## Historic Documents of 2000

Proceedings of the November 1999 symposium which focused on the development of embedded systems. Examples of high-assurance embedded applications are flight control systems, medical surgery equipment, military command systems, vehicle braking components, pacemakers, traffic-light control systems, and satellites. The major topics of the 24 papers are evaluation and testing, fault analysis, reliable communications, frameworks, systems and tools, metrics and modeling, and the use of UML in designing high assurance systems. Case studies analyze the results of applying the latest research to real systems. Three practical experience reports, and 11 summaries from three panel discussions round out the volume. No subject index. Annotation copyrighted by Book News, Inc., Portland, OR.

## Going Faster!

Save time and money in building, marketing and promoting your business With huge recent shifts in the way enterprises are built, marketed, and monetized, these are "wild west" times for business. In this new landscape, entrepreneurs and small business owners actually have an edge in marketing without spinning their wheels or going broke. Smarter, Faster, Cheaper gives you an innovative, approachable new guide on how to market, promote and improve your business drawing on real world examples and offering practical advice as opposed to fluffy theory. It presents a complete roadmap for marketing and promoting your business with the latest techniques. Draws from author David Siteman Garland's extensive experiences as a successful entrepreneur Based on countless interviews with successful leaders, including conversations with entrepreneurs and owners of businesses large and small Strategies and ideas are easy to understand, digest, and immediately put to use From learning when to skimp and when to splurge to mastering the art of online schmoozing, Smarter, Faster, Cheaper will save you time, money, and aggravation whether you're building your tenth business or your first.

### **Superfund Research and Development**

Volume 29 in the Historic Documents series collects about 100 important documents that provide primary source research information on some of the major issues of the year. Introductory essays discuss major events as reflected in the legislation, speeches, court decisions, official statements, news conferences, essays, and reflections that made history, including the problems encountered in attempting to establish peace in the Middle East, as well as the national elections. Arranged chronologically, the documents are accompanied by explanatory introductions that provide context and background information and, when relevant, a report on continuing developments during the year. Annotation c. Book News, Inc., Portland, OR (booknews.com).

## **Live Your Life for Half the Price**

The industrial revolution, mechanization, water and steam power, computers, and automation have given an enormous boost to manufacturing productivity. "Faster, Better, Cheaper" in the History of Manufacturing shows how the ability to make products faster, better, and cheaper has evolved from the stone age to modern times. It explains how different developments over time have raised efficiency and allowed the production of more and better products with less effort and materials, and hence faster, better, and cheaper. In addition, it describes the stories of inventors, entrepreneurs, and industrialists and looks at the intersection between technology, society, machines, materials, management, and – most of all – humans. "Faster, Better, Cheaper" in the History of Manufacturing follows this development throughout the ages. This book covers not only the technical aspects (mechanization, power sources, new materials, interchangeable parts, electricity, automation), but organizational innovations (division of labor, Fordism, Taylorism, Lean). Most of all, it is a story of the people that invented, manufactured, and marketed the products. The book shows how different developments over time raised efficiency and allowed production of more with less effort and materials, which brought us a large part of the wealth and prosperity we enjoy today. The stories of real inventors and industrialists are told, which includes not only their successes but also their problems and failures. The effect of good or bad management on manufacturing is a recurring theme in many chapters, as is the fight for intellectual property through thrilling tales of espionage. This is a story of successes and failures. It is not only about technology but also about social aspects. Ultimately, it is not a book about machines but about people!

## **Apollo, Challenger, Columbia**

Financial meltdown, a deep recession, and political polarization—combined with strong growth outside the United States—have led to a global bubble of pessimism surrounding America’s economic prospects. Bloated with debt, and outpaced by China and other emerging markets, the United States has been left for dead as an economic force. But in this time of grim predictions, Daniel Gross, Yahoo! financial columnist and author of *Dumb Money*, offers a refreshingly optimistic take on our nation’s economic prospects, examining the positive trends that point to a better, stronger future. Widely respected for his *Newsweek* and *Slate* coverage of the crash and the recovery, Daniel Gross shows that much of the talk about decline is misplaced. In the wake of the crash, rather than accept the inevitability of a Japan-style lost decade, America’s businesses and institutions tapped into the very strengths that built the nation’s economy into a global powerhouse in the first place: speed, ingenuity, adaptability, pragmatism, entrepreneurship, and, most significant, an ability to engage with the world. As the United States wallowed in self-pity, the world continued to see promise in what America has to offer—buying exports, investing in the United States, and adopting American companies and business models as their own. Global growth, it turns out, is not a zero-sum game. *Better, Stronger, Faster* is an account of the remarkable reconstruction and reorientation that started in March 2009, a period that Gross compares to March 1933—as both marked the start of unexpected recoveries. As the U.S. public sector undertook aggressive fiscal and monetary actions, the private sector sprang into action. Companies large and small restructured, tapped into long-dormant internal resources, and invested for growth, at home and abroad. Between 2009 and 2011, as Europe struggled with a cascade of crises, the U.S. got back on its feet—and began to run. Through stories of innovative solutions devised by policy makers, businesses, investors, and consumers, Gross explains how America has the potential to emerge from this period, not as the unrivaled ruler of the global economy but as a healthier leader and an enabler of sustainable growth.

