RECREATIONAL FISHERIES

Best of Five MCQs for the MRCP Part 1

Combines clinical images, full-color illustrations and bulleted text to create a comprehensive, up-to-date resource for learning and review.

Get Through Final FRCR 2A

The importance of recreational fisheries is increasing in many transitional economies. These guidelines focus on recreational fisheries and describe strategies to promote environmentally sustainable and socially responsible management of such fisheries. To this end, the document details policy, managerial and behavioural recommendations for sustainable recreational fisheries.

External Beam Therapy

Organised along an organ and systems basis, this comprehensive reference source covers all diagnostic and interventional imaging techniques and modalities in an integrated, correlative fashion.

Companion for Obstetrics & Gynecology

This is an introductory book to radiological English on the basis that there are a lot of radiologists, radiology residents, radiology nurses, radiology students, and radiographers worldwide whose English level is indeterminate because their reading skills are much higher than their fluency. It is intended to help those health care professionals who need English for their work but do not speak English on a day-to-day basis.

MCQs for the First FRCR

The Comprehensive Textbook of Healthcare Simulation

This is the only revision guide you will need to pass the FRCM Intermediate examination. A new edition of the popular and successful Revision Notes for the MCEM Part B, this guide is mapped directly to the new FRCM Intermediate syllabus. The book is tailored to match all areas on which you may be tested, allowing candidates to revise accurately and efficiently for this challenging exam. To ensure effective revision, information is presented in concise notes and bullet points with visually memorable tools, such as tables and diagrams. Each chapter contains high-quality example SAQs so candidates can practice their exam technique, and 'key points' and 'exam tips' boxes to highlight the most important information. Drawing on the authors' experience and expertise, Revision Notes for the FRCM Intermediate SAQ paper is a trustworthy revision guide for this difficult and clinically focused examination, as well as a useful reference guide for practicing emergency medical doctors.

Revision Notes for the Final FRCR

Single best answer (SBA) questions have been introduced into the Final FRCR Part A examination of the Royal College of Radiologists in the UK for the first time. This book of 600 SBA questions and explanatory answers has been written to aid students preparing for the exam by current trainees in clinical radiology, coordinated through The Society of Radiologists in Training (SRT). Questions are grouped by topic and each topic is split into three papers of 70 questions, with explanations separated into chapters to enable readers to either attempt a whole mock exam paper or to browse question by question. The book is a bridge between a pure revision aid and a reference text, including a bibliography of useful references for further information. This is a companion volume to Final FRCR Part A Modules 4-6 Single Best Answer MCQs by the same team.

Final FRCR Part A Modules 4-6 Single Best Answer MCQs

The only revision book trainee radiologists need to succeed at the Final FRCR 2B examination. Written by a highly qualified team of authors, with a wealth of clinical experience and exam knowledge, it includes 42 long cases, as presented in the exam, with high quality images and accompanied by detailed answers.

Hepatobiliary and Pancreatic Cancer

This book provides an easily portable yet comprehensive guide to the PACES examination. It includes all of the most relevant clinical information for the PACES exam supplemented by tips supplied by the highly experienced chapter authors. The main aim of the book is to consolidate candidates' theoretical knowledge and help them apply it to the clinical examination scenario. In addition the book forms an excellent pocket reference for trainees in acute medicine, accident and emergency medicine, anaesthetics and critical care and general practice.

Access to Surgery

This book provides subject based Single Best Answer style questions for doctors on their Foundation Year rotations and candidates taking their MRCS exam. It includes SBA questions testing factual knowledge and clinical scenarios testing application of basic facts. Detailed answers and explanations enable doctors to revise without the need to read large Anatomy books.

Succeeding in the new FRCR Part 2a Exam

- Written by international contributors including specialists in surgery, hematology and oncology. - The information is presented in an instructive manner, allowing the physician to utilize the content immediately. - Discusses new techniques such as minimally invasive approaches to surgery and new cancer treatments.

Khan's Lectures: Handbook of the Physics of Radiation Therapy

Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance, effective dose to the pharmacologist. However, it might also stand for emetic dose. Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl

dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications. ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will make use of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, it is also very helpful for readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort.

Core Radiology

Key Topics in Otolaryngology and Head and Neck Surgery

Do you want to pass the FRCR Part 2a Exam first time and with a high score? Are you looking for a practice SBAs with detailed answer explanations? Succeeding in the FRCR Part 2a Exam is an essential part of completing radiology training. This comprehensive revision guide contains practice SBAs together with detailed answer explanations covering the six modules of the syllabus. Written by doctors who have successfully passed the FRCR Part 2a Exam together with a Professor of Radiology Teaching, the questions have been carefully created to simulate the style of the new format. This clear and timely.

