When a Toy Dog Became a Wolf and the Moon Broke Curfew

In this poetic exploration of the auditory imagination, the third in his series on sonic aesthetics, Seán Street peoples silence with sound, travelling through time and space to the distant past, the infinite future and the shadow lands of the inner psyche. Our mind is a canvas on which the colours of the sound world leave permanent impressions. It is the root of all listening.

Where Did I Leave My Glasses?

For more than 30 years, the highly regarded Secrets Series® has provided students and practitioners in all areas of health care with concise, focused, and engaging resources for quick reference and exam review. Medical Secrets, 6th Edition, features the Secrets' popular question-and-answer format that also includes lists, tables, pearls, memory aids, and an easy-to-read style – making inquiry, reference, and review quick, easy, and enjoyable. The proven Secrets Series® format gives you the most return for your time – succinct, easy to read, engaging, and highly effective. Coverage includes the full range of essential topics in medicine for in-training and practicing professionals, authored by a diverse range of teachers and clinicians who cover both medical and ethical issues. Fully revised and updated throughout, including protocols and guidelines that are continuously evolving and that increasingly dictate best practices. Top 100 Secrets and Key Points boxes provide a fast overview of the secrets you must know for success in practice and on exams.

Farm Girl

This new, expanded and updated edition of Handbook of ICU Therapy builds on the success of the first edition and continues to provide concise information on a broad spectrum of issues relating to care of the critically ill patient. There are also several new, topical chapters. As with the first edition, it is equally applicable to anaesthetists, intensivists, operating department practitioners and anaesthetic/theatre/recovery nurses, and the heart of the book focuses on providing practical information in a readable and easily accessible format. All of the authors are directly involved in ICU practice and/or research and are familiar with the most recent developments in this fast-moving area of medicine.

Mortuary Confidential

The bestselling author of Intern and Doctored tells the story of the thing that makes us tick For centuries, the human heart seemed beyond our understanding: an inscrutable shuddering mass that was somehow the driver of emotion and the seat of the soul. As the cardiologist and bestselling author Sandeep Jauhar shows in Heart: A History, it was only recently that we demolished age-old taboos and devised the transformative procedures that have changed the way we live. Deftly alternating between key historical episodes and his own work, Jauhar tells the colorful and little-known story of the doctors who risked their careers and the patients who risked their lives to know and heal our most vital organ. He introduces us to Daniel Hale Williams, the African American doctor who performed the world's first open heart surgery in Gilded Age Chicago. We meet C. Walton Lillehei, who connected a patient's circulatory system to a healthy donor's, paving the way for the heart-lung machine. And we encounter Wilson Greatbatch, who saved millions by inventing the pacemaker—by accident. Jauhar deftly braids these tales of discovery, hubris, and sorrow with moving accounts of his family's history of heart ailments and the patients he's treated over many years. He also confronts the limits of medical technology, arguing that future progress will depend more on how we choose to live than on the devices we invent. Affecting, engaging, and beautifully written, Heart: A History takes the full measure of the only organ that can move itself.

Living to Tell the Tale

Weaving together fascinating insight from psychologists, neuroscientists, and evolutionary biologists with rich and often hilarious anecdotes, Lear explores the nature of garden-variety memory loss, and, in the process, offers reassurance and hope to the millions of forgetful baby boomers.

The Glory Road

The Youngest Doll

"That's how it is for us servants. No one pays you much heed; mostly you're invisible as furniture. Yet you overhear a conversation here, and add a little gossip there. Then you find something, something you should not have found." Irrepressible Bidy Leigh, under-cook at forbidding Mawton Hall, only wants to marry her childhood sweetheart and set up her own tavern. But when her elderly master marries young Lady Carinna, Bidy is unwittingly swept up in a world of scheming, secrets, and lies. Forced to accompany her new mistress to Italy, she documents her adventures and culinary discoveries in an old household book of recipes, *The Cook's Jewel*. Bidy grows intrigued by her fellow travelers, but her secretive and unconventional mistress is the most intriguing of all. In London, Bidy finds herself attracted to her mistress's younger brother. In France, she discovers her mistress's dark secret. At last in Italy, Bidy becomes embroiled in a murderous conspiracy, knowing the secrets she holds could be a key to a better life, or her downfall. Inspired by eighteenth-century household books of recipes and set at the time of the invention of the first restaurants, *An Appetite for Violets* is a literary feast for lovers of historical fiction. Martine Bailey's novel opens a window into the fascinating lives of servants, while also delivering a suspenseful tale of obsession and betrayal.