## **Space Development and Cooperation Among All Pacific Basin Countries**

This book is a distillate of rich teaching and industry experience of the authors, and has been designed to help academicians and software professionals in varied roles--project managers, IS managers, business heads, entrepreneurs, etc. It will be equally useful to students of management and computer applications.

Americans young and old are flunking their finances. A shocking 77 percent live paycheck to paycheck with no savings. And 43 percent of Americans have less than \$10,000 saved for retirement, while 49 percent could cover less than one month's expenses if they lost their income. In the face of this bleak financial picture, bestselling author and finance expert Mary Hunt offers 7 Money Rules for Life®. This no-nonsense and encouraging book gives readers the keys to get their money under control and get prepared financially for the rest of their lives. In her warm and engaging style, Hunt takes everything that she's learned over the past twenty years and boils it all down. Presented in a conversational style and readable in a weekend, this book offers applications for each of the seven rules as well as practical advice for how to recover from past financial mistakes. These simple, unchanging, basic rules work in every financial situation, for every income level, and for every stage of life. Money mastery isn't really that hard. 7 Money Rules for Life® can help readers change their futures from uncertain to rock-solid with principles they can apply right away.

Phillip K. Tompkins' book provides unparalleled longitudinal insight into the organizational successes and failures of NASA. In focusing on organizations in trouble, Tompkins identifies ten "communication transgressions."

## **Faster, Better, Cheaper**

Assessment of Mission Size Trade-offs for NASA's Earth and Space Science Missions addresses fundamental issues of mission architecture in the nation's scientific space program and responds to the FY99 Senate conference report, which requested that NASA commission a study to assess the strengths and weaknesses of small, medium, and large missions. This report evaluates the general strengths and weaknesses of small, medium, and large missions in terms of their potential scientific productivity, responsiveness to evolving opportunities, ability to take advantage of technological progress, and other factors that may be identified during the study; identifies which elements of the SSB and NASA science strategies will require medium or large missions to accomplish high-priority science objectives; and recommends general principles or criteria for evaluating the mix of mission sizes in Earth and space science programs. Assessment of Mission Size Trade-offs for NASA's Earth and Space Science Missions considers not only scientific, technological, and cost trade-offs, but also institutional and structural issues pertaining to the vigor of the research community, government-industry university partnerships, graduate student training, and the like.

## **Brandweek**

**BRAIN PRESCRIPTIONS THAT REALLY WORK** In this breakthrough bestseller, you'll see scientific evidence that your anxiety, depression, anger, obsessiveness, or impulsiveness could be related to how specific structures in your brain work. You're not stuck with the brain you're born with. Here are just a few of neuropsychiatrist Dr. Daniel Amen's surprising--and effective--"brain prescriptions" that can help heal your brain and change your life: To Quell Anxiety and Panic: Use simple breathing techniques to immediately calm inner turmoil To Fight Depression: Learn how to kill ANTs (automatic negative thoughts) To Curb Anger: Follow the Amen anti-anger diet and learn the nutrients that calm rage To Conquer Impulsiveness and Learn to Focus: Develop total focus with the "One-Page Miracle" To Stop Obsessive Worrying: Follow the "get unstuck" writing exercise and learn other problem-solving exercises

## **Beyond Workplace 2000**

This complete racer's reference is the perfect resource for all drivers from novice to expert. The fundamentals of fast driving are revealed in this definitive how-to book for racers. You will find the competition-proven methods of instructors and of professional drivers that will give you the know-how to work up the track and stay at the front. Interested in the world of racing? Just think, you can have all of the lessons and insights from Skip Barber instructors and from professional racers compiled in one handbook. This racing reference reveals the secrets of mastering car control, reducing lap times, as it takes the reader inside the world of racing. *Going Faster!* is the definitive book for the active race driver, the racer-to-be, and the auto-racing fan who wants to know what driving a racecar is really about.

Software engineering is of major importance to all enterprises; however, the key areas of software quality and software process improvement standards and models are currently geared toward large organizations, where most software organizations are small and medium enterprises. Software Process Improvement for Small and Medium Enterprises: Techniques and Case Studies offers practical and useful guidelines, models, and techniques for improving software processes and products for small and medium enterprises, utilizing the authoritative, demonstrative tools of case studies and lessons learned to provide academics, scholars, and practitioners with an invaluable research source.

## **36th AIAA/ASME/SAE/ASEE Joint Propulsion Conference & Exhibit: 2000-3600 - 2000-3649**

Your fool-proof guide to paying off debt, planning for the future, and breaking free of our debt-loving culture. The consumer credit industry wants us to believe that debt is necessary to bridge the gap between our pitiful incomes and the lifestyles we desire. But the problem is not that we don't have enough money. It's that we don't know how to manage the money we already have. And until we learn that, more money will never be enough. In this life-changing book, Mary Hunt shows you how to live a rich, fulfilling life without any consumer debt. By applying her simple principles and specific methods, you will learn how to effectively manage and maximize the money you have. No more guessing, wondering, or worrying. Just peace and a more abundant life. What have you got to lose?

