Ce livre est destin3 aux administrateurs de r3seaux informatiques ayant 3 mettre en 3uvre des solutions Citrix Presentation server (version 3 ou 4). Il fournit les cl3s permettant de ma3triser toutes les technologie) Citrix afin d'administrer au quotidien et de fa3on optimale, des serveurs Citrix Presentation Server. Il est structur3 autour de 13 chapitres permettant de couvrir compl3tement toutes les fonctionnalit3s de Citrix Presentation Server, des concepts de base aux outils compl3mentaires en passant par les phases d'installation et de d3ploiement. Les particularit3s des environnements Terminal Server, les diff3rences entre les versions 3 et 4 et les m3thodes et techniques 3 utiliser pour produire les applications sont largement d3taill3es. Enfin, tous les outils d'administration et de suivi sont largement abord3s.

Deploying Citrix MetaFrame Presentation Server 3.0 with Windows Server 2003 Terminal Services

Cet ouvrage s'adresse 3 des responsables informatiques sur le point de s'engager dans la mise en ceuvre d'une solution clients l3gers, aussi bien qu'3 des

informaticiens confrontés à l'installation et à l'optimisation de cette architecture en entreprise. L'auteur a réussi à synthétiser les possibilités réellement apportées par les architectures TSE, afin que le lecteur puisse s'engager dans ce type de projet en toute connaissance de cause et maîtriser sa mise en place. Les premiers chapitres détaillent les architectures clients légers en entreprise (concept, principes technologiques, bénéfiques pour l'entreprise) ainsi que les particularités de la solution TSE (composants de la solution, système de licences). Les chapitres suivants décrivent l'environnement du couple TSE/IRDP sous Windows Server 2003 (gestion des impressions, des applications, stratégies d'accès, stratégies de groupes, sécurisation des architectures) ainsi que les méthodologies d'implémentation d'une architecture TSE (choix de l'architecture réseau, calibrage des serveurs, optimisation des performances).

Hoover's Handbook of Emerging Companies 2007

Almost 100% of all Fortune 500 and Fortune 1000 companies use Citrix. Deploying Citrix MetaFrame Presentation Server 3.0 with Windows Server 2003 Terminal Services covers the new release to Citrix MetaFrame and how companies can deploy it in their disaster recovery plans. Server Based Computing has been established as a solid networking model for any size business. Why? Because it guarantees cost savings, fast deployment, scalability, performance, security and fast recoverability. Think "mainframe," but updated, pretty, shiny, and effective! Server based computing is the mainframe with a vengeance. Terminal Server and Citrix MetaFrame offer the advantages of the old mainframe coupled with the benefits, gadgets, and appeal of the personal computer. Citrix MetaFrame Access Suite for Windows Server 2003

If you are a Citrix® engineer, a virtualization consultant, or an IT project manager with prior experience of using Citrix XenApp® and related technologies for desktop virtualization and want to further explore the power of XenApp® for flawless desktop virtualization, then this book is for you.

The Journal of Housing and Community Development

Ce livre sur Citrix XenApp s'adresse aux ingénieurs systèmes et administrateurs appelés à déployer une solution de virtualisation d'applications. Le livre couvre les versions 4.5 et 5 de XenApp (anciennement Presentation Server) pour les environnements serveurs Windows 2008 et Windows 2003. Les premiers chapitres de l'ouvrage traitent de la mise en place tactique de XenApp, pour répondre à des problématiques spécifiques dans les entreprises (accès distant, mise à disposition d'applications,). Cette première partie donne les contours de la valeur ajoutée de Citrix aux environnements Terminal Server de Microsoft. Dans ces premiers chapitres sont détaillées les phases d'installation et de mise en oeuvre initiales (serveurs, postes clients, applications, impressions,). Les chapitres suivants décrivent la mise en place stratégique de la solution XenApp Platinum, applicable à l'ensemble des utilisateurs d'une entreprise et qui apporte à l'administrateur Citrix une très grande souplesse et une facilité de déploiement. Les nouvelles fonctionnalités avancées telles que le streaming, les composants intégrés à XenApp Platinum (Edge Sight, Password Manager, Easy Call,) sont décrits et détaillés afin de permettre à l'administrateur Citrix de mettre en place dans son entreprise une solution dynamique et pérenne.

Citrix Presentation Server allows remote users to work off a network server as if they weren't remote. That means: Incredibly fast access to data and applications for users, no third party VPN connection, and no latency issues. All of these features make Citrix Presentation Server a great tool for increasing access and productivity for remote users. Unfortunately, these same features make Citrix just as dangerous to the network it's running on. By definition, Citrix is granting remote users direct access to corporate servers?..achieving this type of access is also the holy grail for malicious hackers. To compromise a server running Citrix Presentation Server, a hacker need not penetrate a heavily defended corporate or government server. They can simply compromise the far more vulnerable laptop, remote office, or home office of any computer connected to that server by Citrix Presentation Server. All of this makes Citrix Presentation Server a high-value target for malicious hackers. And although it is a high-value target, Citrix Presentation Servers and remote workstations are often relatively easily hacked, because they are often times deployed by overworked system administrators who haven't even configured the most basic security features offered by Citrix. "The problem, in other words, isn't a lack of options for securing Citrix instances; the problem is that administrators aren't using them." (eWeek, October 2007). In support of this assertion Security researcher Petko D. Petkov, aka "pdp", said in an Oct. 4 posting that his recent testing of Citrix gateways led him to "tons" of "wide-open" Citrix instances, including 10 on government domains and four on military domains. * The most comprehensive book published for system administrators providing step-by-step instructions for a secure Citrix Presentation Server. * Special chapter by Security researcher Petko D. Petkov'aka "pdp detailing tactics used by malicious hackers to compromise Citrix Presentation Servers. * Companion Web site contains custom Citrix scripts for administrators to install, configure, and troubleshoot Citrix Presentation Server.

Expansión

Citrix XenDesktop Implementation explores the implementation of Citrix XenDesktop, a virtual desktop infrastructure solution. After introducing the desktop virtualization, the book discusses the installation of a desktop delivery controller through advanced XenDesktop Client Settings. This book briefly discusses the work of desktop delivery controller mechanisms followed by its installation process, integration process of XenDesktop with Microsoft Active Directory, and the configuration of the desktop delivery controller. It then examines the process of installing the virtual desktop onto the server infrastructure, and it follows the installation and integration onto Xen Server, Hyper-V, and VMware hypervisors. Furthermore, it discusses the advanced configuration settings. The book covers the installation of the Citrix Provisioning Server and its fundamental configuration. It also explores the configuration of Citrix XenApp for Application provisioning, the integration of virtual applications, and the implementation of virtual profiles into the virtual desktop. The book concludes by explaining the advanced XenDesktop client settings on audio, video, and peripherals. Ideal one-stop handbook for implementing a Citrix XenDesktop virtual desktop solution Includes all technical details required for you to evaluate how Citrix XenDesktop would integrate into your existing environment Covers integration with VMware ESX/vSphere, Microsoft Hyper-V including System Center Virtual Machine Manager (SCVMM) and Citrix XenServer