FRCS General Surgery Section 1: 500 SBAs and EMIs

Best of Five MCQs for the MRCP Part 1 volumes 1-3 offers a comprehensive and trustworthy solution to anybody wishing to sit, pass, and excel at the Membership of the Royal College of Physicians Part 1 examination. Presented as a unique three-volume set, each volume features 375 high-quality practice questions on each of the medical systems and specialties in alphabetical order. Volume 1 features 375 Best of Five questions on clinical sciences, clinical haematology and oncology, cardiology, and clinical pharmacology, therapeutics and toxicology. All 375 questions contain questions written and reviewed by successful candidates and previous examiners, and are accompanied by detailed explanations and further reading, ensuring complete and successful revision for this challenging exam. Matched to the latest Royal College curricula in coverage and format, this dedicated resource provides readers with an accurate, authoritative and evidence-based companion to the MRCP Part 1.

Dictionary of Abbreviations in Medical Sciences

FRCS General Surgery Section 1: 500 SBAs and EMIs, Second Edition has been thoroughly revised to ensure the content remains completely up to date and accurate. With 50 new questions, FRCS General Surgery Section 1: 500 SBAs and EMIs offers the most relevant and comprehensive set of practice questions for trainees preparing for the exam. Chapters are mapped to the syllabus to deliver structured revision in all the key topics tested in the exam. Featuring a wealth of practice questions and fully descriptive answers, this book provides the essential revision tool to maximise chances of success. 500 SBA and EMI scenario based questions reflecting the formats encountered in the exam Answers feature concise, case-based descriptions to consolidate knowledge Extensive evidence-based referencing to relate theory to clinical practice Visually-enhanced answers to improve understanding of key concepts

Radiotherapy in Practice - Imaging

This book provides a bank of multiple-choice questions for candidates preparing for Part 2 of the Membership examination of the Royal Colleges of Physicians, the MRCP. The questions are arranged by subject area to enable structured revision and allow candidates to focus on particular areas where they feel less confident. The book has been written with a close focus on recent examinations, with the coverage of topics weighted to reflect the frequency with which they have appeared. The book is structured more as a manual than as a mock exam, and includes explanations for both correct and incorrect answers, focusing comprehensively on the fundamental principles of medical practice. As well as candidates for the MRCP, this book will also be of interest to medical students and students of related health sciences.

Practical Clinical Oncology

This book describes the pathways of dissemination of primary liver, biliary, and pancreatic neoplasms and proposes a practical and clinically driven approach to their imaging. The typical dissemination pathways for hepatocellular carcinoma, cholangiocarcinoma, exocrine pancreatic carcinoma, and neuroendocrine pancreatic tumors are systematically reviewed, and more unusual pathways are also documented. The content is presented in an extremely schematic way, with numerous high-quality graphical illustrations and multimodality images (US, CT, MRI, and PET) that are accompanied by clear explanatory text. The clinical significance of findings and potential therapeutic options are explained whenever appropriate. In addition, relevant background information is provided on the role of morphopathological drivers of cancer spread and anatomy.

Best of Five MCQs for the MRCP

This book of 600 SBA questions and explanatory answers has been written to aid students preparing for the exam by current trainees in clinical radiology, coordinated through The Society of Radiologists in Training (SRT).

Grainger and Allison's diagnostic radiology

This unique multiple choice question book contains 400 questions for the revised First FRCR exam. It comprehensively addresses the exam content and includes detailed answers, highlighted with key learning points throughout the text. Following the recent curriculum change this is the first book to address the significant changes within this crucial exam.

SBA's and EMQs for the MRCS Part A: A Bailey & Love Revision Guide

Written by experienced MRCOG question setters and course convenors, this text contains 500 practice questions with explanations and key references.

MRCOG Part One

A fully updated and illustrated handbook providing comprehensive coverage of all curriculum areas covered by the MRCOG Part 1 examination.

Final Fr Pt A Modules 1-3 Single Best an

SBAs for the Final FRCR is an invaluable guide to the new Single Best Answer (SBA) paper for the Final FRCR examination, providing over 350 SBA-style questions and referenced answers written in the style of the Royal College of Radiologists. Each question is accompanied by a concise yet detailed model answer carrying references and additional notes. The answers also act as a useful reference source for many of the key topics found in the syllabus. Questions are categorised in the same six modules that compose the FRCR 2A: • Cardiothoracic and vascular • Musculoskeletal and trauma • Gastro-intestinal • Genito-urinary, adrenal, obstetrics and gynaecology, breast • Paediatric • Central nervous system, head and neck Written by a group of authors who have recently successfully completed the exams, SBAs for the Final FRCR is an essential revision aid for all candidates undertaking the FRCR Part 2A.