## **Smarter Faster Better**

## **Smarter, Faster, Cheaper**

### **New Statesman**

### **Debt-Proof Living**

NEW YORK TIMES BESTSELLER • From the author of *The Power of Habit* comes a fascinating book that explores the science of productivity, and why managing how you think is more important than what you think—with an appendix of real-world lessons to apply to your life. At the core of *Smarter Faster Better* are eight key productivity concepts—from motivation and goal setting to focus and decision making—that explain why some people and companies get so much done. Drawing on the latest findings in neuroscience, psychology, and behavioral economics—as well as the experiences of CEOs, educational reformers, four-star generals, FBI agents, airplane pilots, and Broadway songwriters—this painstakingly researched book explains that the most productive people, companies, and organizations don't merely act differently. They view the world, and their choices, in profoundly different ways. A young woman drops out of a PhD program and starts playing poker. By training herself to envision contradictory futures, she learns to anticipate her opponents' missteps—and becomes one of the most successful players in the world. A group of data scientists at Google embark on a four-year study of how the best teams function, and find that how a group interacts is more important than who is in the group—a principle, it turns out, that also helps explain why *Saturday Night Live* became a hit. A Marine Corps general, faced with low morale among recruits, reimagines boot camp—and discovers that instilling a “bias toward action” can turn even the most directionless teenagers into self-motivating achievers. The filmmakers behind Disney's *Frozen* are nearly out of time and on the brink of catastrophe—until they shake up their team in just the right way, spurring a creative breakthrough that leads to one of the highest-grossing movies of all time. What do these people have in common? They know that productivity relies on making certain choices. The way we frame our daily decisions; the big ambitions we embrace and the easy goals we ignore; the cultures we establish as leaders to drive innovation; the way we interact with data: These are the things that separate the merely busy from the genuinely productive. In *The Power of Habit*, Pulitzer Prize-winning journalist Charles Duhigg explained why we do what we do. In *Smarter Faster Better*, he applies the same relentless curiosity, deep reporting, and rich storytelling to explain how we can improve at the things we do. It's a groundbreaking exploration of the science of productivity, one that can help anyone learn to succeed with less stress and struggle, and to get more done without sacrificing what we care about most—to become smarter, faster, and better at everything we do.

"This book explains the role of earth observation satellite initiatives to meet information needs. It details the importance of

the space infrastructure to deliver IT capabilities such as mobile broadband Internet and mobile communication connectivity; it also offers a review of how space technology can influence the future of IT architecture in health, education, logistics, business, and accounting"--Provided by publisher.

## **Assessment of Mission Size Trade-offs for NASA's Earth and Space Science Missions**

In the face of today's environmental and economic challenges, doomsayers preach that the only way to stave off disaster is for humans to reverse course: to de-industrialize, re-localize, ban the use of modern energy sources, and forswear prosperity. But in this provocative and optimistic rebuke to the catastrophists, Robert Bryce shows how innovation and the inexorable human desire to make things Smaller Faster Lighter Denser Cheaper is providing consumers with Cheaper and more abundant energy, Faster computing, Lighter vehicles, and myriad other goods. That same desire is fostering unprecedented prosperity, greater liberty, and yes, better environmental protection. Utilizing on-the-ground reporting from Ottawa to Panama City and Pittsburgh to Bakersfield, Bryce shows how we have, for centuries, been pushing for Smaller Faster solutions to our problems. From the vacuum tube, mass-produced fertilizer, and the printing press to mobile phones, nanotech, and advanced drill rigs, Bryce demonstrates how cutting-edge companies and breakthrough technologies have created a world in which people are living longer, freer, healthier, lives than at any time in human history. The push toward Smaller Faster Lighter Denser Cheaper is happening across multiple sectors. Bryce profiles innovative individuals and companies, from long-established ones like Ford and Intel to upstarts like Aquion Energy and Khan Academy. And he zeroes in on the energy industry, proving that the future belongs to the high power density sources that can provide the enormous quantities of energy the world demands. The tools we need to save the planet aren't to be found in the technologies or lifestyles of the past. Nor must we sacrifice prosperity and human progress to ensure our survival. The catastrophists have been wrong since the days of Thomas Malthus. This is the time to embrace the innovators and businesses all over the world who are making things Smaller Faster Lighter Denser Cheaper.

## **Planetology And Earth From Space**

The author of Workplace 2000 provides a new blueprint for the companies of tomorrow, along with survival information for working Americans who find themselves at the center of change. Beyond Workplace 2000 explains how the company of the future will be less mechanistic and more organic, interacting continuously with its environment and its customers and thriving on chaos and non-stop change.
