most iconic pictures of their adventure, it reveals both the motorcycles they've built and the road trips they've undertaken, amid the backdrop of the most incredible scenery Europe has to offer.

### **The Street Riding Years**

This book is an anthology of motorcycle stories. These 50 stories were submitted to me over a 13-year period by a wide range of motorcyclists from all walks of life. These authors tell their own personal stories of what happened to them as they rode their motorcycles. Among these writers are a few professionals who made

some of their works available to me early in their careers. They now have books of their own. Some tales are very short, and some are very long. I've tried to mix them up. You may find the stories of some authors grouped together. Each tale was intensively edited to provide a good reader experience. You'll find humor, risk-taking, adventures, poetry, rhyming verse, 2-up excursions, world travelers, stupid tricks on bikes, lessons learned, winter riding perils, hazards while riding, and stories told by returning riders. I wrote five of these stories. Two of my stories relate my experiences on my motorcycle trips. Two stories are fictional children's stories that involve fantasy and motorcycles. The last story is a short fictional tale that describes an alternate world of motorcycles. Got a better original tale? Send it to me for consideration in a possible sequel.

The Art of BMW: 90 Years of Motorcycle Excellence presents stunning studio portraiture of the rolling sculpture that BMW has been creating for the past 90 years. Each bike portrait is accompanied by a concise, authoritative profile of the machine. All the classic bikes are here—pre-World War II BMWs like the R5 that defined performance in that era; the military R12 that carried the Wehrmacht as it blitzkrieged its way across Europe; the R75M that accompanied Rommel's Panzers in North Africa; the Earles-forked R69S that offered the perfect platform for mounting a Steib sidecar; the R90S café racer; the K1 "flying brick"; and the GS (Gelände Sport) series that launched a dual-sport revolution. All the bike families are covered—the side-valve machines from the early years, the early overhead-valve performance bikes, the postwar Airheads and Oilheads, the four-cylinder and six-cylinder touring bikes, the early pushrod singles, the modern overhead-cam singles, the latest parallel twins, and inline-four cylinder sport bikes. From the first model, the R32 that launched BMW's motorcycle dynasty, to the latest (and fastest) model, the World Super Bike dominating S1000RR, this book captures nearly a century of motorcycling excellence.

## **Long Way Back**

Plenty of retirees take a holiday. When Brian Rix retired after 36 years as a policeman in Victoria rather than hitching up the caravan, he put his wife, journalist Shirley Hardy-Rix, on the back of his motorcycle and headed off for a ride. For the next 16 months Brian and Shirley rode more than 83,000 kilometres through 32 countries on five continents with side trips to Antarctica and Galapagos Islands. They rode from the bottom of South America to the very top of North

America. They rode over the Andes, sometimes more than 5,000 metres high. They rode through deserts, the tropics and up to Alaska. They had a catastrophic breakdown in the heart of bear country and suffered altitude sickness. The motorcycle didn't make it to Antarctica but they did - taking them from Antarctica Circle to the Arctic Circle and then a bit more. Beautifully illustrated in full colour throughout, Circle to Circle is an engaging account of the travels of an adventurous couple. It will entertain you in your armchair, or it may even inspire you to get up and go! Praise for Brian & Shirley's previous book, Two for the Road Makes you want to get up and go. - Australian Women's Weekly Few books are as inspirational as that just written by Melbourne journalist Shirley Hardy-Rix and her policeman husband Brian Rix. - Herald Sun For bikers and those with itchy feet. - Sunday Age The inspiring story of two middle-aged adventurers. - Manly Daily A great read for anyone with a yearning for the open road and exotic climes. - West Australian A must-read for adventurous hearts. - Canberra Times For anyone who's ever dreamed of escaping and experiencing the romance of the open road. - Inverell Times This book might tip undecided travellers over the edge - no bad thing. - Two Wheels

### **The Complete Book of BMW Motorcycles**

In 1982, at the age of just twenty-three and halfway through her architecture studies, Elspeth Beard left her family and friends in London and set off on a 35,000-mile solo adventure around the world on her 1974 BMW R60/6. Reeling from a recent breakup and with only limited savings from her pub job, a tent, a few clothes and some tools, all packed on the back of her bike, she was determined to prove herself. She had ridden bikes since her teens and was well travelled. But nothing could prepare her for what lay ahead. When she returned to London nearly two and a half years later she was stones lighter and decades wiser. She'd ridden through unforgiving landscapes and countries ravaged by war, witnessed civil uprisings that forced her to fake documents, and fended off sexual attacks, biker gangs and corrupt police convinced she was trafficking drugs. She'd survived life-threatening illnesses, personal loss and brutal accidents that had left permanent scars and a black hole in her memory. And she'd fallen in love with two very different men. In an age before email, the internet, mobile phones, satnavs and, in some parts of the world, readily available and reliable maps, Elspeth achieved something that would still seem remarkable today. Told with honesty and wit, this is the extraordinary and moving story of a unique and life-changing adventure.

### **The Fool's Progress**

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
