The African Charter on the Rights and Welfare of the Child

This book provides a conceptual framework for children's rights as well as specific strategies and opportunities for social workers to apply in their work. It guides social work professionals and students through the history of children's rights. It also includes a call for a paradigm shift from a focus on the right to nurturance to the right to self-determination, as well as a contrasting look at children's rights in the West versus the rest of the world.

Aboriginal Child Welfare, Self-Government and the Rights of Indigenous Children

Citizenship is a phenomenon that encompasses the relationships between the state and individuals, rights and responsibilities and identity and nationhood. Yet the relationship between citizenship and childhood has gone relatively unexplored. This book examines this relationship by situating it within the historical development of modern forms of citizenship that have formed contemporary Western notions of childhood and citizenship. The book also engages with recent political and social theory to rethink our current view of citizenship and develops an understanding that emphasises social interdependence and calls for a concomitant re-evaluation of our public spaces that facilitates the recognition of children as participating agents within society. The book will be of interest to those working across a wide number of disciplines, including politics, sociology,

education, health, social work, childhood studies, youth studies, law and social policy, together with policy-makers, teachers and practitioners in allied areas.

Children, Rights, and the Law

Describing more than 190 leading cases and including probing commentaries and recent statistics, this provocative book is a unique tool that shows how the American legal system affects children.

Children's Rights in Ghana

The authors of this volume provide discussion on vital issues related to the rights of children in the United States, including: the historical and contextual perspective on the rights of children; the United Nations Convention on the Rights of the Child; the differing views on children's rights and competencies; and the rights of children within the family, the social service system, the health care system, the educational system, the juvenile justice system and in employment.

The New Handbook of Children's Rights

Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, *Understanding Child Abuse and Neglect*, which provided an overview of the research on child abuse and neglect. *New Directions in Child Abuse and Neglect Research* updates the 1993 report and provides new recommendations to respond to this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. *New Directions in Child Abuse and Neglect Research* recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. *New Directions in Child Abuse and Neglect Research* identifies four areas to look to in developing a coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response.

The Welfare State in Post-Industrial Society

In recent years, major social forces such as: ageing populations, social trends, migration patterns, and the globalization of economies, have reshaped social

welfare policies and practices across the globe. Multinational corporations, NGOs, and other international organizations have begun to influence social policy at a national and local level. Among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation-states to effect policies that are beneficial to them on a local level. With contributions from thirteen countries worldwide, this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state. *The Welfare State in Post-Industrial Society* is divided into two major sections: the first draws from a number of leading social welfare researchers from diverse countries who point to the nation-state as case studies; highlighting how it goes about establishing and revising social welfare provisions. The second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship, ageing and marketization. *The Welfare State in Post-Industrial Society* seeks to encourage debate about the implications of the most pressing social welfare issues in nation-states, and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations.

The Routledge Handbook of Global Child Welfare

A timely examination of the plight of children and youths in developing nations. The chapters strike a balance between diagnostic analysis of the conditions of risk, with prescriptive ideas for approaching and intervening with marginalized children.

Children's Rights and Refugee Law

An historical perspective on the children's rights movement traces its evolution from colonial times to the present

The Routledge Handbook of Global Child Welfare

Following the implementation of the Human Rights Act 1998, awareness has increased that we live in a rights-based culture and that children constitute an important group of rights holders. Now in its third edition, *Children's Rights and the Developing Law* explores the way developing law and policies in England and Wales are simultaneously promoting and undermining the rights of children. It reflects on how far these developments take account of children's interests, using current research on children's needs as a template against which to assess their effectiveness and considering a broad range of topics, including medical law, education and youth justice. A critical approach is maintained throughout, particularly when assessing the extent to which the concept of children's rights is being acknowledged by the courts and policy makers and the degree to which the UK fulfils its obligations under, for example, the UN Convention on the Rights of the Child.

Implementing Article 3 of the United Nations Convention on the Rights of the Child

Children's Rights in Namibia

Child Welfare Systems and Migrant Children examines where, why and to what extent immigrant children are represented in the child welfare system in different countries. These countries include Australia/New Zealand, Belgium/the Netherlands, England, Estonia, Canada, Finland, Italy, Germany, Spain, Norway, and the United States--all of them having different child welfare philosophies and systems as well as histories and practices in immigration. By comparing policies and practices in child welfare systems (and welfare states), especially in terms of how they conceptualize and deal with immigrant children and their families, we address an immensely important and pressing issue in modern societies. Immigrants in the child welfare system are a critical issue and they seem to face serious challenges that are evident across countries. These are challenges related to lack of language proficiency, lack of knowledge about cultural and social aspects and about the public systems of the destination country. Perhaps most relevantly, the challenges may include collisions of ideas and beliefs about how to raise children, about children's place in the family and society, and about children's rights.

