American Sniper

The introduction of the scutum in the 4th century BC revolutionized the way the Romans fought. Instead of being purely defensive, the shield became a weapon in its own right. Using the top edge or boss to punch an opponent, or the lower rim to smash down on their feet, it served to unbalance an enemy and allow the sword to do its work. The versatility of the scutum was characterized by the testudo, a formation the Romans used offensively like a pedestrian tank. Meanwhile, other shield types equipped the auxiliaries who fought alongside the legionaries. The curved, rectangular scutum survived into the 3rd century AD, only to be replaced by an oval, slightly domed shield derived from the oval shields of Early Imperial auxiliaries. Drawing together historical accounts, excavated artefacts and the results of the latest scientific analyses of the boards and fittings, renowned authority M.C. Bishop reveals the development, technology, training and use of the scutum and other Roman shield types.

Manual of Classical Literature

The new Firearms Guide 1th Edition Flash Drive & Online combo is: 1. A Reference Guide that presents over 77,000 antique and modern firearms, air guns and ammunition from 1,300 manufacturers worldwide (55 countries) - Presents guns with tech specs -60,000 hi-res pictures - features - ballistics - prices - Computer searchable with 14 different search criteria: caliber, year, price, action, country, stock, etc 2. A Gun Value Guide that presents antique and modern guns with gun values online based off of the 100% - 30% condition ratings - Now you can quickly and precisely estimate value of each gun in your collection 3. A Gun Manuals,

Schematics & Blueprints Library with over 15,000 printable gun manuals, schematics and blueprints online for all types of antique and modern guns, 8,000 on a Flash Drive - ideal for gunsmiths - Print out original blueprints for AK-47, 1911, AR-15, Luger, M1 Garand, M14, MP44, STG44, P38, etc. Print out Armorers Manuals for SIG, H&K, Glock, FN, IWI, Blaser, RSAF, Webley, Vickers, etc. 4. Target Library & US-EU Caliber Chart - it presents 650 printable targets (zombies, animals, silhouettes, crosshairs, etc) and convenient caliber two-way conversion chart for American and European calibers 5. Better than Google - With 14 search criteria you can perform simple or complex searches that you cannot do with Google and get precise search result. For example, if you type in Google "polymer frame pistol in 9mm" your search result is 482,000 web pages. The same search in Firearms Guide will bring up 400 relevant pistols.

Simulating War

The Art and Making of Star Wars

Bulletin

Over the past fifty years, many thousands of conflict simulations have been published that bring the dynamics of past and possible future wars to life. In this book, Philip Sabin explores the theory and practice of conflict simulation as a topic in its own right, based on his thirty years of experience in designing wargames and using them in teaching. *Simulating War* sets conflict simulation in its proper context alongside more familiar techniques such as game theory and operational analysis. It explains in detail the analytical and modelling techniques involved, and it teaches you how to design your own simulations of conflicts of your choice. The book provides eight simple illustrative simulations of specific historical conflicts, complete with rules, maps and counters. *Simulating War* is essential reading for all recreational or professional simulation gamers, and for anyone who is interested in modelling war, from teachers and students to military officers.

Manual for Latin Book One-

1990: Includes U.S. and Canadian titles as well as foreign language titles with information on price, frequency, and publisher name/address.

Motorcycle Owner's Manual

A guide to the video game documents its making and the technology involved and describes its plot, locations, and characters, in a volume that includes ten character cards.

Proceedings of the High School Conference

Adopted from the Celts in the 1st century BC, the spatha, a lethal and formidable chopping blade, became the primary sword of the Roman soldier in the Later

Empire. Over the following centuries, the blade, its scabbard, and its system of carriage underwent a series of developments, until by the 3rd century AD it was the universal sidearm of both infantry and cavalry. Thanks to its long reach, the spatha was the ideal cavalry weapon, replacing the long gladius hispaniensis in the later Republican period. As the manner in which Roman infantrymen fought evolved, styles of hand-to-hand combat changed so much that the gladius was superseded by the longer spatha during the 2nd century AD. Like the gladius, the spatha was technologically advanced, with a carefully controlled use of steel. Easy maintenance was key to its success and the spatha was designed to be easily repaired in the field where access to a forge may have been limited. It remained the main Roman sword into the Late Roman period and its influence survived into the Dark Ages with Byzantine, Carolingian and Viking blades. Drawing together historical accounts, excavated artefacts and the results of the latest scientific analyses of the blades, renowned authority M.C. Bishop reveals the full history of the development, technology, training and use of the spatha: the sword that defended an empire.

Bulletin No. 1-19

Each Haynes manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine, in this case the Suzuki DL650 V-Strom & SFV650 Gladius, model years 2004 through 2013. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. A typical Haynes manual covers: general information; troubleshooting; lubrication and routine maintenance; engine top end; engine lower end; primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams. An index makes the manual easy to navigate.

Proceedings of the High School Conference of November 1910-November 1931

The #1 New York Times bestselling memoir of U.S. Navy Seal Chris Kyle, and the source for Clint Eastwood's blockbuster movie which was nominated for six academy awards, including best picture. From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him "The Legend"; meanwhile, the enemy feared him so much they named him al-Shaitan ("the devil") and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle's masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.

Celtic Religion in Roman Britain

A Manual of Roman Antiquities

One of the most feared weapons in the ancient world, the gladius was lethal both on the battlefield and in the arena. Literary sources tell of the terror it inspired, while archaeological evidence of wounds inflicted is testament to its deadly effect. By pulling together strands of literary, sculptural and archaeological evidence renowned expert M.C. Bishop creates a narrative of the gladius' development, exploring the way in which the shape of the short sword changed as soldiers and gladiators evolved their fighting style. Drawing together historical accounts, excavated artefacts and the results of the latest scientific analyses of the blades, this volume reveals the development, technology, training and use of the gladius hispaniensis: the sword that conquered the Mediterranean.

Prehistoric Antiquities of the Aryan Peoples

Bulletin

Described here are the origin and general trends in the development of fishing from the earliest times up to the present in various parts of the world. The techniques applied and the economic and social problems involved are covered. Fishing methods have not changed much since the Stone Age, but continuous technical improvements like the construction of sea-worthy ships, more efficient gear, and finally mechanization of fishing have led to enormous development and a high fish production, of now 100 million tons per year. Extensive utilization has caused heavy overexploitation of the resources and consequently growing concern. The book concludes with an evaluation of perspectives for the future utilization of living resources.

The Serials Directory

An insider's guide: how to join the Roman legions, wield a gladius, storm cities, and conquer the world Your emperor needs you for the Roman army! The year is AD 100 and Rome stands supreme and unconquerable from the desert sands of Mesopotamia to the misty highlands of Caledonia. Yet the might of Rome rests completely on the armored shoulders of the legionaries who hold back the barbarian hordes and push forward the frontiers of empire. This carefully researched yet entertainingly nonacademic book tells you how to join the Roman legions, the best places to serve, and how to keep your armor from getting rusty. Learn to march under the eagles of Rome, from training, campaigns, and battle to

the glory of a Roman Triumph and retirement with a pension plan. Every aspect of army life is discussed, from drill to diet, with handy tips on topics such as how to select the best boots or how to avoid being skewered by enemy spears. Combining the latest archaeological discoveries with the written records of those who actually saw the Roman legions in action, this book provides a vivid picture of what it meant to be a Roman legionary.
