Laughter in the Trenches: Humour and Front Experience in German First World War Narratives explores the appearances and functions of humour and laughter in selected novels and short stories, based on autobiographical experiences, written by authors during the war and in the Weimar Era (1919-1933). This study focuses on popular and lesser-known works of German literature that played an important role in the socio-political life of the Weimar Republic: Storm of Steel by Ernst Jünger (1920), Advance from Mons 1914 by Walter Bloem (1916), The Case of Sergeant Grischa by Arnold Zweig (1927), and All Quiet on the Western Front by Erich Maria Remarque (1929). The author shows that these works often share surprisingly similar narrative strategies in describing humorous experiences and soldier laughter to justify direct violence and oppressive power structures, regardless of the works' ideological assignment and their popular and critical reception. This book also examines the parodic imitations of All Quiet on the Western Front, the German text All Quiet on the Trojan Front by Emil Marius Reuark (1930) and the American film So Quiet on the Canine Front by Zion Myers and Jules White (1931) as significant polemical contributions that use humoristic strategies to stress or undermine elements of the original text.

Emerging Churches

The CNN Effect examines the relationship between the state and its media, and considers the role played by the news reporting in a series of 'humanitarian' interventions in Iraq, Somalia, Bosnia, Kosovo and Rwanda. Piers Robinson challenges

traditional views of media subservience and argues that sympathetic news coverage at key moments in foreign crises can influence the response of Western governments.

The CNN Effect

Presents the author's predictions about the next century of Christianity in America while recommending seven fundamental practices that may help revitalize and authenticate the faith.

Nodes of Contemporary Finnish Literature

Despite the explosion of interest in the "global 1968," the arts in this period - both popular and avant-garde forms - have too often been neglected. This interdisciplinary volume brings together scholars in history, cultural studies, musicology and other areas to explore the symbiosis of the sonic and the visual in the counterculture of the 1960s.

The Global Sixties in Sound and Vision

Groundbreaking research based on a national database of over 200,000 churches shows that the overall United States population is growing faster than the church. The director of the American Church Research Project, Dave Olson, has worked to analyze church attendance, showing that it is virtually unchanged from fifteen years ago while our population has grown by fifty-two million people. What does this mean for you, your church, and the future of Christianity in North America? The American Church in Crisis offers unprecedented access to data that helps you understand the state of the church today. "We live in a world that is post-Christian, postmodern, and multiethnic, whether we realize it or not," says the author. This book not only gives a realistic picture that confirms hunches and explodes myths, but it provides insight into how the church must change to reach a new and changed world with the hope of the gospel. Readers will find a richly textured mosaic with optimistic and challenging stories. Charts, diagrams, and worksheets provide church leaders and motivated church members with a stimulating read that will provoke much discussion. Questions for discussion accompany the chapters.

Living Free Course Manual

This book analyzes postwar literary works on large area bombings of German cities both in the context of trauma theory and questions of guilt and shame about Germany's Nazi past, embedding the recent debate surrounding the air war of World War II and its influence on German culture in a broader historical, societal, and psychological context.

The history of individual seascapes has recently become a vibrant and innovative field of research. Nonetheless, connections between seas (entre mers) and the imagination of lands "beyond the Sea" (Outre-mer) have only rarely been focused in these contexts. This is precisely the main aim of the present collection of essays, which results from a conference held at Heidelberg University. The individual papers treat various aspects of transmarine connections, their regulation and mental expansion in an Indo-Mediterranean context, which comprises the Mediterranean, the Indian Ocean, as well as projections of seaways to India on other maritime areas, thus spanning a wide chronological spectrum from Egyptian antiquity to the onset of the Atlantic Age in the sixteenth century. Passion for Jesus

