The 16th edition of McGregor on Damages maintains the standards of its forebears and provides an authoritative text on common law damages. Detailed consideration is given to all relevant points of law and practice relating to the manifold aspects of the subject. The second supplement includes the many changes in this area of law since publication of the previous edition in 1988 such as: the decisions of the Court of Appeal and House of Lords in the recent BBL litigation, developments in exemplary damages, and the appropriate discount rate for multipliers in personal injury cases.

Commercial Awareness for Lawyers

Landmark Cases in Defamation Law is a diverse and engaging edited collection that brings together eminent scholars from the United Kingdom, the United States, Australia, Canada and New Zealand to analyse cases of enduring significance to defamation law. The cases selected have all had a significant impact on defamation law, not only in the jurisdiction in which they were decided but internationally. Given the formative influence of English defamation law in the United States, Australia, Canada and New Zealand, the focus is predominantly on English cases, although decisions of the United States and Australia are also included in the collection. The authors all naturally share a common interest in defamation law but bring different expertise and emphasis to their respective chapters. Among the authors are specialists in tort law, legal history and internet law. The cases selected cover all aspects of defamation law, including defamatory capacity and meaning; practice and procedure; defences; and remedies.

editions have played a major role in establishing the central importance of the subject for private and commercial law. The text is comprehensive in coverage and written by highly respected scholars who analyse and explain the principles governing claims in unjust enrichment, demonstrating how these principles have been applied through detailed discussion of case-law. The book is frequently cited in court and continues to set the agenda for future developments in the field. The new 9th Edition is completely up-to-date and contains detailed discussion of important decisions since the last edition. Many chapters have been rewritten to take account of significant new cases, and their impact on topics including the valuation of enrichments, the recovery of benefits from remote recipients, the recovery of benefits transferred by mistake, the recovery of money paid as tax that is not due, and the content of the tracing rules and their significance for the award of proprietary remedies."

The Law of Defamation and the Internet

Written by the widely respected author of *The Law of Defamation and the Internet*, this book analyses the modern English law of defamation in a way that consolidates into a coherent structure its various sources - the common law, earlier statutory reforms, European and other foreign influences, and the changes effected by the Defamation Act 2013 (UK). As well as examining the implications of the 2013 reforms, Collins on Defamation dissects, in context, the very large number of ambiguous and contestable questions of construction in, and possibly unintended consequences of, the new law. The book draws on authorities from a wide international research base to explain the application of relevant principles, including the principles applicable to multi-jurisdictional publications and actions involving one or more foreign litigants. Full comparative coverage of Australian and NZ authorities and legislation is included. As well as providing encyclopaedic analysis of the law of defamation, the work contains detailed coverage of relevant conflict of law principles, and important and emerging related causes of action, including misuse of private information, malicious falsehood, data protection rights, and protection from harassment. Comprehensive tables of recent

damages awards, and an extensive set of precedents for common notices and pleadings, are also included. This book is an essential text for any practitioner in the field. The Law of Defamation in Singapore and Malaysia

This concise treatise on defamation is both lucid and comprehensive. Previous editions have been cited frequently by first instance and appellate courts. The fully updated fourth edition considers the very significant changes to the law of libel and slander brought about by the Defamation Act 2013, and the law's continuing attempts to meet the challenges posed by publications on the internet and via social media. Where the law is uncertain, the authors suggest a solution which in their view accords with principle. In recognition of the fact that, increasingly, practitioners are called upon to advise on related causes of action, the book includes chapters on malicious falsehood and misuse of private information and has been expanded, in the fourth edition, to address harassment and data protection. This leading authority on defamation law and related areas will be an essential addition to the library of all practitioners specialising in these fields, as well as students and generalists who require a clear overview of the subject.

Sack on Defamation

Featuring all-new coverage and a convenient new two-volume looseleaf format, here's today's authoritative, up-to-date guide through the labyrinth of defamation law. Now expanded to more than 1,400 pages of definitive legal, tactical, and strategic insight into libel, slander, and related causes of action, the new Third Edition of *Sack on Defamation* reaffirms this treatise's position as "the standard text in the field against which all others must be judged" (Floyd Abrams, Cahill, Gordon, and Reindel, New York City). Citing thousands of cases, the work takes you securely through this complex field, from its common law and constitutional foundations to the more recent influential case law to the crucial and often confusing splits of judicial authority. Designed for judges, teachers, journalists, and lawyers on both sides of the table, *Sack on Defamation* helps practitioners and their clients: . Ensure written and oral communications are less likely to result in suit. . Avoid or limit lawsuits by issuing retractions and taking other mitigating steps. . Persuade judges to dismiss complaints or grant summary judgments.

