A Service-Book For Public Worship

From dirt bikes and jet skis to weed wackers and

snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Masquerading as a man, seeking adventure, going to war or to sea for love and glory, the transvestite heroine flourished in all kinds of literature, especially ballads, from the Renaissance to the Victorian age. *Warrior Women and Popular Balladry, 1650-1850* identifies this heroine and her significance as a figure in folklore, and as a representative of popular culture, prompting important reevaluations of gender and sexuality. Dugaw has uncovered a fascination with women cross-dressers in the popular literature of early modern Europe and America. Surveying a wide range of Anglo-American texts from popular ballads and chapbook life histories to the comedies and

tragedies of aristocratic literature, she demonstrates the extent to which gender and sexuality are enacted as constructs of history.

A Shadows on the Gulf

This is the fourth edition of the classic text for students of urban and regional planning. It gives a historical overview of the developments and changes in the theory and practice of planning, throughout the entiretwentieth century. This extensively revised edition follows the successful format of previous

editions. Specific reference is made to the most important British developments in recent times, including the devolution of Scotland, Wales and Northern Ireland, the establishment of the Mayor of London and the dominant urban sustainability paradigm. Planning in Western Europe, since 1945, now incorporates new material on EU-wide issues as well as updated country specific sections. Planning in the United States since 1945, now discusses the continuing trends of urban dispersal and social polarisation, as well as initiatives in land use planning and transportation policies. The book looks at the nature of the planning process at the end of the twentieth century and looks forward to the twenty-first century.