Comprehensive Healthcare Simulation: Anesthesiology

Alexa is Stealing Your Job

PROGRESS IN OBSTETRICS AND GYNAECOLOGY, edited by Professor John Studd, Dr Seang Tan and Dr Frank Chervenak, is the definitive international review series in the field. This 17th volume, with contributions from leading clinicians from all over the world, covers topics of importance and relevance to obstetricians and gynaecologists. Established review series covering the latest and most important topics in the field of obstetrics and gynaecology. International line-up of contributors. Provides excellent method of keeping up to date for clinicians. Serves as topical review for trainees in O&G preparing for exams such as the MRCOG.

Dawn and Evolution of Cardiac Procedures

When Bunny Coburn was growing up, neighbors came together in times of hardship. No matter the trouble, they faced it with determination, camaraderie, and resourcefulness. In the midst of the Great Depression, despite record-breaking heat and crop failure, growing up on the family farm was nevertheless filled with bucolic pleasures. *Farm Girl* is Beuna "Bunny" Coburn Carlson's loving tribute to the gently rolling hills of western Wisconsin. With an inviting and fluid voice, she shares

intimate moments of happinesses from her childhood: collecting butternuts for homemade maple candy, watching her father read by the flickering light of a kerosene lamp, and the joy of finding a juicy orange at the bottom of a Christmas stocking. Underlying each vignette is the courage of a strong family surviving adversity and finding comfort in one another. Hers is a memoir that readers can dip in and out of with pleasure.

The Sound inside the Silence

“...a series of jazz-master riffs on illness.” — TriQuarterly Review “...graceful and engaging...” — Rain Taxi We all know someone who has suffered a heart attack. But, how often do we learn the intimate, potentially life-saving details that accompany coronary disease? In *The Sanctuary of Illness*, Thomas Larson (*The Memoir and the Memoirist; The Saddest Music Ever Written*) gives a powerful and personal inside tour of what happens when our arteries fail. He chronicles the three heart attacks in five years that he survived, and the emergency surgeries that saved his life each time. Slowly waking up to the genetic legacy and dangerous diet that pushed him to the brink, he reveals a path to healing that he and his partner, Suzanna, discovered together. Told with urgency and sensitivity, *The Sanctuary of Illness* is a subtle reminder that heart disease seldom affects just one heart.

Essentials of Clinical Surgery E-Book

Born in the Netherlands at a time when girls are to be housewives and mothers and nothing else, Hendrika de Vries is a “daddy’s girl” until her father is deported from Nazi-occupied Amsterdam to a POW camp in Germany and her mother joins the Resistance. In the aftermath of her father’s departure, Hendrika watches as freedoms formerly taken for granted are eroded with escalating brutality by men with swastika armbands who aim to exterminate those they deem “inferior” and those who do not obey. As time goes on, Hendrika absorbs her mother’s strength and faith, and learns about moral choice and forced silence. She sees her hidden Jewish “stepsister” betrayed, and her mother interrogated at gunpoint. She and her mother suffer near starvation, and they narrowly escape death on the day of liberation. But they survive it all—and through these harrowing experiences, Hendrika discovers the woman she wants to become.

Netherland

This collection of intriguing stories offers profound insights into medical history. It highlights what all health professionals should know about the career path they have chosen. Each chapter presents a number of fascinating tales of legendary medical innovators, diseases that changed history, insightful clinical sayings, famous persons and their illnesses, and epic blunders made by physicians and scientists. The book relates the stories in history to what clinicians do in practice today

and is ideal reading for physicians, residents, medical students and all clinicians.

