In "Hacking the Common Core," longtime teacher and CCSS specialist Michael Fisher reveals 10 amazing hacks for teaching the Core in all subjects. The Common Core Is Not Evil, but. . . Fisher explains how the CCSS are not evil, while demonstrating their limitations, particularly when teachers trust a vendor product over their own professionalism. Getting to the CORE of contemporary instructional practice and undoing the mass hysteria following the Common Core implementation are both the heart of this book. "An optimistic, fact-based look at how four transformational forces-unrivaled manufacturing depth, soaring levels of creativity, massive new energy sources, gigantic amounts of capital available-will propel the U.S. to new economic heights In Unleashing the Second American Century, business expert Joel Kurtzman shows conclusively that all the talk about the relative decline of the United States is not only baseless-it's dead wrong. A widely-held misconception is that "America doesn't make things anymore." But the U.S is by far the world's dominant manufacturing power, and most of what we make is recession-proof. America also has a stunning level of talent and creativity in the world's fastest-growing economic sectors, such as biotech, pharmaceutical, computer hardware and software, and telecommunications. Due to shale and gas, America has the world's largest energy reserves, and is more favorably endowed than even the Middle East. Finally, America has an unprecedented amount of capital now idle-approximately \$4.4 trillion, a sum that is about \$1 trillion larger than the German economy, the world's fourth largest. As Kurtzman shows, when the business community fully grasps the opportunities in the U.S., prosperity will return-and much faster than we now think possible"--

This report finds that the funding of the EU is complex and lacks transparency and that there is a need for a simpler system that would reduce the administrative burden. "Corporate reform" is not reform at all. Instead, it is the systematic destruction of the foundational American institution of public education. The primary motivation behind this destruction is greed. Public education in America is worth almost a trillion dollars a year. Whereas American public education is a democratic institution, its destruction is being choreographed by a few wealthy, wellpositioned individuals and organizations. This book investigates and exposes the handful of people and institutions that are often working together to become the driving force behind destroying the community public school.

### **Common Core Meets Education Reform**

Science today makes progress through the imaginative harvesting of knowledge generated by the many, rather than as the result of the isolated endeavours of the lone researcher. Innovations in the physical sciences from the development of nuclear technologies to the laser, have involved research teams working collectively. Collaboration is the rule rather than the exception. In the social sciences this model is all but reversed. Here it is not uncommon to encounter the solitary enthusiast, relishing an independence of spirit and pursuing their own private research agenda. All the more surprising then that a group of researchers from several different disciplines, should have come together in the late 1980s with nothing more substantial on the agenda than that they share their thoughts on the topic of measuring the value of health, or more specifically, on the way that the value of health might vary across different countries. Few scientific enterprises can have begun as cautiously or uncertainly. Few can have developed a cohesion and dynamism that lasted decades and continues to drive ahead after long years of scientific endeavour. Such is the good fortune that befell those of us who came together to form what was later to be known as the Euro-QoI Group. The Group's creation is principally due to the shared professional association of its members with one man, an economist by training and a visionary academic by inclination and temperament - Alan Williams.

### **The Education Invasion**

Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of “informational text” instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping “reform” of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as “an absolute game-changer in public education,” yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation’s schools? Who benefits? And how can citizens regain local self-governance in education, so their children’s minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? The Education Invasion offers answers and remedies.

Greed and opportunity become a volatile mix in retired attorney Peter Alpert's novel *The Vanishing Chemist*. Chemist Madison Bellamy first contacts attorney Mark Conover when he faces a \$12 million judgement for allegedly polluting Colorado waterways with his platinum refinery. Conover gets the judgment overturned, but he hears from Bellamy again when the eccentric chemist continues his unscrupulous practices in Arizona. That won't be the last contact. Bellamy's greed leads him into high-stakes finance deals and takes him around the world in pursuit of cash. Getting governmental approval before he sells stocks is simply a formality that Bellamy doesn't have time to deal with. What he does have time for is a Bulgarian beauty who joins him in his quest. Throughout it all, he phones Conover, hoping to stay one step ahead of the authorities as he tries to get the pot of money of his dreams. How long can he keep it up? Conover merely wonders as

the calls keep coming and he finds himself circling the globe in an effort to keep up with Bellamy. Based on factual events, Alpert weaves a tale of international intrigue that gives readers an inside look at courtroom proceedings, high-finance risks, and the trappings of greed.