MRCP Part 2

Reflecting the revised Primary FRCA exam, this book is structured according to the three specific areas covered in the curriculum: physics and clinical measurement, physiology, and pharmacology. Each section includes a brief introduction, a selection of MCQs, and answers including a brief explanation.

MCQs for the Primary FRCA

This is the first revision guide to map directly to the new structure of the FRCR Final Part A examination (CR2A). Spanning a broad range of topics, the book follows the core clinical radiology curriculum, covering all modalities. It is divided into 7 test papers, consisting of 120 mixed SBA-type questions with detailed answers in sequential order. Every answer is followed by a short explanation and relevant discussion around the topic with appropriate references. Each paper should take three hours to complete. Delivering over 20 hours of focused exam practice, this guide is a sound investment for trainee radiologists preparing for their Final Part A exam.

The Final FRCR

Best of Five MCQs for the MRCP Part 1 volumes 1-3 offers a comprehensive and trustworthy solution to anybody wishing to sit, pass, and excel at the Membership of the Royal College of Physicians Part 1 examination. Presented as a unique three-volume set, each volume features 375 high-quality practice questions on each of the medical systems and specialties in alphabetical order. Volume 1 features 375 Best of Five questions on clinical sciences, clinical haematology and oncology, cardiology, and clinical pharmacology, therapeutics and toxicology. All 375 questions contain questions written and reviewed by successful candidates and previous examiners, and are accompanied by detailed explanations and further reading, ensuring complete and successful revision for this challenging exam. Matched to the latest Royal College curricula in coverage and format, this dedicated resource provides readers with an accurate, authoritative and evidence-based companion to the MRCP Part 1.

Revision Notes for the FRCR Intermediate SAQ Paper

This textbook of oncology is aimed at specialist registrars in the early phase of their training. The basic concepts of cancer practice is touched upon in undergraduate and junior postgraduate years, but new trainees frequently seek additional resources to boost their knowledge in the field of Oncology. This title offers a concise account of the multidisciplinary management of common cancers and cancer-related problems appropriate to doctors at the start of their careers in this specialty. The content of the book is based on latest available evidence and reflects the training guidelines. Readable and concise style, aimed at the beginner in this specialty. Well illustrated in colour with graphics, clinical photographs and

radiographs. Section on research methodology. Approachable design in the 'Specialist Training in' series style.

The Unofficial Guide to Radiology

Radiology has advanced at a great pace, allowing us a greater appreciation of anatomical detail. This has in turn placed a greater demand on the trainee radiologist's knowledge of anatomy. With these facts in mind the authors have written this collection of MCQs on radiological anatomy for the FRCR Part One exam. The questions are closely modelled on the examination, highlighting favoured exam topics. To make efficient use of trainee radiologists time extended answers have been prepared.

SBA's for the FRCR 2A

Specialist Training in Oncology E-Book

Khan's Lectures: Handbook of the Physics of Radiation Therapy will provide a digest of the material contained in The Physics of Radiation Therapy. Lectures will be presented somewhat similar to a PowerPoint format, discussing key points of individual chapters. Selected diagrams from the textbook will be used to initiate the discussion. New illustrations will be used, wherever needed, to enhance the understanding of important concepts. Discussion will be condensed and often bulleted. Theoretical details will be referred to the textbook and the cited literature. A problem set (practice questions) will be provided at the end of each chapter topic.

The Pocketbook for PACES

The Comprehensive Textbook of Healthcare Simulation is a cohesive, single-source reference on all aspects of simulation in medical education and evaluation. It covers the use of simulation in training in each specialty and is aimed at healthcare educators and administrators who are developing their own simulation centers or programs and professional organizations looking to incorporate the technology into their credentialing process. For those already involved in simulation, the book will serve as a state-of-the-art reference that helps them increase their knowledge base, expand their simulation program's capabilities, and attract new, additional target learners. Features:

- Written and edited by pioneers and experts in healthcare simulation
- Personal memoirs from simulation pioneers
- Each medical specialty covered
- Guidance on teaching in the simulated environment
- Up-to-date information on current techniques and technologies
- Tips from "insiders" on funding, development, accreditation, and marketing of simulation centers
- Floor plans of simulation centers

from across the United States • Comprehensive glossary of terminology

MCQs in Anatomy for Part 1 FRCR

EMQs and MCQs for Medical Finals is a unique revision and study tool for Final Examination preparation. Practice questions cover a variety of key topics in both medicine and surgery, with the mixture of questions reflecting the general weighting in real exams. Comprehensive answer notes are provided for each question, explaining why a particular answer is correct and why others are not. Useful mnemonics and tips on remembering key facts help to consolidate learning.

