of crowded emergency departments, patients boarding in hallways waiting to be admitted, and daily ambulance diversions. The wide range of issues covered includes:

- The role and impact of the emergency department within the larger hospital and health care system.
- Patient flow and information technology.
- Workforce issues across multiple disciplines.
- Patient safety and the quality and efficiency of emergency care services.
- Basic, clinical, and health services research relevant to emergency care.
- Special challenges of emergency care in rural settings.

Hospital-Based Emergency Care is one of three books in the Future of Emergency Care series. This book will be of particular interest to emergency care providers, professional organizations, and policy makers looking to address the deficiencies in emergency care systems.

Dr. Hunt is also co-founder of the Nurse Advocacy Forum, providing advocacy, support, networking, professional development, leadership, and mentoring to students and new graduate nurses. She offers sound advice regarding the most current issues facing new nurses and practical strategies for obtaining a job of one’s choice, describes steps to take well before graduation to ensure a smooth transition to professional practice, and addresses the various indicators of academic achievement that are required for employment at some nursing facilities. She also discusses the benefits of externships, internships, professional development, and networking, how to develop a winning portfolio, and how to successfully transition into professional practice.