Human Rights in Child Protection

The Convention on the Rights of the Child (CRC), which was adopted unanimously by the United Nations General Assembly in 1989, marked a turning point in the perception of children in international law and policy. Although it was hoped that the Convention would have a significant and positive impact on the lives of all children, this has not happened in many parts of the world. This edited volume, based on empirical research and Non-Governmental Organisation project data, explores the progress of the Convention on the Rights of the Child, and to a lesser extent, the African Charter on the Rights and Welfare of the Child, in nine African countries in the 25 years since it was adopted by the UN General Assembly. The book considers the implementation of the Convention both in terms of policy and practice, and its impact on the lived experiences of children in societies across the continent, focusing on specific themes such as HIV/AIDS, education and disability, child labour, witchcraft stigmatisation, street children, parent-child relationships and child participation. The book breaks new ground in blending legal and social perspectives of the experiences of children, and identifies concrete ways forward for the better implementation of the CRC treaty in the various political contexts that exist in Africa.

Children's Lives in an Era of Children's Rights

This volume addresses the contentious and topical issue of aboriginal self-government over child welfare. Using case studies from Australia and Canada, it discusses aboriginal child welfare in historical and comparative perspectives and critically examines recent legal reforms and changes in the design, management and delivery of child welfare services aimed at securing the 'decolonization' of aboriginal children and families. Within this context, the author identifies the limitations of reconciling the conflicting demands of self-determination and sovereignty and suggests that international law can provide more nuanced and

culturally sensitive solutions. Referring to the UN Declaration on the Rights of Indigenous Peoples, and the UN Convention on the Rights of the Child, it is argued that the effective decolonization of aboriginal child welfare requires a journey well beyond the single issue of child welfare to the heart of the debate over self-government, self-determination and sovereignty in both national and international law.

Children's Rights Law in the Global Human Rights Landscape

The 1989 International Convention on the Rights of the Child (CRC) and the 1990 African Charter on the Rights and Welfare of the Child (ACRWC) are two major international treaties protecting minors. Each treaty gives rise to new perspectives on children's rights, and enshrine the principles of the best interests of the child and of children's ownership of rights. The ACRWC incorporates the CRC's rights while taking into consideration the specificity of the African context, striving to balance the rule of law with local customs. This book seeks to illustrate the rights and duties enshrined in the ACRWC, as well as the responsibilities established therein regarding the protection of minors. The role of the African Committee of Experts on the Rights and Welfare of the Child (ACERWC) will also be examined, in particular its activity of monitoring the States Parties' implementation of the ACRWC and its institutional powers in exercising its powers. Finally, the book will analyse the progress made by the States Parties to the treaties. The focus will be both on the formal aspect of harmonizing national legal systems and the international rights, and on the substantive "steps required" of States Parties to reach the "opinion of law or necessity" that the ACRWC's provisions should be perceived, first and foremost, as necessary and socially useful, as well as legally binding.

Nobody's Children

This book presents an integral, cross-cultural reflection on the social reality of children's rights and citizenship, giving an insight into new perspectives on the history and different concepts of children's rights in a contextualized and localized manner.

Children's Rights and International Development

Offering a serious and sustained philosophical examination of children's rights, David Archard provides a clear and accessible introduction to the topic. The second edition is fully revised and updated and include a new preface and two new chapters.

Children's Rights

In the context of the increasing global movement of people and a growing evidence base for differing outcomes in child welfare, Routledge Handbook of Global Child Welfare provides a compelling account of child welfare, grounded in the latest theory, policy and practice. Drawing on eminent international expertise, the book offers a coherent and comprehensive overview of the policies, systems

and practices that can deliver the best outcomes for children. It considers the challenges faced by children globally, and the difference families, services and professionals can make. This ambitious and far-reaching handbook is essential reading for everyone working to make the world a better and safer place for children.

Children

Child Welfare Systems and Migrant Children

Provides the foundation for casework practice in Child Protective Services (CPS). Describes the basic stages of the CPS process and the steps necessary to accomplish successfully each stage: intake, initial assessment/investigation, family assessment, case planning, service provision, and evaluation of family progress and case closure. Designed primarily for CPS caseworkers, supervisors, and administrators. Glossary. Bibliography.