Heart: A History

Based on Gabor Maté's two decades of experience as a medical doctor and his groundbreaking work with the severely addicted on Vancouver's skid row, *In the Realm of Hungry Ghosts* radically reenvision this much misunderstood field by taking a holistic approach. Dr. Maté presents addiction not as a discrete phenomenon confined to an unfortunate or weak-willed few, but as a continuum that runs throughout (and perhaps underpins) our society; not a medical "condition" distinct from the lives it affects, rather the result of a complex interplay among personal history, emotional, and neurological development, brain chemistry, and the drugs (and behaviors) of addiction. Simplifying a wide array of brain and addiction research findings from around the globe, the book avoids glib self-help remedies, instead promoting a thorough and compassionate self-understanding as the first key to healing and wellness. *In the Realm of Hungry Ghosts* argues persuasively against contemporary health, social, and criminal justice policies toward addiction and those impacted by it. The mix of personal stories—including the author's candid discussion of his own "high-status" addictive tendencies—and science with positive solutions makes the book equally useful for lay readers and professionals.

Atlas of Paediatric Surgical Imaging

Set in the ghettos of wartime Warsaw, this is a sweeping, poignant, and heartbreaking novel inspired by the true story of one doctor who was determined to protect two hundred Jewish orphans from extermination. Deeply in love and about to marry, students Misha and Sophia flee a Warsaw under Nazi occupation for a chance at freedom. Forced to return to the Warsaw ghetto, they help Misha's mentor, Dr Janusz Korczak, care for the two hundred children in his orphanage. As Korczak struggles to uphold the rights of even the smallest child in the face of unimaginable conditions, he becomes a beacon of hope for the thousands who live behind the walls. As the noose tightens around the ghetto, Misha and Sophia are torn from one another, forcing them to face their worst fears alone. They can only hope to find each other again one day . . . Meanwhile, refusing to leave the children unprotected, Korczak must confront a terrible darkness.

The Good Doctor of Warsaw

Pharmacology Case Studies for Nurse Prescribers

"When the lives of a girl, who has terrifying visions, and a witch, who grants wishes to children in the woods, collide in the

most unexpected of ways, a dark, magical truth threatens to doom them both"--

Ain't Too Proud to Beg

This new and fully updated edition of Anaesthetic Aide-Memoire provides lists, data and information pertaining to anaesthesia.

White Coat Tales

This book is a comprehensive compendium of paediatric conditions, and covers clinical and diagnostic imaging for most diseases affecting neonates and children. Detailed descriptions of radiological signs aim to aid the diagnosis and identification of clinical symptoms. The book contains a large number of images taken from a collection of current and archival photos obtained from three generations of paediatric surgeons and radiologists which further illustrate the points made in the text. This book will act as a reference manual for any person in training who has to care for neonates and children in a hospital setting.

In the Realm of Hungry Ghosts

Offers advice on how a writer can turn real life experiences into a non-fiction narrative, including how to discover one's inner voice, and how to recreate past experiences through memories

The Waking Forest

Ann Burack-Weiss explores a rich variety of published memoirs by authors who cared for ill or disabled family members. Contrary to the common belief that caregiving is nothing more than a stressful situation to be endured, memoirs describe a life transforming experience-self-discovery, a reordering of one's priorities, and a changed view of the world. The Caregiver's Tale offers insight and comfort to individuals caring for a loved one and is a valuable resource for all health care professionals. Identifying common themes, Burack-Weiss describes how the illness career and social meaning of cancer, dementia, HIV/AIDS, mental illness, and chemical dependence affect the caregiving experience. She applies the same method to an examination of family roles: parents caring for ailing children, couples and siblings caring for one another, and adult children caring for aging parents. Jamaica Kincaid, Sue Miller, Paul Monette, Kenzaburo Oë, and Philip Roth are among the many authors who share their caregiving stories. Burack-Weiss provides an annotated bibliography of the more than one hundred memoirs and an accompanying chart to help readers locate those of greatest interest to them.

