The Science of Psychology: An Appreciative View treats psychology as an integrated science - placing function before dysfunction. The narrative shows where the various subfields of the science interconnect. This second edition provides a flexible solution for an AP Psychology course. From its

readable and lively prose to the adaptive questioning diagnostic tool and personalized study plan on Connect Psychology, The Science of Psychology ensures an accurate and timely understanding of psychology as a science. Pedagogical and analytical thinking aides, intersections, and Psychological Inquiry encourage students' critical thinking and active engagement with the reading. Laura King's contemporary, engaging, and personal writing style draws students into the text and encourages them to read more actively and critically. The Science of Psychology adapts to students individually and provides a roadmap for success that gets students reading and studying more frequently, effectively, and efficiently. The adaptive questioning diagnostic in the Connect Psychology web-based assignment and assessment platforms ensures students understand key chapter concepts. Connect Psychology - turnkey course setups are available almost immediately, or the course can be customized at virtually any level. This makes The Science of Psychology perfect for face-to-face, online, or hybrid course delivery.

Intermediate Accounting, 3e, by Spiceland/Sepe/Tomassini will gain support in traditional and technology-driven accounting

departments, especially those looking for a more concise, decision-making text that reinforces challenging concepts via CD-ROM. The revision of this text is based around a "Learning System." The revision of this "Learning System" was built on improving the clarity of the chapters, emphasizing more decision-making in order to prepare students for the changes taking place on the CPA exam, acknowledging the diversity of students and their learning styles by creating supplemental materials to assure the success of every student, and creating a consistent text and supplemental package for both students and instructor's giving us the best possible intermediate text on the market. Returning to the Third edition is the award winning "Coach" CD-ROM. The Coach CD-ROM is a multimedia product integrating audio and video clips, animated illustrations, cases, and alternative reading material that helps students comprehend some of the more difficult topics associated with intermediate accounting. Designed specifically for the Spiceland text, instructors and students will find these learning tools placed strategically throughout the text. This is the most comprehensive Learning System in Intermediate Accounting. At only 1120 pages (300 pages less than the average intermediate accounting text), Spiceland/S/T has not sacrificed content for pages. Instead, the authors have created a very flexible text with a student friendly writing style that focuses on explaining not just how to apply a procedure, but why it's applied.

The NABCEP PV Installation Professional (PVIP) Exam is the gold standard certification exam for PV professionals and is famously difficult to pass. As the industry grows and jobs have become more specialized, the Board has responded to this with NABCEP Specialist Certification Exams. As well as the content of the PVIP, this book also covers the material in the Design, Installer and Commissioning &

Maintenance Specialist Certification Exams, and provides test-taking strategy that can be used to most effectively study for and pass these assessments. Code and theory is explained in the first half of this guide, acting as a useful background for the second half, which consists of practice exam questions and answers, complete with detailed explanations. It also contains essential strategy tools, short-term memory tips and recommended reading which will be invaluable for anyone studying for the exams. The material covered in this book is not limited to those taking the test, but will also act as a valuable tool for career progression, helping the reader to work safely with code-compliant PV systems. This second edition has been fully revised and updated to reflect the new developments in solar and energy storage systems and new technologies.