EMQs and MCQs for Medical Finals

Revision Notes for the Final FRCR Part A summarises the core knowledge required for each of the six test papers that make up the exam, all in highly succinct bullet point format. The book takes the stress out of the revision process by providing candidates with a readymade set of highly synthesised and relevant notes that focus exclusively on the topics encountered in the exam. Thoroughly updated for the second edition, each chapter has been authored by successful exam candidates and in turn edited by consultant radiologists to provide highly relevant, high quality, high yield revision notes. Key Points Chapters mirror the structure of the exam: chest & cardiovascular, musculoskeletal and trauma, gastrointestinal & hepatobiliary, paediatrics, genitourinary, gynaecology & breast, and neuroradiology/head & neck Only essential facts are presented and are based entirely upon past questions from the exam Each revision topic is presented in a concise manner and exhaustive lists of differential diagnoses have been distilled into those conditions most often tested

Thoracic Medicine

This is a vital revision aid for postgraduate radiology students taking the Fellowship of the Royal College of Radiology (FRCR) Part 2 final exams. Part 2 comprises two elements: 2a includes a series of six multiple choice exams covering the major body systems, and 2b contains a written exam and an oral viva typically taken at the beginning of the fourth year of specialty training.

Upper Gastrointestinal Surgery

SBAs and EMQs for the MRCS Part A is an invaluable guide to sitting and passing the examination, which tests the candidates in their knowledge of the basic sciences as applied to surgical practice. Based on the highly successful Insider Medical MRCS Examination Clinical Course, this book facilitates the pathway for a novice clinician to pass this challenging

examination. College-approved, systematic and coherent questions for all the main systems are included, providing comprehensive coverage of the surgical curriculum. Answers are provided in brief at the foot of each question page for rapid reference, while full explanations of each appear in a separate section at the end of each chapter. The sections provide insider tips on how to pass the examination and identify mistakes commonly made by many candidates, whilst providing references to the key chapters within Bailey & Love's Short Practice of Surgery. With over 350 SBAs and 50 EMQs, this book will provide helpful pointers for further study throughout training, and is essential reading for those preparing to sit Part A of the MRCS examination.

Long Cases for the Final FRCR 2B

Imaging is a critical component of the management of patients having radiotherapy. This book covers the basic principles of the main imaging modalities; site specific chapters give best practice for individual tumour sites, and it also contains information on radioprotection and regulatory issues.

SBAs for the Final FRCA

This is the first book dedicated to providing exam practice in the new required single best answer question style for the FRCA. It contains 300 single best answer multiple choice questions and advice on how to approach revision and sitting the exam. There are also four 75-question exam papers, each with an answer section containing detailed explanations of the reasoning behind the answer and providing background information about each topic. SBAs for the Final FRCA may be used for examination practice and as a source of knowledge on many of the key topics in the syllabus. From the writing team behind SAQs for the Final FRCA, this book uses a similar style of challenging questions and well researched explanations to help the candidate through the new FRCA written paper. This is an invaluable tool for your exam preparation.

Radiological English

Bringing together many important topics rarely found in a single handbook on otorhinolaryngology, this book is designed primarily as a revision aid for postgraduate examinations. It provides the background and technical information essential for producing essays and short notes, as well as in vivas. Its easy-to-use format also makes it a useful reference for other workers in ear, nose and throat medicine. The 100 key topics in current ENT practice is presented in alphabetical order.

Part 2 MRCOG: 500 EMQs and SBAs

External beam therapy is the most common form of radiotherapy, delivering ionizing radiation such as high-energy x-rays, gamma rays, or electron beams directly into the location of the patient's tumour. Now in its third edition, this book is an essential, practical guide to external beam radiotherapy planning and delivery, covering the rapid technological advances made in recent years. The initial chapters give a detailed insight into the fundamentals of clinical radiotherapy. This is followed by systematic details for each tumour site commonly treated with radiotherapy, covering indications, treatment, and planning. The final chapter covers the all important aspect of quality assurance in radiotherapy delivery. This third edition has been fully updated and revised to reflect new techniques, including details of intensity modulated radiotherapy (IMRT), image guided radiotherapy (IGRT), stereotactic body radiotherapy (SBRT), and proton therapy. Written by experts in each field, External Beam Therapy is an invaluable companion to professionals and trainees in medical physics, therapeutic radiology, and clinical or radiation oncology. ABOUT THE SERIES Radiotherapy remains the major non-surgical treatment modality for the management of malignant disease. It is based on the application of the principles of applied physics, radiobiology, and tumour biology to clinical practice. Each volume in the series takes the reader through the basic principles of the use of ionizing radiation and then develops this by individual sites. This series of practical handbooks is aimed at physicians both training and practising in radiotherapy, as well as medical physics, dosimetrists, radiographers, and senior nurses.

RECREATIONAL FISHERIES

A complete guide to clinical oncology, covering the main treatment modalities and diagnosis and treatment strategies for specific tumour types.