An Appetite for Violets

Named one of the Best Books of the Year by Kirkus Reviews and BookPage “Illuminates human fragility in tales both lyrical and soul-wrenching.” —Danielle Ofri, New York Times Book Review In this “artful, unfailingly human, and understandable” (Boston Globe) account inspired by his own experiences becoming a doctor, Terrence Holt puts readers on the front lines of the harrowing crucible of a medical residency. A medical classic in the making, hailed by critics as capturing “the feelings of a young doctor’s three-year hospital residency . . . better than anything else I have ever read” (Susan Okie, Washington Post), Holt brings a writer’s touch and a doctor’s eye to nine unforgettable stories where the intricacies of modern medicine confront the mysteries of the human spirit. Internal Medicine captures the “stark moments of success and failure, pride and shame, courage and cowardice, self-reflection and obtuse blindness that mark the years of clinical training” (Jerome Groopman, New York Review of Books), portraying not only a doctor’s struggle with sickness and suffering but also the fears and frailties each of us—doctor and patient—bring to the bedside.

Medical Secrets E-Book

Nurse prescribers are now practising within every discipline of nursing and midwifery, both in the community and the hospital setting. This much-needed book is aimed particularly at students on a non-medical prescribing (NMP) course as well as those nurses who are studying for their community practitioner non-medical prescribing qualification as part of the specialist practice programme. The book is also a useful resource for nursing students and registered nurses who administer and/or prescribe medicines. The authors offer a basic introduction to pharmacological concepts, embedded in specific conditions, through case studies and self-assessment questions. By utilising a case study approach, they enable the reader to link pharmacological concepts with clinical practice. Many of the conditions presented will be seen across all healthcare settings. In addition, the comprehensive glossary and list of abbreviations will enable students to understand some of the more technical terms used in the British National Formulary (BNF) and other prescribing sources. Reading this book, and carrying out the numerous self-assessment activities, will give the reader an appreciation of the value of having a sound pharmacological knowledge base in order to deliver safe practice, effective prescribing and improved patient care. Contents include: Introduction How the body affects drugs How drugs affect the body Types of adverse drug reactions and interactions Understanding and using the British National Formulary Adherence Children Stable angina Hypertension Heart failure Chronic obstructive pulmonary disease Neurological problems Gastrointestinal disorders Incontinence in adults Diabetes Mental health problems Eye problems Complex health needs and polypharmacy Palliative care The challenges of non-medical prescribing

Developing Models in Science Education

Covers all aspects of general surgery (including emergencies, practical procedures and self-assessment) and is ideal for revision and examination preparation. It is also a portable and convenient mini textbook for medical students, house officers and trainee surgeons. A succinct guide to general surgery. Covers basic issues of pre- and post-operative care; common surgical problems; and a systematic review of surgery by system. In the Kumar & Clark style and format. Ideal for revision.

12 Lead EKG Pocket Card

New York Times Book Review Best Book of the Year In a New York City made phantasmagorical by the events of 9/11, and left alone after his English wife and son return to London, Hans van den Broek stumbles upon the vibrant New York subculture of cricket, where he revisits his lost childhood and, thanks to a friendship with a charismatic and charming Trinidadian named Chuck Ramkisson, begins to reconnect with his life and his adopted country. As the two men share their vastly different experiences of contemporary immigrant life in America, an unforgettable portrait emerges of an "other" New York populated by immigrants and strivers of every race and nationality.

Internal Medicine: A Doctor's Stories

The first and only definitive biography of legendary Motown group, the Temptations The Temptations are an incomparable soul group, with dozens of chart-topping hits such as My Girl and Papa Was a Rollin Stone. From the sharp suits, stylish choreography, and distinctive vocals that epitomized their onstage triumphs to the personal failings and psycho-dramas that played out behind the scenes, Ain't Too Proud to Beg tells the complete story of this most popular—and tragic—of all Motown super groups. Based on in-depth research and interviews with founding Temptations member Otis Williams and many others, the book reveals the highly individual, even mutually antagonistic, nature of the group's members. Venturing beyond the money and the fame, it shares the compelling tale of these sometime allies, sometime rivals and reveals the unique dynamic of push and pull and give and take that resulted in musical genius. The first book to tell the whole story of Motown's greatest group, with all-new interviews and previously undiscovered sources and photographs Gives the last word on enduring Motown mysteries, including the deaths of Paul Williams and David Ruffin and the truth behind Ruffin's tumultuous romance with Tammi Terrell Reveals the secret "can't miss" formula behind the Temptations' thirty-seven chart hits Draws on more than one hundred interviews with the group's associates, industry figures, family members, and most

importantly, founding Temptation Otis Williams Ain't Too Proud to Beg takes a cohesive and penetrating look at the life and enduring legacy of one of the greatest groups in popular music. It is essential reading for fans of the Temptations, music lovers, and anyone interested in the history of American popular culture over the last fifty years.

