This book is targeted to the millions who work with energy and the chakras, and it aims at giving you a scientific explanation to that ancient knowledge passed on to our generation throughout the centuries by the Masters. I, in fact, make a comparison with the discoveries of a scientist and nuclear physicist named Massimo Corbucci and the ancient knowledge that we use every day. I found it amazing to discover that the atom is made of seven colors, exactly the same as the chakras and in the same order as the chakras! The scientific explanations given about past lives, symbols, the power of thought, and being able to move in time and space are extraordinary. It continues with A Spiritual Path starting in Sae Babas Ashram in India and follows with extraordinary experiences on the Himalayas with His Holiness, the Dalai Lama, for the Kalachakra ceremony. Regressions in three past lives are described as well as those past lives seen by psychics. A large section is dedicated to my direct regressions into past lives, three directly experienced, and others viewed or seen by different psychics. It continues with The vibrations of prayers and The Mystery of the Senegalese Brooch and some very recent experiences with the Entities.

The feminist campaign against pornography, the furor over a racial epithet in the O. J. Simpson trial, and Iran's continuing threat to kill Salman Rushdie exemplify the intense passions aroused by hurtful speech. Richard Abel offers an original framework for understanding and attempting to resolve these pervasive and intractable conflicts. Drawing on sociological theories of symbolic politics, he views such confrontations as struggles for respect among status categories defined by nationality, religion, race, gender, sexual orientation, and physical difference. Abel convincingly exposes the inadequacies of the conventional responses to speech: absolutist civil libertarianism and enthusiastic state regulation. Instead, he argues, only apologies exchanged within the communities that construct collective identities can readjust social standing damaged by hurtful words and images. In recasting the problem in terms of equalizing cultural capital, Abel opens a new pathway through the wrongs and rights of speech.
