Represent Yourself in Court

More than one in seven Americans lives below the poverty line, the highest proportion in nearly two decades, and many cannot afford a lawyer to resolve non-criminal legal problems involving such issues as spousal abuse, eviction, child custody and consumer fraud. Government-financed legal-aid programs have long helped fill the gap, but the weak economy and enormous pressure on state and federal budgets are putting those programs at risk. The Legal Services Corp., a nonprofit that distributes federal funding to civil legal-aid programs nationwide, faces potentially steep budget cuts in Congress, and some conservatives want to end the program altogether. As money for legal-aid programs shrinks, a growing number of poor people are representing themselves in court -- often to their own detriment. Meanwhile, debate continues about whether the nation's 1 million private lawyers should be required to provide free legal help to the poor.

For increasingly data-savvy clients, lawyers can no longer give "it depends" answers rooted in anecdotal data. Clients insist that their lawyers justify their reasoning,

and with more than a limited set of war stories. The considered judgment of an experienced lawyer is unquestionably valuable. However, on balance, clients would rather have the considered judgment of an experienced lawyer informed by the most relevant information required to answer their questions. Data-Driven Law: Data Analytics and the New Legal Services helps legal professionals meet the challenges posed by a data-driven approach to delivering legal services. Its chapters are written by leading experts who cover such topics as: Mining legal data Computational law Uncovering bias through the use of Big Data Quantifying the quality of legal services Data mining and decision-making Contract analytics and contract standards In addition to providing clients with data-based insight, legal firms can track a matter with data from beginning to end, from the marketing spend through to the type of matter, hours spent, billed, and collected, including metrics on profitability and success. Firms can organize and collect documents after a matter and even automate them for reuse. Data on marketing related to a matter can be an amazing source of insight about which practice areas are most profitable. Data-driven decision-making requires firms to think differently about their workflow. Most firms warehouse their files, never to be seen again after the matter closes. Running a data-driven firm requires lawyers and their teams to treat information about the work as part of the service, and to collect, standardize, and analyze matter data from cradle to grave. More than anything, using data in a law practice requires a different mindset about the value of this information. This book helps legal professionals to develop this data-driven mindset.

This collection of original essays by leading and emerging scholars in the field examines the history, conditions, organization, and strategies of pro bono lawyering. Private Lawyers and the Public Interest: The Evolving Role of Pro Bono in the Legal Profession traces the rise and impact of the American Bar Association's campaign to hold lawyers accountable for a commitment to public service and to encourage public service within law schools. Combining empirical legal research

with reflections by practitioners and theorists about the meaning and practice of pro bono legal work, this collection of essays interrogates the public service ideals that are inscribed within the legal profession and places these ideals within a broader social, economic, ideological, and normative context. Particular attention is paid to the factors that explain why lawyers engage in pro bono work and the ways in which their views of pro bono are mediated by the institutional context of their legal practice. The book also explores the concept of "public" in public service and compares pro bono as a means of delivering legal services with other mechanisms such as state funding. Collectively, these essays investigate the evolving role of pro bono in the legal profession and in law schools, the relationship between pro bono ideals and pro bono in practice, the way that pro bono is shaped by external forces beyond the individual practitioner, and the multi-faceted nature of legal professionalism as expressed through pro bono practice.

"Focusing on family law practitioners, [this book] is a particularly appropriate resource given the unique promise that unbundling holds for family law litigants. In many jurisdictions, self-representation rates are highest in family cases. But, as any family law attorney (or family court litigant) knows, these are the case types that arguably benefit most from attorney involvement. Family issues are among the most sensitive and pressing matters that enter our civil justice system, and the outcomes of these cases can affect entire families for years to come. This important new book provides a crucial step forward in matching individuals with the family law services they need." -- Publisher's website.

America is a nation founded on justice and the rule of law. But our laws are too complex, and legal advice too expensive, for poor and even middle-class Americans to get help and vindicate their rights. Criminal defendants facing jail time may receive an appointed lawyer who is juggling hundreds of cases and immediately urges them to plead guilty. Civil litigants are even worse off; usually, they get no help at all navigating the maze of technical procedures and rules. The

same is true of those seeking legal advice, like planning a will or negotiating an employment contract. Rebooting Justice presents a novel response to longstanding problems. The answer is to use technology and procedural innovation to simplify and change the process itself. In the civil and criminal courts where ordinary Americans appear the most, we should streamline complex procedures and assume that parties will not have a lawyer, rather than the other way around. We need a cheaper, simpler, faster justice system to control costs. We cannot untie the Gordian knot by adding more strands of rope; we need to cut it, to simplify it.

Clinical legal education – the participation by law students in the giving of legal advice and representation to actual clients – is playing an increasingly important role within UK law schools. Pro bono – the provision of free legal advice or representation for those who may otherwise have no access to justice – is a vital part of the legal profession's commitment to the rule of law. This book is written by members of staff at Northumbria University's ground-breaking legal clinic, the Student Law Office. The authors, all of whom are qualified solicitors, have applied their long experience of clinical legal education into providing an authoritative and practical guide to all aspects of the subject, from valuable advice on establishing a law clinic and the professional and ethical issues involved, to practical skills such as interviewing, drafting and advocacy. The text includes detailed lists of further reading and a series of practical activities at the end of each chapter. A companion website featuring useful supplementary material can be found at

Can a justice system that doesn't protect the poor be considered truly just? We have all heard the phrase, "You have the right to an attorney." But did you know this is only true for those being accused of a crime in our country, not their victims? Without a legal advocate, innocent victims are left to fend for themselves. The church is called to do justice and love mercy. We are given the example of the Good Samaritan serving a victim in need, no matter the stigmas attached. But how are we to do this amidst the complexities of the current system? Bruce Strom left a successful legal career to start Administer Justice, a nonprofit organization providing free legal care to our most vulnerable neighbors. Gospel Justice calls churches across the nation to transform lives by serving both the spiritual and legal needs of the poor through participation in the Gospel Justice Initiative. It is not only a book for lawyers or pastors, though. Bruce Strom is calling each of us, the whole body of Christ, to join the cause of legal justice for the oppressed.