Handbook of ICU Therapy

This handbook incisively explores challenges and opportunities that exist in efforts aimed at addressing inequities in mental health provision across the globe. Drawing on various disciplines across the humanities, psychology, and social sciences it charts the emergence of Global Mental Health as a field of study. It critically reflects on efforts and interventions being made to globalize mental health policies, and discusses key themes relevant for understanding and supporting the mental health needs of people living in diverse socio-economical and cultural environments. Over three rich sections, the handbook critically engages with Global Mental Health discourses. To help guide future efforts to support mental health and wellbeing in different parts of the world, the third section of the handbook consists of case studies of innovative mental health policy and practice, which are presented from a variety of different perspectives. This seminal handbook will appeal to a transnational community of post-graduate students, academics and practitioners, from global health to transcultural psychiatry and medical anthropology. It will be also of interest to researchers and clinical practitioners, policy makers and non-governmental organisations involved in cross-cultural mental health work.

Who's who in Entertainment

Sonic Skills

From rookie mistakes and runaway corpses to screaming dead men and unusual requests, a collection of stories by funeral directors.

The Caregiver's Tale

The book provides a clear overview of the various research stages of cardiac surgery, interventional cardiology, and cardiac anesthesia. It also deals with recent advances in minimally invasive surgery, robotic surgery, and many other innovations introduced in this field. However, aim of this volume is not only to describe the evolution of the discipline, but also to give the occasion of revisiting old and forgotten ideas that could be used successfully also nowadays if supported by modern technologies. With contributions by renowned international experts, the volume will be a very useful tool for students,

residents, cardiac surgery and anesthesia professionals, cardiologists, biomedical engineers, and researchers.

Unexpected Death in Childhood

A gentle maiden aunt who has been victimized for years unexpectedly retaliates through her talent for making life-sized dolls filled with honey. "The Youngest Doll," based on a family anecdote, is a stunning literary expression of Rosario Ferré's feminist and social concerns. It is the premier story in a collection that was originally published in Spanish in 1976 as *Papeles de Pandora* and is now translated into English by the author. The daughter of a former governor of Puerto Rico, Ferré portrays women loosening the constraints that have bound them to a patriarchal culture. Anger takes creative rather than polemical form in ten stories that started Ferré on her way to becoming a leading woman writer in Latin America. The upper-middle-class women in *The Youngest Doll*, mostly married to macho men, rebel against their doll-like existence or retreat into fantasy, those without money or the right skin color are even more oppressed. In terms of power and influence, these women stand in the same relation to men as Puerto Rico itself does to the United States, and Ferré stretches artistic boundaries in writing about their situation. The stories, moving from the realistic to the nightmarish, are deeply, felt, full of irony and black humor, often experimental in form. The imagery is striking: an architect dreams about a beautiful bridge that "would open and close its arches like alligators making love"; a Mercedes Benz "shines in the dark like a chromium rhinoceros." One story, "The Sleeping Beauty," is a collage of letters, announcements, and photo captions that allows chilling conclusions to be drawn from what is not written. The collection includes Ferré's discussion of "When Women Love Men," a story about a prostitute and a society lady who unite in order to survive, and one that illustrates the woman writer's "art of dissembling anger through irony." In closing, she considers how her experience as a Latin American woman with ties to the United States has brought to her writing a dual cultural perspective.

Progress in Obstetrics and Gynaecology

This book functions as a practical guide for the use of simulation in anesthesiology. Divided into five parts, it begins with the history of simulation in anesthesiology, its relevant pedagogical principles, and the modes of its employment. Readers are then provided with a comprehensive review of simulation technologies as employed in anesthesiology and are guided on the use of simulation for a variety of learners: undergraduate and graduate medical trainees, practicing anesthesiologists, and allied health providers. Subsequent chapters provide a "how-to" guide for the employment of simulation across wide range of anesthesiology subspecialties before concluding with a proposed roadmap for the future of translational simulation in healthcare. The *Comprehensive Textbook of Healthcare Simulation: Anesthesiology* is written and edited by leaders in the field and includes hundreds of high-quality color surgical illustrations and photographs.

