The play Shakuntala was one of the first examples of Indian literature to be read in translation in Europe. Shakuntala's story is a leitmotiv that recurs in many works of Indian literature and culminates in the master Kali-dasa's drama for the stage. The virtuous heroine is forgotten by her betrothed, the king Dushyanta, only to be refound thanks to a distinguishing signet ring discovered by a fisherman in the belly of one of his catch. The final act distills the essence of human forgiveness, in Shakuntala's gracious release of her husband from his guilt.

Lakhmir Singh's Science for Class 8

A guide to systematic, as opposed to incidental, ad-hoc innovation Innovation need not only be jugaad. For the first time a book shows us how in India, innovation can be introduced in one's organization in a systematic, deliberate way. 8 Steps to Innovation explains how you can do this by building an idea pipeline in your organization, improving the velocity of ideas coming in, and implementing the ideas within the given constraints. All this is shown through nice, snappy examples, mostly homegrown Indian ones. Few books in the market talk about innovation in the Indian context with Indian examples as this one does.

The Globalization of World Politics

The Alternate Nation of Abanindranath Tagore provides a revisionary critique of the art of Abanindranath Tagore, the founder of a 'national' school of Indian painting, popularly known as the Bengal School of Art. It categorically argues that the art of Abanindranath, which developed as part of what has been called the Bengal Renaissance in the 19th–20th centuries, was not merely a normalization of nationalist or orientalist principles, but was a hermeneutic negotiation between modernity and community, geared toward the fashioning of an alternate nation, resistant to the stereotyping identity formation of the nation-state. It also establishes that his art—embedded in communitarian practices like kirtan, alpona, pet-naming, syncretism and storytelling through oral allegories—sought a dialogic social identity within the inter-subjective contexts of locality, regionality, nationality and trans-nationality. This book is well-illustrated with many of Abanindranath's creations. It will be a rich reference work for students, researchers and academics from various subject areas such as arts and humanities, sociology and cultural studies, and would be precious for artists, art collectors, connoisseurs,

museums and art galleries.

Pedagogies for Development takes a sociological approach to examine the introduction of child-centred education in contemporary Indian policy and school contexts. It investigates the promise of democratic learning in development discourses to ask how far child-centred models can address poverty and social inequalities in rural Indian communities. Drawing on in-depth ethnographic research conducted in the south Indian state of Karnataka, the book offers a multi-level analysis of international, national and state education practices of pedagogic reform. The book contributes to pressing debates about how 'quality' education should be conceptualised and assessed in development contexts, and brings into focus the assumptions which associate schooling to social justice.
