Expressivism was the first European theory of art significantly to challenge the imitation theory rooted in Greek antiquity. Modern expressivism places the focus on the individual human subject as committed to finding 'les mots pour le dire', such that art becomes the most privileged means of self-realization. In his survey of modern theories, Gratton reveals both the instability of the concept 'expressivism', and its continuing relevance in the contemporary world. In Proust, the movement of textualization radically unsettles the 'official' aesthetic programme of *A la recherche du temps perdu*, while in Barthes the move from a firmly anti-expressivist discourse to a more personalized writing manner unexpectedly allows a version of expressivism to gain a foothold in the postmodern context.

This is a new and completely revised edition of the original manual for Emotional Freedom Techniques (EFT), one of the most successful psychology self-help techniques ever developed. Thousands of people tell amazing stories of how it has helped them with psychological problems like anxiety, depression, phobias, and PTSD, as well as physical problems like pain and stress. Author Dawson Church is the best-known researcher in the field, and this manual is based on Clinical EFT, the only version of EFT to be validated in dozens of scientific studies. Step by step,

you will learn the "evidence-based" form of EFT used in those studies. You'll discover how you can identify the hidden roots of emotional problems, and how to alleviate them using EFTs "Basic Recipe" as well as advanced techniques. This book shows you how to use Clinical EFT fo a variety of common conditions, including pain, fears, addictions and cravings, weight issues, insomnia, and guilt. With the healing keys of EFT, you'll be surprised at how many problems that hold you back can be quickly and easily relieved, opening up new possibilities for your life.
