How small businesses can use the Internet and e-commerce to succeed in the global marketplace. Small companies account for a surprising one-third of U.S. exports, and their market share is growing. The Internet has played a major role in helping these companies develop an increasingly powerful international presence. Global E-Commerce Strategies for Small Businesses describes the export opportunities e-commerce holds for small-to-medium size enterprises (SMEs) all over the world. The book is organized in two parts. The first uses examples and case studies of small exporting companies from six countries to show how SMEs and new entrepreneurs are not only successful but also often responsible for job creation, innovation, and economic growth in their regions. It also examines common obstacles to exports such as local and international laws, cultural differences, trade barriers, taxation, and transport infrastructure. The second part covers the steps in setting up a global business: researching business opportunities, identifying and reaching out to customers, building and keeping an online image, closing the deal, and maintaining customer support. Written in a casual, accessible style, the book offers an overview of the tools and services available to help smaller companies flourish in the global marketplace.

The WWW8 Program Committee was in charge of selecting the technical papers that appear in these Proceedings. The committee was divided into six tracks, each with one or two vicechairs. 304 Submissions were received, which were extensively reviewed for originality, significance, technical soundness, and clarity of presentation. The review process culminated on January 28, 1999, in a meeting in which 48 papers were selected for presentation at the conference and inclusion in the Proceedings. The submission and review process were completely Web-based, supported by the excellent WitanWeb software package, developed by Dr. Howard Johnson at the National Research Council of Canada. The technical program is of high quality, and the more than 90 committee members and more than 60 additional reviewers provided close to 1,000 thoughtful and expert reports.