The Palgrave Handbook of Sociocultural Perspectives on Global Mental Health

The national bestseller and undying testament of a wife's love for her husband as he embarks on the fight of his life. On a story assignment in France for the New York Times Magazine, Martha Weinman Lear has just escaped tourist-infested Cannes for a quiet pension in the hills behind the Riviera when she gets the call from New York. Her husband has suffered a massive heart attack and is in the hospital. Harold Lear, a fifty-three-year-old urologist and leader in the field of human sexuality research, suddenly finds himself in the helpless role of the patient. Ripping into the Lears' lives and marriage, Hal's coronary disease sends them on a journey through New York City's medical maze. With bittersweet poignancy, Lear chronicles her husband's valiant efforts to combat his sickness as more heart attacks and devastating postsurgical complications befall him. A stunning work of medical drama and journalism, Heartsounds is above all the gripping story of a passionate, enduring love.

Eliezer Ben-Yehuda

Echoes of Heartsounds

For families who have experienced the death of a child, their private tragedy is all too often exacerbated by an inappropriate or incompetent professional response. For the professional charged with the responsibility of having to deal with unexpected child deaths, such as a pediatrician, a police officer, or social worker, this title offers guidance on how to respond adequately to this tragic event but also places the subject in a larger social context, examining the history, epidemiology, causes, and contributory factors surrounding the death of a child. The book also covers the prevalence and types of death, the role of the police in an unexpected child death, how to support families, how to undertake a serious case review, and how to prevent child deaths in the future. Part of the prestigious NSPCC Wiley Series in Safeguarding Children - The Multi-Professional Approach.

Anaesthetic Aide Memoire

This New York Times–bestselling author's memoir of her own heart attack is “a refresher course in handling life's meanest challenges with grace” (Library Journal). It begins late one afternoon in her kitchen. There is no collapse, no massive pain. Just a slight fluttering sensation in her chest, then chills, and finally, nausea. Probably nothing to worry about, the doctor assures her on the phone. It doesn't sound like a heart attack. But it is. Heart attacks in women can look and feel dramatically different than they do in men, which is why they often go undiagnosed. But heart disease is the number-one

killer of American women—greater than all forms of cancer combined. When the doctor examines Lear the day after her episode, the verdict is shocking. So begins an account, filled with grace, humor, and ferocity, of her hard-won return to good health, beset by mysterious postsurgical complications and haunted by memories of her late husband when she finds herself in the same coronary unit in which she lost him all those years ago.

Heartsounds

A concise and comprehensive pocket card for 12 lead EKG filled with graphics for easy reference. A must have for both medical students and allied health professionals during cardiology rotations.

The Sanctuary of Illness

This guided tour of how AI will impact the future of work explores the ways both companies and employees can adapt to the new normal. Artificial intelligence is taking over. Ask Alexa to call a client or confirm your schedule for the day and she does so immediately. Ask her a question, give her a command, or just share a joke together, and she becomes your new best employee—one who never makes a mistake or calls out sick. In other words, Alexa can nix the need for millions of front-line workers. As companies race to keep up with advances in AI, employees must race just to keep their job. Author and public speaker Rhonda Scharf shows readers how a willingness to adapt to the new normal keeps both businesses and their employees relevant in these changing times. *Alexa Is Stealing Your Job* reveals what the future entails by diving into the world of AI and exploring how it impacts lives, careers, and the future.

The Publishers Weekly

Models and modelling play a central role in the nature of science, in its conduct, in the accreditation and dissemination of its outcomes, as well as forming a bridge to technology. They therefore have an important place in both the formal and informal science education provision made for people of all ages. This book is a product of five years collaborative work by eighteen researchers from four countries. It addresses four key issues: the roles of models in science and their implications for science education; the place of models in curricula for major science subjects; the ways that models can be presented to, are learned about, and can be produced by, individuals; the implications of all these for research and for science teacher education. The work draws on insights from the history and philosophy of science, cognitive psychology, sociology, linguistics, and classroom research, to establish what may be done and what is done. The book will be of interest to researchers in science education and to those taking courses of advanced study throughout the world.
