Opening this book is like sitting down in a canoe, taking up a paddle, and gliding out into the summer beauty of a hidden lake. In this picture book that is as refreshing and inviting as a perfect canoe day, a fawn peeks out from the trees as ducklings fan out behind their mother. Butterflies pause and fish laze beneath the lily pads. Ruth Wright Paulsen's sunlit paintings and Gary Paulsen's poetic text capture all the peace and pleasure of a day when water and sky are one.

The necromantic armies are on the warpath and nowhere is safe-even the sanctuary of the flying dungeon has been threatened. The leadership of nearly all the sentient races has been wiped out, and only the people most suited to repelling the advancing darkness have an intact monarchy. Cal learns quickly that the primary threat is not the far-off war, but the actions of those entrusted with protecting the population. As it turns out, the idea of using a flying dungeon as a war machine is very tempting indeed. Dale has been facing his trials better than anyone could have hoped for, but when the war takes a turn for the worse, his role is forcibly relinquished. Since his only chance at survival is painful and rapid advancement, Dale must learn if his strength of will can develop into strength of flesh. The distance between the Heavens and the Earth might not be so far after all.

## **Study Guide**

Excerpt from The Book of Esther The various literary and ethical and religious characteristics of the Book of Esther, and the

history of opinions regarding it, in the Jewish and in the Christian church, give it, in some respects at least, a position quite unique, and accordingly invite our study. The story of the book is, briefly, as follows: The Persian king, Ahasuerus, makes a magnificent feast, first for all his princes and nobles, and then for all the inhabitants of Susa. The king orders Vashti, the queen, to appear in public. She refuses, and is deposed from her position as queen. It being necessary to choose a new queen, fair young virgins are brought in from all parts of the empire, that from them the king may make his choice. The result is, that Esther, a beautiful Jewish maiden, the adopted daughter of Mordecai, is chosen. Mordecai subsequently reveals a conspiracy against the king, and thus saves the king's life. He refuses, moreover, to give the customary obeisance to Haman, the king's favorite. Haman, in revenge, plots to slay the whole Jewish race throughout the empire. Having been obliged by the command of the king to be an involuntary instrument in confer ring high honor upon Mordecai, his passion of revenge becomes still deeper. Esther, however, skilfully using her charms and power as the king's favorite, obtains what is virtually a complete reversal of the destructive decree. Haman is hanged upon the gallows which he had prepared for Mordecai. The Jews, under the encouragement of a royal decree, fall upon their enemies, and slay them. The festival of Purim is instituted to commemorate this glorious deliverance. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. ### **The Xenophobe's Guide to the Chinese**

In our work lives when something isnt working, we struggle with what part of the problem to tackle first. Do we start with cost reduction? What about morale? Or should we go for process improvements first? We pick the problem to work on, and depending on whether our plan makes sense, one of two things happens. First, we fail and then we add frustration to our list of problems. Two, we succeed, and then some new problem pops out to replace the old. We cut 10% out of our budget, and our star performers leave in frustration because we sliced what they saw as a critical program. Its as though the system were working on is an old inner tube. The moment we patch one hole and add pressure, another spot tears

open. The point is that its possible to change everything at once. Seem far fetched? Zaffron and Logan make a compelling argument that executives spend their time and money adjusting the systems in which people operate rather than targeting people's performance directly. When the three laws in this book are applied, performance transforms to a level far beyond what most people think is possible. These laws are: 1. How people perform correlates to how situations occur to them. 2. How a situation occurs arises from language. 3. Future-based language transforms how situations occur to people. Steve Zaffron has helped hundreds of companies envision and effectively implement major change and performance improvement. He presents a proven system for rallying all of an organization's employees around a new vision, and more importantly, making it stick. The focus is on making such transformations permanent and repeatable, providing practical examples from clients such as Apple, Lockheed Martin, Johnson & Johnson, Morgan Stanley, and many others.