If you choose to have a gun in California, this book could keep you out of jail. Firearm ownership, possession, and use are individual constitutional rights that carry extraordinary responsibilities. Along with your responsibility to know and follow safety procedures, you also have increased responsibility to comply with all applicable state, federal, and local laws. Because of the complexity of these laws, inadvertent gun law violations by well-intentioned good people are increasingly common. In the politicized legal environment of California "gun-control" laws, the consequences of even an inadvertent violation can be severe. To protect yourself, you need to know the law. This book will help. This book explores, explains, and summarizes the firearm laws affecting firearm owners in California, and warns about common legal "traps" that California firearm owners often unintentionally fall into. When can you use deadly force? Who can possess a gun? When are you permitted to have a gun? Where can you have a gun? How must a gun be possessed? How do you get your gun rights back? Which guns are banned? How do you get your guns back from the police? Can you carry a gun in public? This book

answers these questions, and many others. There are over 800 California state statutes regulating the manufacture, distribution, sale, possession, and use of firearms. There are thousands of overlapping federal laws regulating firearms that apply in California. And there are hundreds of administrative regulations, local ordinances, and California Department Justice Firearms Bureau written and unwritten policies that also apply. With all the overlapping regulations, its no wonder that confusion runs rampant among California gun owners, as well as among police, prosecutors, and judges. This book will inform those who are subject to California's complex firearms laws so that they can avoid inadvertently violating them, and will educate those tasked with enforcing those laws so they can avoid mistaken arrests and prosecutions. Written by C.D. "Chuck" Michel, a firearms attorney with 20 years of experience representing the NRA, as well as firearm manufacturers, wholesalers, retailers, and gun owners, California Gun Laws: A Guide to State and Federal Firearm Regulations is an invaluable resource. Michel has been litigating civil and criminal firearm cases since 1991, many of which were high profile and attracted state and national media attention. His clients include the National Rifle Association (NRA), the California Rifle and Pistol Association Foundation (CRPAF), FFL Guard, gun manufacturers, wholesalers, retailers, and individual gun owners. He has represented thousands of individuals and companies charged with violating California's confusing firearms laws. He has litigated hundreds of firearms cases involving constitutional issues, including Second Amendment challenges, in both state and federal trial and appellate courts.

In *Justice for All*, Jim Newton, an award-winning journalist for the Los Angeles Times, brings readers the first truly comprehensive consideration of Earl Warren, the politician-turned-Chief Justice who refashioned the place of the court in American life through landmark Supreme Court cases whose names have entered the common parlance -- *Brown v. Board of Education*, *Griswold v. Connecticut*, *Miranda v. Arizona*, to name just a few. Drawing on unmatched access to government, academic, and private documents pertaining to Warren's life and career, Newton explores a fascinating angle of U.S. Supreme Court history while illuminating both the public and the private Warren. One of the most acclaimed and best political biographies of its time, *Justice for All* is a monumental work dedicated to a complicated and principled figure that will become a seminal work of twentieth-century U.S. history.

Free Legal Services for the Poor

An urgent plea for much needed reforms to legal education The period from 2008 to 2018 was a lost decade for American law schools. Employment results were terrible. Applications and enrollment cratered. Revenue dropped precipitously and several law schools closed. Almost all law schools shrank in terms of students, faculty, and staff. A handful of schools even closed. Despite these dismal results, law school tuition outran inflation and student indebtedness exploded, creating a truly toxic brew of higher costs for worse results. The election of Donald Trump in 2016 and the subsequent role of hero-lawyers in the “resistance” has made law school relevant again and applications have increased. However, despite the strong early returns, we still have no idea whether law schools are out of the woods or not. If the Trump Bump is temporary or does not result in steady enrollment increases, more schools will close. But if it does last, we face another danger. We tend to hope that crises bring about a process of creative destruction, where a downturn causes some businesses to fail and other businesses to adapt. And some of the reforms needed at law schools are obvious: tuition fees need to come down, teaching practices need to change, there should be greater regulations on law schools that fail to deliver on employment and bar passage. Ironically, the opposite has happened for law schools: they suffered a harrowing, near-death experience and the survivors look like they’re going to exhale gratefully and then go back to doing exactly what led them into the crisis in the first place.

The urgency of this book is to convince law school stakeholders (faculty, students, applicants, graduates, and regulators) not to just return to business as usual if the Trump Bump proves to be permanent. We have come too far, through too much, to just shrug our shoulders and move on.

Europe and the US to examine whether a single, unique Nordic model exists. Contextualizing Nordic legal aid in relation to welfare ideology and human rights, Hammerslev and Halvorsen Rønning consider whether flaws in the welfare state exist, and how legal aid affects disadvantaged citizens. Concluding that the five countries all have very different legal aid schemes, the authors explore an important general trend: welfare states increasingly outsourcing legal aid to the market and the third sector through both membership organizations and smaller voluntary organizations. A methodical and compassionate text, this book will be of special interest to scholars and students of the criminal justice, the welfare state, and the legal aid system.