CultureShock! Austria

In a dark and perilous realm, a nameless outcast seeks a voice, a past, and a future: “A dazzling debut” (Jennifer Roberson). In all of Erith, there is perhaps no one as wretched as the nameless mute foundling confined to the lowest depths of Isse Tower. Abused by many and despised by all, the pathetic creature lives without memories in the shadows. The amnesiac longs to escape—to roam the wild landscape in search of a past, a name, a destiny—but dangers surround the tower. Only flying ships and majestic winged horses carrying important visitors can reach the castle safely, landing high above the ground on its battlements. The local servants whisper about malevolent creatures that roam the forests and bear no love for humankind. Escape seems impossible in this treacherous world of wights and monsters. Praised as Australia’s J. R. R. Tolkien, Cecilia Dart-Thornton has set a towering new standard for fantasy fiction, earning the respect and acclaim of readers, reviewers, and some of the world’s most renowned fantasists. With roots firmly embedded in the ancient folklore of the British Isles, *The Ill-Made Mute*—the opening volume of Dart-Thornton’s magnificent *Bitterbynde Trilogy*—introduces fantasy lovers to an unforgettable character whose remarkable adventures rival the epic trials of the Bagginses and the tales of *The Silmarillion*.

The Flying Mountain

Cognitive linguists are convinced that the nature of linguistic structures is strongly influenced by the way we experience and perceive the world and by how we conceptualize and construe these experiences and perceptions in our minds. At the same time, the study of linguistic structure and usage is credited with the potential to open windows to how our minds work. The present volume collects papers investigating linguistic phenomena that reflect the key cognitive processes of metaphor, metonymy and conceptual blending, which have proven to be highly influential in linguistic conceptualization. Theoretical and methodological issues, such as metaphor identification and the relevance of the target domain for children's understanding of metaphor, are focused on in the first section. The second and third parts are devoted to the application of the theoretical frameworks of the conceptual theory of metaphor and metonymy and the theory of conceptual blending to linguistic data. The contributions critically explore the explanatory potential of these theories, build bridges between them, link them with other approaches and notions (such as construction grammar, common ground and stance/evaluation), and uncover conceptual regularities and cognitive models that underlie and shape our language use in specific domains. The linguistic structures under consideration span the range from compounds and premodified noun phrases to constructions and texts such as jokes and political speeches. Methods applied include psycholinguistic experiments, analyses of data culled from authentic language corpora and discourse-analytical approaches.

War in the Neighborhood

In February 1942, intelligence officer Victor Jones erected 150 tents behind British lines in North Africa. "Hiding tanks in Bedouin tents was an old British trick," writes Nicholas Rankin. German general Erwin Rommel not only knew of the ploy, but had copied it himself. Jones knew that Rommel knew. In fact, he counted on it--for these tents were empty. With the

deception that he was carrying out a deception, Jones made a weak point look like a trap. In *A Genius for Deception*, Nicholas Rankin offers a lively and comprehensive history of how Britain bluffed, tricked, and spied its way to victory in two world wars. As Rankin shows, a coherent program of strategic deception emerged in World War I, resting on the pillars of camouflage, propaganda, secret intelligence, and special forces. All forms of deception found an avid sponsor in Winston Churchill, who carried his enthusiasm for deceiving the enemy into World War II. Rankin vividly recounts such little-known episodes as the invention of camouflage by two French artist-soldiers, the creation of dummy airfields for the Germans to bomb during the Blitz, and the fabrication of an army that would supposedly invade Greece. Strategic deception would be key to a number of WWII battles, culminating in the massive misdirection that proved critical to the success of the D-Day invasion in 1944. Deeply researched and written with an eye for telling detail, *A Genius for Deception* shows how the British used craft and cunning to help win the most devastating wars in human history.

Pink Labor on Golden Streets

New York City's Lower East Side was a well-known landing strip for recent arrivals in the United States. For more than a century it was home to thriving communities of artists, radicals and working class families. In a gripping series of fictionalized accounts, political artist Seth Tobocman illustrates the L.E.S. of the late 80s an era of homelessness and

gentrification, ACT UP and the AIDS epidemic, tent cities and squatted apartment buildings, street brawls between punks and skinheads and, above all, an emerging gulf between rich and poor. "

A Genius for Deception

Freedom Class Manual

This book examines phenomena from Finnish and Finnish-Swedish literature written in the years between the 1980s and the first decade of the new millennium. Its objective is to study this interesting era of literary history in Finland and to sketch some possible directions for future development by identifying literary turning points which have already occurred. The nine articles found in the anthology are written by some of the most prominent literary scholars in Finland. These distinguished authors examine such varied topics as postmodern allegories, feminism, historiography, autobiographic writing, modern subjects in postmodern conditions, metalyrical poetry, realistic involvement in the novel, successful children's literature, and the intertextuality of Sofi Oksanen's famous novel *Purge*.