The Children's Rights Movement

The UN Convention on the Rights of the Child is acknowledged as a landmark in the development of children's rights. Article 3 makes the child's best interests a primary consideration in all actions concerning children and requires States Parties to ensure their care and protection. This volume, written by experts in children's rights from a range of jurisdictions, explores the implementation of Article 3 around the world. It opens with a contextual analysis of Article 3, before offering a critique of its implementation in various settings, including parenting, religion, domestic violence and baby switching. Amongst the themes that emerge are the challenges posed by the content of 'best interests', 'welfare' and 'well-being'; the priority to be accorded them; and the legal, socioeconomic and other obstacles to legislating for children's rights. This book is essential for all readers who interact with one of the Convention's most fundamental principles.

A Right to Childhood

In the context of the increasing global movement of people and a growing evidence base for differing outcomes in child welfare, Routledge Handbook of Global Child Welfare provides a compelling account of child welfare, grounded in the latest theory, policy and practice. Drawing on eminent international expertise, the book offers a coherent and comprehensive overview of the policies, systems and practices that can deliver the best outcomes for children. It considers the challenges faced by children globally, and the difference families, services and professionals can make. This ambitious and far-reaching handbook is essential reading for everyone working to make the world a better and safer place for children.

Age Discrimination And Children's Rights

Children make up half of the world's refugees and over 40 per cent of the world's

asylum seekers. However, children are largely invisible in historical and contemporary refugee law. Furthermore, there has been very limited interaction between the burgeoning children's rights framework, in particular the Convention on the Rights of the Child (CRC), and the 1951 Convention relating to the Status of Refugees (Refugee Convention). This book explores the possibility of a children's rights approach to the interpretation of the Refugee Convention and within that what such an approach might look like. In order to construct a children's rights approach, the conceptualisations of children outside the legal discipline, within international children's rights law and then within refugee law and refugee discourse are analysed. The approach taken is socio-legal and comparative in nature and the suitability of the Refugee Convention as a framework for the interpretation of child claims is examined. The book analyses to what extent the Refugee Convention is capable of dealing with claims from children based on the modern conceptualisation of children, which is underscored by two competing ideologies: the child as a vulnerable object in law to be protected and the child as subject with rights and the capacity to exercise their agency. The influence each regime has had on the other is also analysed. The work discusses how a children's rights approach might improve outcomes for child applicants. The book makes an original contribution to child refugee discourse and as such will be an invaluable resource for academics, researchers and policymakers working in the areas of migration and asylum law, children's rights and international human rights law.

The African Charter on the Rights and Welfare of the Child

Argues that the current system of adoption in the United States is not in the best interest of the children

Child Rights Education for Inclusion and Protection

Originally presented as the author's thesis (doctoral)--University of Cambridge, 2013.

From Father's Property to Children's Rights

What's Wrong with Children's Rights

Children's rights law is often studied and perceived in isolation from the broader field of human rights law. This volume explores the inter-relationship between children's rights law and more general human rights law in order to see whether elements from each could successfully inform the other. Children's rights law has a number of distinctive characteristics, such as the emphasis on the 'best interests of the child', the use of general principles, and the inclusion of 'third parties' (e.g. parents and other care-takers) in treaty provisions. The first part of this book questions whether these features could be a source of inspiration for general human rights law. In part two, the reverse question is asked: could children's rights law draw inspiration from developments in other branches of human rights law that focus on other specific categories of rights holders, such as women, persons with disabilities, indigenous peoples, or older persons? Finally, the interaction between

children's rights law and human rights law – and the potential for their isolation, inspiration or integration – may be coloured or determined by the thematic issue under consideration. Therefore the third part of the book studies the interplay between children's rights law and human rights law in the context of specific topics: intra-family relations, LGBTQI marginalization, migration, media, the environment and transnational human rights obligations.

Children's Rights in Intercountry Adoption

This book provides an essential one-stop introduction to the key concepts, issues, policies and practices affecting child welfare, with particular emphasis on the changing nature of the relationship between child welfare and social policy. No other book brings together such a wide selection of material to form an attractive and indispensable teaching and learning resource. Child welfare and social policy provides readers with an historical overview of child welfare in England and Wales; high quality contributions from leading authorities in the field; discursive introductions to each section that set individual chapters in the broader context of childhood studies and case study material to bring discussions to life. Key topics covered include morality and child welfare; relations between law, medicine, social work, social theory and child welfare; children's rights and democratic citizenship and children as raw material for 'social investment'. Child welfare and social policy is invaluable reading for students and academics in social policy, sociology, education and social work. It is also a useful resource for health and social work professionals wishing to follow current debates in theory and practice.

