“I’ve totally washed away the dream of having one more child.” “I had never intended to be a stay-at-home-parent, but the cost of child care turned me into one.” “We had to pull our toddler out of his program because we couldn’t afford to have two kids in high-quality care.” These are not the voices of those down on their luck, but the voices of America’s middle class. The lack of affordable, available, high-quality childcare is a boulder on the backs of all but the most affluent. Millions of hard-working families are left gasping for air while the next

generation misses out on a strong start. To date, we've been fighting this five-alarm fire with the policy equivalent of beach toy water buckets. It's time for a bold investment in America's families and America's future. There's only one viable solution: Childcare should be free.

recommendations in this book, he or she will be able to claim the maximum allowable deductions and pay the lowest possible federal taxes. Since the previous edition of Family Child Care Record-Keeping Guide, Congress and the IRS have made many changes to tax rules that affect family child care providers. There have been changes in depreciation rules, adjustments to food and mileage rates, and clarifications on how to calculate the Time-Space percentage. Author Tom Copeland has been involved in many IRS audits and represented providers in several Tax Court cases that have also clarified numerous rules. Further necessitating this ninth edition, the IRS issued two significant new rules in 2013. These updates, new rules, and clarifications are detailed in this book; all of the information is applicable to child care providers in every state, regardless of local regulations. Tom Copeland, is a writer, trainer, lawyer, and consultant focusing on family child care business issues. He has conducted record-keeping, tax preparation, and business workshops for family child care providers across the country since 1981.

This innovative study examines the development of institutional childcare from 1878 to 1929, based on a comparison of two "sister" orphanages in Pittsburgh: the all-white United Presbyterian Orphan's Home and the all-black Home for Colored Children. Drawing on quantitative analysis of the records of more than 1,500

children living at the two orphanages, as well as census data, city logs, and contemporary social science surveys, this study raises new questions about the role of childcare in constructing and perpetrating social inequality in the United States.

In this compelling volume, distinguished educators tackle a frequently asked question about multicultural education: How do I teach about racial and cultural diversity if all my students are white? The authors propose seven learning themes to help young white children resist messages of racism and build identity and skills for thriving in a multicultural country and world. The text includes strategies, resources, and classroom examples for implementing the learning themes in early

childhood settings. Taking multicultural education to a new level, this practical guide places the development of white children's racial identity in the context of the historical construction of "whiteness" and racism in America, and suggests strategies for nurturing a new white identity as the starting place for anti-bias/multicultural work with children. It includes activities for families and staff, reflection questions, a review of white anti-racism activists, lists of suggested children's books, and organizational and website resources.

The instant New York Times bestseller! An NPR Book of the Year From the author of Expecting Better, an economist's guide to the early years of parenting. "The book is jam-packed with information, but it's also a delightful read because Oster is such a good writer." --NPR With Expecting Better, award-winning economist Emily Oster spotted a need in the pregnancy market for advice that gave women the information they needed to make the best decision for their own pregnancies. By digging into the data, Oster found that much of the conventional pregnancy wisdom was wrong. In Cribsheet, she now tackles an even greater challenge: decision-making in the early years of parenting. As any new parent knows, there is an abundance of often-conflicting advice hurled at you from doctors, family,

friends, and strangers on the internet. From the earliest days, parents get the message that they must make certain choices around feeding, sleep, and schedule or all will be lost. There's a rule--or three--for everything. But the benefits of these choices can be overstated, and the trade-offs can be profound. How do you make your own best decision? Armed with the data, Oster finds that the conventional wisdom doesn't always hold up. She debunks myths around breastfeeding (not a panacea), sleep training (not so bad!), potty training (wait until they're ready or possibly bribe with M&Ms), language acquisition (early talkers aren't necessarily geniuses), and many other topics. She also shows parents how to think through freighted questions like if and how to go back to work, how to think about toddler discipline, and how to have a relationship and parent at the same time. Economics is the science of decision-making, and Cribsheet is a thinking parent's guide to the chaos and frequent misinformation of the early years. Emily Oster is a trained expert--and mom of two--who can empower us to make better, less fraught decisions--and stay sane in the years before preschool.

A Monster Under Alex's Bed

Winner of the 2014 Richard Kalish Innovative Publication Award presented by the Gerontological Society of America Young working mothers are not the only ones who are struggling to balance family life and careers. Many middle-aged American women face this dilemma as they provide routine childcare for their grandchildren

while pursuing careers and trying to make ends meet. Employment among middle-aged women is at an all-time high. In the same way that women who reduce employment hours when raising their young children experience reductions in salary, savings, and public and private pensions, the mothers of those same women, as grandmothers, are rearranging hours to take care of their grandchildren, experiencing additional loss of salary and reduced old age pension accumulation. Madonna Harrington Meyer's *Grandmothers at Work*, based primarily on 48 in-depth interviews conducted in 2009-2012 with grandmothers who juggle working and minding their grandchildren, explores the strategies of, and impacts on, working grandmothers. While all of the grandmothers in Harrington Meyer's book are pleased to spend time with their grandchildren, many are readjusting work schedules, using vacation and sick leave time, gutting retirement accounts, and postponing retirement to care for grandchildren. Some simply want to do this; others do it in part because they have more security and flexibility on the job than their daughters do at their relatively new jobs. Many are sequential grandmothers, caring for one grandchild after the other as they are born, in very intensive forms of grandmothering. Some also report that they are putting off retirement out of economic necessity, in part due to the amount of financial help they are providing their grandchildren. Finally, some are also caring for their frail older parents or ailing spouses just as intensively. Most expect to continue feeling the pinch of paid and unpaid work for many years before their retirement. *Grandmothers at Work* provides a unique perspective on a

phenomenon faced by millions of women in America today.