The Next Christians

This book analyses intersemiotic translation, where the translator works across sign systems and cultural boundaries. Challenging Roman Jakobson's seminal definitions, it examines how a poem may be expressed as dance, a short story as an olfactory experience, or a film as a painting. This emergent process opens up a myriad of synaesthetic possibilities for both

translator and target audience to experience form and sense beyond the limitations of words. The editors draw together theoretical and creative contributions from translators, artists, performers, academics and curators who have explored intersemiotic translation in their practice. The contributions offer a practitioner's perspective on this rapidly evolving, interdisciplinary field which spans semiotics, cognitive poetics, psychoanalysis and transformative learning theory. The book underlines the intermedial and multimodal nature of perception and expression, where semiotic boundaries are considered fluid and heuristic rather than ontological. It will be of particular interest to practitioners, scholars and students of modern foreign languages, linguistics, literary and cultural studies, interdisciplinary humanities, visual arts, theatre and the performing arts.

Windows to the Mind

"Freedom" is at the heart of the life and message of Jesus Christ, and the mission of His followers. That is what this book is about to help you identify where, why, and how you live in bondages and slavery instead of in God's freedom, power, and hope. Through Christ's power, you can break out of those bondages to live in the freedom Jesus purchased for you. Jesus said, "If you abide in My Word and My Word abides in you, you will know the truth, and the truth will set you free if the Son sets you free you are truly free." (John 8:32, 36). And the Apostle Paul reiterated, "It is for freedom Christ has set us free" (Galatians 5:1, paraphrased). This book is designed to provide you with an overview of truths that depict God's design for you and me to live an overcoming life, a life of His presence and power, a life that not only experiences powerful transformation but can lead others into that same transformation.

When Heaven Invades Earth

A time when young men ride through the night smashing and burning the symbols of their oppression. The Mortymer family have left their home in the iron-making country of Blaenafon to seek work in the coal mines of the south. Young Jethro Mortymer decides that he must join the rioters in their bitter struggle even as he is tortured by his own struggle to conceal the love he has for the beautiful Mari, his brother's wife. THE HOSTS OF REBECCA is a brilliant continuation of Alexander Cordell's classic story of mid-nineteenth century Wales which began with

Bill Johnson not only teaches the supernatural, he imparts it by changing the way we think. If you are not walking in the miraculous, you're living far below your birthright! By laying a carefully constructed biblical foundation for walking in the supernatural power of God, When Heaven Invades Earth provides all the equipment you need to experience miracles every day.

Big 10 Discipleship

Comparative Approaches to Informal Housing Around the Globe brings together historians, anthropologists, political scientists, sociologists, urban planners and political activists to break new ground in the globalisation of knowledge about informal housing. Providing both methodological reflections and practical examples, they compare informal settlements, unauthorised occupation of flats, illegal housing construction and political squatting in different regions of the world. Subjects covered include squatter settlements in Kyrgyzstan and Kazakhstan, squatting activism in Brazil and Spain, right-wing squatting in Germany, planning laws and informality across countries in the Global North, and squatting in post-Second World War UK and Australia.

Trauma and Guilt

The recent financial crisis has awakened a renewed sensibility to ethics in business and management, and an increasing interest in a better understanding of how ethics and economics are intertwined. Managers and executives must understand not just the moral value of ethical behaviour, but also how this can strengthen and benefit the organization.

Translating across Sensory and Linguistic Borders

The proposition that there is a correlation between language and culture or culture-specific ways of thinking can be traced back to the views of Herder and von Humboldt in the late 18th and early 19th centuries. It is generally accepted today that a language, especially its lexicon, influences its speakers' cultural patterns of thought and perception in various ways, for example through a culture-specific segmentation of the extralinguistic reality, the frequency of occurrence of particular lexical items, or the existence of keywords or key word combinations revealing core cultural values. The aim of this volume is to explore the cultural dimension of a wide range of preconstructed or semi-preconstructed word combinations in English. The 17 papers of the volume are divided into four sections, focusing on particular lexemes (e.g. enjoy and its collocates), types of word combinations (e.g. proverbs and similes), use-related varieties (such as the language of tourism or answering-machine messages), and user-related varieties (such as Aboriginal English or African English). The sections are preceded by a prologue, tracing the development of the study of formulaic language, and followed by an epilogue, which draws together the threads laid out in the various papers. The relation between language and culture in general has been explored in a number of important works over the past ten years. However, the study of the relation between English phraseology and culture in particular has been largely neglected. This volume is the first book-length publication devoted entirely to this topic.