Representing Parents in Child Welfare Cases

The recent exponential increase in the number of custody disputes due to divorce, adoption, surrogate motherhood, and artificial insemination makes child custody one of the most hotly debated issues in America today. From Fathers' Property to Children's Rights seeks to clarify fundamental questions about the rights of children and parents in our society through a unique and provocative analysis of child custody in the United States from colonial times to the present. The book gracefully combines historical and legal scholarship in an unusually rich perspective on the history of children and their parents. Mason consistently draws on this history to illuminate contemporary issues - the current emphasis on biological parenthood, the proliferation of reproductive technologies, and the growing use and misuse of the social sciences. The author presents crucial periods of change in social attitudes and the law regarding child custody: the adaptation of English common law in the colonial period, the move toward maternal preference and child welfare in the early twentieth century, the advent in the 1970s of no-fault divorce and joint custody, and the growing influence of the social sciences, especially psychology, in contemporary custody disputes. Mason connects these transformations to the changing status of women with respect to culture, law, and politics. In the nineteenth century the political crusade for women's property rights and the cult of motherhood favored the woman in custody battles. In our time Mason shows that the move away from maternal preference toward equal custodial rights was promoted by feminists' struggle for equal political rights and a new theory of equal parenting supported by social scientists. Based on extensive research in case law, legislation, and social history, Mason's timely analysis of

current child custody issues is a must for professionals as well as for those interested in family and social history, legal and women's studies, and child welfare in America.

Children's Rights from Below

Using the Convention on the Rights of the Child as a framework, issues such as child trafficking, child soldiers and child maltreatment are examined in nations around the world, as well as efforts to solve these problems.

Child Welfare Law and Practice

This chapter provides a brief overview of the book highlighting the modest progress from child welfare to child well-being reflected in these chapters, and the parallel movement in Kahn's career and research, as his scholarship developed over the years. It then moves to explore the relationship between two overarching themes, child and family policy stressing a universal approach to children and social protection stressing a more targeted approach to disadvantaged and vulnerable individuals including children and the complementarity of these strategies. Introduction To a large extent Alfred J. Kahn was at the forefront of the developments in the field of child welfare services (protective services, foster care, adoption, and family preservation and support).

Overtime his scholarship moved to a focus on the broader policy domain of child and family policy and the outcomes for child wellbeing. His work, as is true for this volume, progressed from a focus on poor, disadvantaged and vulnerable children to a focus on all children. He was convinced that children, by definition, are a vulnerable population group and that targeting all children, employing a universal policy as a strategy would do more for poor children than a narrowly focused policy targeted on poor children alone. As we first argued more than three decades ago (Not for the Poor Alone; "Universalism and Income Testing in Family Policy"), one could target the most disadvantaged within a universal framework, and this would lead to more successful results than targeting only the poor.

Child Welfare and Social Policy

This book covers the children's rights movement and the rights of parents. It examines the implications of children's rights for policy and practice with particular reference to children with disabilities and children in the care of protective services.

Child Protective Services

The new edition of this well established handbook provides up-to-date information on a topic of increasing importance across a range of disciplines and practices. It covers: * the debate concerning children's rights and developments in rights provision over the last twenty years * the impact of recent British legislation on children's rights in key a

Child Rights & Remedies

This book examines Ghana's implementation of the United Nations Convention on the Rights of the Child. Ghana's commitment to the Convention which she was the first country to ratify is explored in a series of studies and analyses on child rights promulgations and programs. The book further discusses the challenges the country faces in her efforts of protecting children's rights while providing an insight into future directions for continued support of children's rights.

From Child Welfare to Child Well-Being

Representing Parents in Child Welfare Cases is a guide for attorneys representing parents accused of parental unfitness due to abuse or neglect. Competent legal representation is often the sole support a parent has when working with the child welfare system. This book provides practical tips for attorneys at each stage of the process.

Global Child Welfare and Well-being

The adoption in November 1989, by the UN General Assembly, of the United Nations Convention on the Rights of the Child heralded the arrival of a new era in the development of children's rights. As of March 1991 over 75 states have ratified the Convention. Using the Convention as a framework the contributors to this volume set out to re-evaluate the advantages and disadvantages of approaching issues of children's welfare and well-being through the lens of a 'rights' approach. The aim is to take a fresh look at these issues and to do so with specific reference to an international treaty that is certain to be ratified by a very large number of countries in every region of the world and which will soon be legally binding in many states. This is a special issue of the International Journal of Law and the Family. Contributors: Tom Campbell, Onora O'Neill, Michael Freeman, Ngaire Naffine, Margaret Coady, Tony Coady, Sheila McLean, Frances Olsen, and John Eekelaar.

