It's 76 A.D. during the reign of Vespasian, and Marcus Didius Falco has achieved much in his life. He's joined the equestrian rank, allowing him to marry Helena Justina, the Senator's daughter he's been keeping time with the past few years. But that doesn't mean all is quiet for Falco, Helena, and their two young daughters. By trade he is an informer, a man who looks into sticky situations, and he's been hired to pry his errant brother-in-law away from a murder investigation. Which means Falco must himself take it on -- requiring that Falco and Helena travel to Olympia in Greece under the guise of being tourists interested in the classic sites to investigate the suspicious goings on and the shady dealings of a fly-by-night travel agency. With two woman already missing from the packaged tour, things only get stickier when two more -- including Falco's brother-in-law -- disappear. In *See Delphi and Die*, Lindsey Davis has created Falco's most complex and dangerous case yet.

### **Have You Been to Delphi?**

Especially during the last two decades consulting companies established themselves in the international marketplace. In times of globalization particularly emerging economies, such as Brazil, are experiencing an upward trend and join the global players. The term LEAN consulting became frequently used in this context and plays a major role in the Brazilian consulting market nowadays. This study develops recommendations for the market entry of management consulting companies into the Brazilian market. The implication of the term Lean in the context of the consulting business and its future potential in Brazil is examined, supported by an evaluation of the target market. The outcome of the theoretical part is then being compared with empirical findings which are conducted via a Delphi Study. The empirical part clearly identifies that the most promising strategy for doing business in Brazil is intensive networking and new ventures should enter the market only with professional support from Brazilian partners who are more familiar with the peculiarities of the market. These and other interesting facts are delivered at the end of the study, providing a guide for new potential consulting businesses that want to enter the Brazilian LEAN market.
