An understanding of human form is essential for artists to be able to express themselves with the figure. Anatomy makes the figure. Human Anatomy for Artists: The Elements of Form is the definitive analytical work on the anatomy of the human figure. No longer will working artists have to search high and low to find the information they need. In this, the most up-to-date and fully illustrated guide available, Eliot Goldfinger--sculptor, illustrator, scientific model-maker, and lecturer on anatomy--presents a single, all-inclusive reference to human form, capturing everything artists need in one convenient volume. Five years in the making, and featuring hundreds of photos and illustrations, this guide offers more views of each bone and muscle than any other book ever published: every structure that creates or influences surface form is individually illustrated in clear, carefully lit photographs and meticulous drawings. Informed by the detailed study of both live models and cadavers, it includes numerous unique presentations of surface structures--such as fat pads, veins, and genitalia--and of some muscles never before photographed. In addition, numerous cross sections, made with reference to CT scans, magnetic resonance imaging, and cut cadavers, trace the forms of all body regions and individual muscles. Information on each structure is placed on facing pages for ease of reference, and the attractive two-color format uses red ink to direct readers rapidly to important points and areas. Finally, an invaluable chapter on the artistic development of basic forms shows in a series of sculptures the evolution of the figure, head, and hands from basic axes and volumes to more complex organic shapes. This feature helps

place the details of anatomy within the overall context of the figure. Certain to become the standard reference in the field, *Human Anatomy for Artists* will be indispensable to artists and art students, as well as art historians. It will also be a useful aid for physical and dance therapists, athletes and their trainers, bodybuilders, and anyone concerned with the external form of the human body. With the renewed interest in figurative art today, this will be an especially welcome volume.

Drawing the Female Figure

George Brant Bridgman (1865–1943) was a Canadian-American painter, writer, and teacher in the fields of anatomy and figure drawing. Bridgman taught anatomy for artists at the Art Students League of New York for some 45 years. *Constructive Anatomy: Illustrated by George B. Bridgman*. Excellent book of anatomical drawing instruction. Ideal for beginning to intermediate artists, begins with instruction on drawing hands and works its way through the human body giving detailed instruction on how to draw realistic human figures. The drawings that are presented here show the conceptions that have proved simplest and most effective in constructing the human figure. The eye in drawing must follow a line or a plane or a mass. In the process of drawing, this may become a moving line, or a moving plane, or a moving mass. The line, in actual construction, must come first; but as mental construction must precede physical, so the concept of mass must come first, that of plane second, that of line last. Masses of about the

same size or proportion are conceived not as masses, but as one mass; those of different proportions, in respect to their movement, are conceived as wedging into each other, or as morticed or interlocking.

Expressive Figure Drawing

NATIONAL BESTSELLER WINNER OF THE BOOKER PRIZE “A must-read about modern Britain and womanhood . . . An impressive, fierce novel about the lives of black British families, their struggles, pains, laughter, longings and loves . . . Her style is passionate, razor-sharp, brimming with energy and humor. There is never a single moment of dullness in this book and the pace does not allow you to turn away from its momentum.”—Booker Prize Judges

Bernardine Evaristo is the winner of the 2019 Booker Prize and the first black woman to receive this highest literary honor in the English language. *Girl, Woman, Other* is a magnificent portrayal of the intersections of identity and a moving and hopeful story of an interconnected group of Black British women that paints a vivid portrait of the state of contemporary Britain and looks back to the legacy of Britain’s colonial history in Africa and the Caribbean. The twelve central characters of this multi-voiced novel lead vastly different lives: Amma is a newly acclaimed playwright whose work often explores her Black lesbian identity; her old friend Shirley is a teacher, jaded after decades of work in London’s funding-deprived schools; Carole, one of Shirley’s former students, is a successful investment banker; Carole’s mother Bummi works as a cleaner and worries about

her daughter's lack of rootedness despite her obvious achievements. From a nonbinary social media influencer to a 93-year-old woman living on a farm in Northern England, these unforgettable characters also intersect in shared aspects of their identities, from age to race to sexuality to class. Sparklingly witty and filled with emotion, centering voices we often see othered, and written in an innovative fast-moving form that borrows technique from poetry, *Girl, Woman, Other* is a polyphonic and richly textured social novel that shows a side of Britain we rarely see, one that reminds us of all that connects us to our neighbors, even in times when we are encouraged to be split apart.