Government wants to ensure that the threat of libel proceedings is not used to frustrate robust scientific and academic debate, or to impede responsible investigative journalism and the valuable work undertaken by nongovernmental organisations. Issues included in the draft Bill are as follows: a new requirement that a statement must have caused substantial harm in order for it to be defamatory; a new statutory defence of responsible publication on matters of public interest; a statutory defence of truth (replacing the current common law defence of justification); a statutory defence of honest opinion (replacing the current common law defence of fair/honest comment); provisions updating and extending the circumstances in which the defences of absolute and qualified privilege are available; introduction of a single publication rule to prevent an action being brought in relation to publication of the same material by the same publisher after a one year limitation period has passed; action to address libel tourism by ensuring a court will not accept jurisdiction unless satisfied that England and Wales is clearly the most appropriate place to bring an action against someone who is not domiciled in the UK or an EU Member State; removal of the presumption in favour of jury trial, so that the judge would have a discretion to order jury trial where it is in the interests of justice.

Cyber Rights

'Because the law of defamation is about reputation and thus necessarily about community and social attitudes, Baker's serious empirical analysis of just those community and social attitudes about defamation and about reputation is a novel and important contribution to the literature on libel and slander. It will be a useful corrective to the various empirically unsupported assertions that dominate the court cases and the academic literature on the topic.' Frederick Schauer, University of Virginia, US 'This book shines a welcome light on a neglected area of defamation law: how juries and judges determine what it means to say a statement is defamatory. The author employs well-designed empirical research to provide concrete answers, and the reform he proposes is sensible and workable. The book should be must-reading for anyone who seeks to understand how the law does or does not protect reputation especially lawyers and judges who try libel cases.' David A. Anderson, University of Texas Law School, US 'When defamation jurors decide whether a statement about someone is "defamatory", the question for them to answer is whether it would generate disapproval among "ordinary reasonable

people". It has generally been assumed that they answer this question correctly. What Roy Baker discovered through empirical research is that this assumption may often be wrong. This fascinating and important book sets out his findings, alongside a broad-ranging and perceptive analysis of the law's approach to defining "defamatory".' Michael Chesterman, The University of New South Wales, Australia 'This refreshingly original work is an essential addition to the libraries of all defamation aficionados. Through empirical evidence, including interviews with judges and practitioners, and surveys of the general public, Dr Baker convincingly demonstrates the human propensity to overestimate the negative effect that defamatory imputations may have on other people ("the third person effect"). The conventional "ordinary reasonable person" test becomes in practice an "ordinary unreasonable person" test, regrettably lowering the defamation threshold and further curtailing freedom of communication.' Michael Gillooly, The University of Western Australia The common law determines whether a publication is defamatory by considering how 'ordinary reasonable people' would respond to it. But how does the law work in practice? Who are these 'ordinary reasonable people' and what do they think? This book examines the psychology behind how judges, juries and lawyers decide what is defamatory. Drawing on a thorough examination of case law, as well as extensive empirical research, including surveys involving over 4,000 members of the general public, interviews with judges and legal practitioners and focus groups representing various sections of the community, this book concludes that the law reflects

fundamental misperceptions about what people think and how they are influenced by the media. The result is that the law tends to operate so as to unfairly disadvantage publishers, thus contributing to defamation law's infamous 'chilling effect' on free speech. This unique and controversial book will appeal to judges, defamation law practitioners and scholars in various common law jurisdictions, media outlets, academics engaged in researching and teaching torts and media law, as well as those working within the disciplines of media or communications studies and psychology. Anyone concerned with the law's interaction with public opinion, as well as how people interpret the media will find much to interest them in this fascinating study.

A Digest of the Law of Libel and Slander

A first-person account of the fight to preserve First Amendment rights in the digital age. Lawyer and writer Mike Godwin has been at the forefront of the struggle to preserve freedom of speech on the Internet. In *Cyber Rights* he recounts the major cases and issues in which he was involved and offers his views on free speech and other constitutional rights in the digital age. Godwin shows how the law and the Constitution apply, or should apply, in cyberspace and defends the Net against those who would damage it for their own purposes. Godwin details events and phenomena that have shaped our understanding of rights in cyberspace—including early antihacker fears that colored law enforcement activities in the early 1990s, the struggle between the Church of

Scientology and its critics on the Net, disputes about protecting copyrighted works on the Net, and what he calls "the great cyberporn panic." That panic, he shows, laid bare the plans of those hoping to use our children in an effort to impose a new censorship regime on what otherwise could be the most liberating communications medium the world has seen. Most important, Godwin shows how anyone—not just lawyers, journalists, policy makers, and the rich and well connected—can use the Net to hold media and political institutions accountable and to ensure that the truth is known.

The Law of Torts

Benjamin's Sale of Goods provides practitioners with high level comprehensive advice on case law and legislation regarding sale of goods internationally.

Torts

The Internet has revolutionized the way in which we communicate. In a few short years, it has made instantaneous global communication available affordably to anyone with a computer and an Internet connection. The Internet is simultaneously a bastion of free speech and a medium of potentially limitless international defamation. The first edition of *The Law of Defamation and the Internet*, was the first text to analyze comprehensively the application of defamation laws in the United Kingdom and Australia to material published via the Internet. The second edition builds on the strengths of the first. As well as comprehensively updating the law, the coverage of European and American law has been substantially expanded, as has the coverage of 'hot' topics such as liability for linking and framing, and jurisdiction over foreign publications.
