Are you trying to find love – and beginning to suspect you're not looking in the right place? This wise, hip guide gives you a new map for the journey to happiness in relationships of all kinds, starting in your own heart. Told from the alternating vantage points of authors Meggan Watterson and Lodro Rinzler, *How to Love Yourself (and Sometimes Other People)* reminds us that love isn't something we have to earn. All of us are deeply and intrinsically worthy of love – not only the love we hope to receive from others, but the love we give to ourselves – and this book offers the insight and practical tools we need to stay firmly grounded in self-love as we ride out the natural (and often stormy) cycles of relationships. Meggan and Lodro's unique perspectives as teachers and scholars of Christian mysticism and Buddhism respectively make for a rich and lively dialogue that draws on wisdom sources like the Gospel of Mary Magdalene and the Four Noble Truths, along with funny, revealing stories from their own love lives and their deep friendship with each other. You'll find guidance for embracing single life, dating with an open heart, and thriving in lasting love; meditations and practices for calm abiding, "disciplined hope," and connecting to the source of love within you; and tips on everything from sex, self-worth, and nourishing friendships to navigating breakups and learning to truly love yourself. Ultimately, you'll be able to see your ideal partner in a new light – not as someone who "completes" you, but as someone who mirrors back to you your own wholeness.

First published in 1529, Martin Luther's "The Small Catechism" was written for the education of children in religious doctrine. It reviews The Ten Commandments, The Lord's Prayer, the Sacraments of Baptism, the Alter and the Eucharist, along with other important religious and biblical tenets in a clear, concise and easy to understand format. It has long been considered as one of Martin's most important writings and is seen as an authoritative text on the beliefs of the Lutheran Church. "The Small Catechism" was required reading for confirmation into the church for centuries. Luther distilled the Church's teachings down to their most essential elements so that pastors and parents alike can pass the Lutheran doctrine and tradition down to the next generation. Remarkable for its wealth of information in a condensed and accessible form, Luther's masterpiece of religious instruction has continued to provide guidance and answers to both the young and old. "The Small

Catechism" remains an important and essential addition to any collection of religious literature, as well as a useful and practical daily prayer book for families and churches. This edition is printed on premium acid-free paper.

In *Brain Rules*, Dr. John Medina, a molecular biologist, shares his lifelong interest in how the brain sciences might influence the way we teach our children and the way we work. This comparative historical study of econometrics focuses on the development of econometric methods and their application to macroeconomics. The analysis covers the origins of modern econometrics in the USA and Europe during the 1920's and 30's, the rise of 'structural estimation' in the 1940's and 50's as the dominant research paradigm, and the crisis of the large macroeconomic models in the 1970's and 80's. The completely original feature of this work is the use of previously unknown manuscript material from the archives of the Cowles Commission and other collections. The history so constructed shows that recent debates over methodology are incomplete without understanding the many deep criticisms that were first raised by the earliest researchers in the field.