New Directions in Child Abuse and Neglect Research

This is the first work to trace the development of U.S. child welfare policy during the first half of the twentieth century. In it, Kriste Lindenmeyer unflinchingly examines the bureau's successes and failures. She analyzes infant and maternal mortality, the promotion of child health care, child labor reform, and the protection of children with "special needs," all from the bureau's inception during the Progressive Era through World War II. During its heyday, the Children's Bureau contributed significantly to the growing recognition of childhood as a special time with specific needs. The agency was the source of many of today's most controversial federal programs: maternal and child health funding, juvenile delinquency policy, Aid to Families with Dependent Children (AFDC), and child labor restrictions. The meaningful accomplishments and the demise of the Children's Bureau have much to tell parents, politicians, and policy makers everywhere.

Rethinking Children's Citizenship

This open access book critically explores what child protection policy and professional practice would mean if practice was grounded in human rights standards. This book inspires a new direction in child protection research – one that critically assesses child protection policy and professional practice with regard to human rights in general, and the rights of the child in particular. Each chapter author seeks to approach the rights of the child from their own academic field of interest and through a comparative lens, making the research relevant across nation-state practices. The book is split into five parts to focus on the most important aspects of child protection. The first part explains the origins, aim, and scope of the book; the second part explores aspects of professionalism and organization through law and policy; and the third part discusses several key issues in child protection and professional practice in depth. The fourth part discusses selected areas of importance to child protection practices (low-impact in-house measures, public care in residential care and foster care respectively) and the fifth part provides an analytical summary of the book. Overall, it contributes to the present need for a more comprehensive academic debate regarding the rights of the child, and the supranational perspective this brings to child protection policy and practice across and within nation-states. .

Children's Rights and Social Work

Children's rights: the phrase has been a legal battle cry for twenty-five years. But as this provocative book by a nationally renowned expert on children's legal standing argues, it is neither possible nor desirable to isolate children from the interests of their parents, or those of society as a whole. From foster care to adoption to visitation rights and beyond, Martin Guggenheim offers a trenchant analysis of the most significant debates in the children's rights movement, particularly those that treat children's interests as antagonistic to those of their parents. Guggenheim argues that children's rights can serve as a screen for the interests of adults, who may have more to gain than the children for whom they claim to speak. More important, this book suggests that children's interests are not the only ones or the primary ones to which adults should attend, and that a best interests of the child standard often fails as a meaningful test for determining how best to decide disputes about children.

Children's Rights in the United States

One of the aims of the United Nations Convention on the Rights of the Child is to accord due recognition to the fact that 'the child, by reason of his physical and mental immaturity, needs special safeguards and care, including appropriate legal protection, before as well as after birth'. However, a question mark hangs over the extent to which 'special safeguards and care' can negatively impact on the rights of the child and result in discrimination against the child in the guise of 'his physical and mental immaturity'. This volume explores the extent to which children's rights are secured at the national level; and the reasons why children's rights have or have not been recognised and secured by various states at the level of domestic law. It also explores the difficulties inherent in the accordance of rights to children in order to ascertain whether they do in fact derive from the particular nature of children or whether they mask a reluctance of states to fulfil their domestic and international rights obligations to children, and whether such

reluctance constitutes 'discrimination against children'. The volume thus explores the theoretical and legal underpinnings of gender and race discrimination, at both the domestic and international level, and examines the extent to which these may be applied to the area of children's rights.

Children's Rights and the Developing Law

The aims of child rights education are to make children and their primary duty-bearers aware of child rights so that they both can be empowered to together advocate for and apply them at their family, school and community levels. This sourcebook focuses on child rights education for primary prevention related to inclusion and protection. Child rights education for exclusion, non-discrimination and inclusion is discussed in the context of family and society with reference to girls, children with disability, and Dalit and tribal children, and child rights to cultural and financial inclusion. Child rights education for protection comprises prevention of violence against children with reference to physical abuse/ corporal punishment and bullying, commercial exploitation of children with reference to child labour and trafficking and sale of children, sexual abuse and exploitation of children, problems in adolescent sexual relationships such as violence, teenage pregnancy, abortion and unwed motherhood, and sexually transmitted infections and HIV, child marriage, and conflict with law. This is a necessary read for social workers, lawyers, researchers, trainers and teachers working on child rights across the world, and especially in developing countries.