How can the Common Core complement and not conflict with school improvement efforts already at work across the United States? How can it be seamlessly integrated into accountability systems, teacher preparation and development, charter schools, and educational technology? This timely volume brings together prominent scholars and policy analysts to examine the pressing issues that will mark Common Core implementation. Whether or not you agree with the standards, the Common Core is coming, and this book will help policymakers, practitioners, and other stakeholders anticipate the challenges and take steps to address them. "Common Core Meets Education Reform raises the hard questions about implementing and sustaining the Common Core State Standards so they don't end up in the dustbin of abandoned public education reforms. These new standards can help students enormously in becoming problem solvers and critical thinkers—which is essential in the 21st century—but only if teachers become engaged in the rollout, get the support they need, and the fixation on high-stakes testing gives way to a fixation on learning." —Randi Weingarten, president, American Federation of Teachers "Adopting the Common Core in a mad dash for federal gold, policymakers across the country blew right past critical questions about how they'd implement the thing. This volume, in stark contrast, meticulously studies the road ahead, seeking out tripwires, pitfalls, and boulders, making it a must-read for anyone who hopes to avoid total Common Core disaster." —Neal McCluskey, associate director, Center for Educational Freedom, Cato Institute, Washington, DC "This balanced, wide-ranging, and deeply informed book is certain to guide educators and reformers through a complex time of transition for U.S. education. But it also turns out to be timely and clarifying as politicians battle over ambitious new academic standards with plenty of heat and smoke but appallingly little illumination. Thanks to the authors for turning on some lights!" —Chester E. Finn, Jr., senior fellow, Hoover Institution, Stanford University and president, Thomas B. Fordham Institute Frederick M. Hess is director of education policy studies at the American Enterprise Institute (AEI) and serves as executive editor of Education Next. Michael Q. McShane is a research fellow in education policy studies at AEI.

## **The Money Gods**

Since *Brown v. Board of Education* and the desegregation battles of the 1960s and 1970s, the legal pursuit of educational opportunity in the United States has been framed largely around race. But for nearly thirty years now, a less-noticed but controversial legal campaign has been afoot to equalize or improve the resources of poorly funded schools. This book examines both the consequences of efforts to use state constitutional provisions to reduce the "resource segregation" of American schools and the politics of the opposition to these decisions. *On Equal Terms* compares the relative success of school finance lawsuits to the project of school desegregation and explores how race and class present sharply different obstacles to courts. Since a 1973 U.S. Supreme Court decision that effectively

deferred to the states in the matter of educational equity, about a third of state judiciaries have mandated reform of state-level educational funding systems. Douglas Reed analyzes both the rhetoric of reform and the varying effects of these controversial decisions while critiquing the courts' failure to more clearly define educational equity. Well-written with keen insight throughout, the book concludes with an intriguing policy proposal that acknowledges obstacles to such efforts. This proposal aims to enhance education by fostering racial and economic integration locally. Setting the stage for a more coherent debate on this controversial issue and expanding our understanding of constitutional design, *On Equal Terms* will have far-reaching implications for law, public policy, politics, and not least, the future of American education.

As Gabriel and his team take high resolution photographs of the codex pages for study, the codex is stolen, but by whom? Is it forces within the Israeli government? Perhaps members of his own team? Or, is it a sinister group within the Catholic Church--The Dark Brothers--who seek to suppress the discovery and keep Mary's revelations from the world? Gabriel is joined by Nicki Taylor, a beautiful and wealthy volunteer on the dig, as they attempt to protect the photographic images and make Mary's words available to the world. A small survivor community in a dystopian America wages an internal war on itself when the residents disagree what is best for their future. \*\*\* In rural Kentucky, one hundred and sixty-one survivors of the apocalyptic Great Rains huddle inside a one-block, walled off section of town: a place they call Outpost. It has been two years since the toxic rains fell. The people of Outpost have managed to survive by working together, scavenging food from empty homes and businesses, guarding one another while they sleep. They have persevered through their worst nightmare--or so they believed. But now a stranger has come to their community and offered them a choice: they can come with him and go to war with those responsible for destroying the world. Or they can do nothing and hope some other community has the courage to do what they can't. They've already suffered greater than they believed was possible, but many of them still want to fight. Others are skeptical. They don't believe the stranger's story and want nothing to do with furthering their own misery. They like things just the way they are and they'll fight to keep it that way. Even if that fight is with those they call friend and neighbor.
