IGCSE Biology

In this book, originally published in 1980, John Argenti deliberately and systematically strips away the sophisticated methods for corporate planning to get down to a practical corporate planning process that works. This accessible book uses no jargon or maths, and will be of interest to students of management and business studies. It is also aimed at chief executives, managing directors and other very senior executives in companies and non-profit-making organisations.

The Vietnam era was a time of turmoil and change in the United States, one of anger and anguish for some; especially among young men facing a call up for military service. Writings about this time have focused mostly on the protest viewpoint. But not everyone who went to Vietnam did so against their will. Many were proud to fight for their country, especially the early war cadre of troops, mostly in the Marine Corps, who were all volunteers. It was what they had joined up and trained for, and they were determined to do their duty wherever it took them. The name of the place did not matter, what mattered was that the Corps told them to go. *WE MARINES*, is the authors experience in the military from age seventeen to twenty-three. A young man who wanted to be a Marine, and served in peace time, the Cuban Crisis, and Vietnam. He didn't mind going into combat with his buddies, and when his overseas rotation was up volunteered a second time to stay with them. *WE MARINES*, deals with our involvement in Vietnam in 1965-66 offering a personal view of the war and its aftermath too often ignored, until now. It is written especially for his family and those who were there.

Scientist, citizen, artist-the Renaissance man of India Homi Jehangir Bhabha, one of India's outstanding scientists, shouldered the beginnings of India's nuclear programme. He was the first chairman of India's Atomic Energy Commission, and the builder of two of India's most significant scientific institutions-the Tata Institute of Fundamental Research and the Atomic Energy Establishment, renamed Bhabha Atomic Research Centre in 1966. A Masterful Spirit presents the life and achievements of the man through previously unpublished letters, and photographs and paintings, and the recollections of his family, friends, colleagues and students. Designed to convey the flavour of Bhabha's life and times, this book tells the inspiring story of a man whom Sir C.V. Raman described as 'the modern equivalent of Leonardo da Vinci'. It acquaints us with the many facets of Bhabha's personality: physicist, institution-builder, concerned citizen, artist, connoisseur of the arts, designer of gardens and, above all, a charismatic and compassionate human being.

My Seventy Years on the Chatham Islands

Those familiar with the author's previous forays into the world of Hong Kong Cinema and Spaghetti Westerns will know pretty much what to expect here, and it falls far short of any dictionary definition of "essential". Short, cursory capsule reviews, short on insight, style and cultural context and high on typographical and factual errors, accompanied by an arbitrary star rating from one to four. The main virtue of Weisser's self-published book is its rigorously completist approach. Even though it states that it is not the aim to include every single film from Japan ever released, with separate editions available for a more complete look at Horror, Science Fiction and Fantasy, and Sex Films, and one planned for animation ("pleae check our subsiquent books" [sic], Weisser writes in the intro for the fourth edition), this initial volume certainly covers a lot of films and does give quite a good indication as to how much is actually out there.

To the Nines will introduce you to a whole new golfing experience by sharing the stories of nineteen nine-hole layouts across the country. Fenwick, Katherine Hepburn's playground, dates back to the 1890s. Just before a hurricane destroyed her family home in 1938, Hepburn aced Fenwick's ninth hole and shot even par. Long before Mike Keiser set out to turn a chunk of Oregon coast into one of the world's great golf destinations, he built The Dunes Club, easily the finest nine-hole course of the modern era. To the Nines will send you on a mission to discover the roots of the game, and to seek out your own unique and unheralded courses. This second edition includes recent renovations and rebunkering of several of these classic "nines" as well as a chapter on a newly built course.

Practical Corporate Planning

We Marines

"Green Infrastructure Implementation provides actionable information that promotes the implementation of green infrastructure. Unlike most publications, which focus on technical design of individual green elements, this book tackles topics that relate directly to the ability to implement green infrastructure. The collection of programmatic and planning topics is unique in current literature, and covers a range of issues from stormwater to public education. Green Infrastructure Implementation identifies obstacles and provides guidance in possible approaches to overcoming them at the programmatic level. It also provides clear and actionable suggestions as to the selection and planning of green infrastructure at different scales and identifies considerations for implementation based on type of practice and specific geographic considerations. Each topic details an assessment of barriers and potential challenges and includes case studies that show how they can be addressed"--Provided by publisher.

Decision Making At The Top

This textbook--an abridged version of Radford's Minimalist Syntax and the Syntax of English--provides a concise and accessible introduction to current syntactic theory, drawing on the key concepts of Chomsky's Minimalist Programme. Assuming little or no prior grammatical knowledge, it takes students through a range of topics in English syntax, beginning at an elementary level and progressing in stages towards more advanced material. There is an extensive glossary, and each chapter contains a workbook section with 'helpful hints', exercises and model answers, suitable for both class discussion and self-study.
