A groundbreaking look at the connection between germs and mental illness, and how we can protect ourselves. Is it possible to catch autism or OCD the same way we catch the flu? Can a child's contact with cat litter lead to schizophrenia? In her eye-opening new book, National Book Critics Circle Award-winning author Harriet Washington reveals that we can in fact "catch" mental illness. In *Infectious Madness*, Washington presents the new germ theory, which posits not only that many instances of Alzheimer's, OCD, and schizophrenia are caused by viruses, prions, and bacteria, but also that with antibiotics, vaccinations, and other strategies, these cases can be easily prevented or treated. Packed with cutting-edge research and tantalizing mysteries, *Infectious Madness* is rich in science, characters, and practical advice on how to protect yourself and your children

from exposure to infectious threats that could sabotage your mental and physical health.

### **The Musical Times**

Beginning with Charlie Chaplin's *Shoulder Arms*, released in America near the end of World War I, the military comedy film has been one of Hollywood's most durable genres. This generously illustrated history examines over 225 Army, Navy and Marine-related comedies produced between 1918 and 2009, including the abundance of laughspinners released during World War II in the wake of Abbott and Costello's phenomenally successful *Buck Privates* (1941), and the many lighthearted service films of the immediate postwar era, among them *Mister Roberts* (1955) and *No Time for Sergeants* (1958). Also included are discussions of such subgenres as silent films (*The General*), military-academy farces (*Brother Rat*), women in uniform (*Private Benjamin*), misfits making good (*Stripes*), anti-war comedies (*MASH*), and fact-based films (*The Men Who Stare at Goats*). A closing filmography is included in this richly detailed volume.
