The Northrop YF-23 stealth fighter was evaluated with the Lockheed YF-22. Two aircraft were built, PAV-1 and PAV-2. The Chief Test Pilot for the program was Paul Metz, the author of this book. Although the YF-22 was eventually chosen for production, the YF-23 ATF proved to be a very capable and superb example of Low Observable (LO) fighter technology. This book covers origins of the ATF requirement, other manufacturers submissions including alternate Northrop designs, RFI phase May 1981 to May 1982, CDI phase May 1983 to May 1984, ATF DEM/VAL phase 1986 through 1991, Northrop ATF evolution 1971-1986, ATF team, construction, flight test program, engines, summary and selection, NATF proposal, F/B-23 proposal, aircraft nuts-and-bolts, where are they now, program patches, YF-23 pilots, and YF-23 models.

## **Diesel Engine Manual**

This text aims to present and discuss the innovative Volvo Uddevalla plant, comparing it to other plants - Japanese lean ones and others. The starting point for the book is Volvo's dramatic decision to close its Uddevalla and Kalmar plants, and the debate that followed this decision, both in Sweden and abroad. Both plants were pioneers of the possibilities to unite productivity and the good work, but, following the announcement of their closure, researchers and practitioners in the field of industrial organization from many countries asked why they closed, how they compared with other production concepts, and whether we now see an end of an alternative to Japanese lean production.

“ My excuse for writing this book is a desire to ventilate certain facts in relation to the early work of Karl Benz and Gottlieb Daimler of which the public is largely ignorant. Among those who have taken the trouble to investigate the early days of the motor movement, there is a certain amount of controversy as to who invented the motor vehicle, although this question has not, at the moment, extended to the general public. Inevitably it will do so, if the prevailing interest increases, in which event, it is hoped that this book will prove useful, for all the dates and facts, etc., have been fully authenticated. There are, however, several to whom I must express my sincere gratitude for the assistance they have given me. Herr Rudolf Caracciola, the winner, during the 1935 season of motor racing, of the Grand Prix of France, Belgium, Switzerland, Spain, and Tripoli, to say nothing of other triumphs, and therefore the Champion of Europe, has most kindly written a preface after reading through the manuscript.