A European Youth Revolt

A template for pranksters, artists, adventurers and anyone interested in rampant creativity, for years to come. Tales Of The San Francisco Cacophony Society tells the history of the most influential underground cabal that you have never heard of. Rising from the ashes of the mysterious and legendary Suicide Club, The Cacophony Society, at its zenith, hosted chapters in over a dozen major cities, and influenced much of what was once called the underground. Flash Mobs, Urban Exploration, and Culture Jamming are a few of the pop culture trends that Cacophony helped kick off. Chuck Palahniuk's Fight Club, Burning Man and Internet social networking powerhouse Laughing Squid were informed and inspired by Cacophony. The Burning Man Festival actually began as a Cacophony event as did the annual, and now world-wide SantaCon. Cacophony events could range from something as simple as climbing the Golden Gate Bridge or having a discussion over drinks about a movie seen together, to something as elaborate as The Atomic Café -- an event involving a hundred bedraggled "nuclear holocaust Survivors" mounting elaborate costumed rituals throughout the bowels of a massive abandoned tooth paste factory. Yes. Cacophony was that strange. Cacophony's heyday was concurrent with the rise of the internet. The story of this group is of historical significance for this reason. Information about upcoming pranks, street theater and other events hosted by Cacophony was spread by paper flyers posted on telephone poles and left in coffee shops, by the Societies mailer "Rough Draft" and by word of mouth. Then, with the genesis of personal computing and social networking, the jokers, artists and troublemakers of Cacophony were among some of the first non-geeks to explore the power of this new and world changing way of communicating. Burning Man, Urban Exploration, flash mobs and the like were avenues of creativity

with their roots in Cacophony, that spread like wildfire through the mechanism of these new communication technologies.

Laughter in the Trenches

During the early 1980s, large parts of Europe were swept with riots and youth revolts. Radicalised young people occupied buildings and clashed with the police in cities such as Zurich, Berlin and Amsterdam, while in Great Britain and France, 'migrant' youths protested fiercely against their underprivileged position and police brutality. Was there a link between the youth revolts in different European cities, and if so, how were they connected and how did they influence each other? These questions are central in this volume. This book covers case studies from countries in both Eastern and Western Europe and focuses not only on political movements such as squatting, but also on political subcultures such as punk, as well as the interaction between them. In doing so, it is the first historical collection with a transnational and interdisciplinary perspective on youth, youth revolts and social movements in the 1980s.

Islamophobia in Muslim Majority Societies

In the last decade, Islamophobia in Western societies, where Muslims constitute the minority, has been studied extensively.

However, Islamophobia is not restricted to the geography of the West, but rather constitutes a global phenomenon. It affects Muslim societies just as much, due to various historical, economic, political, cultural and social reasons. Islamophobia in Muslim Majority Societies constitutes a first attempt to open a debate about the understudied phenomenon of Islamophobia in Muslim majority societies. An interdisciplinary study, it focuses on socio-political and historical aspects of Islamophobia in Muslim majority societies. This volume will appeal to students, scholars and general readers who are interested in Racism Studies, Islamophobia Studies, the Middle East and North Africa (MENA) region, Islam and Politics.

Culture of Revival

Phraseology and Culture in English

Revival is birthed in the heart of God and transferred to anyone who has faith for the impossible. When John Wesley first visited Herrnhut, Germany, to see the Moravian movement, his response was, "When will this Christianity fill the earth?" The kingdom of God is indeed filling the earth today. In this book you will learn how to maintain an unoffendable heart; use your voice effectively to prepare the way; demonstrate a lifestyle of love; marry the land; live effectively in consecrated community; be grounded in the Word; persevere to win the prize; be activated through intimacy with Christ. No matter your age, you can be a part of this band of committed disciples who come together under the banner of holy devotion and unwavering commitment to contend for God's kingdom to come.
