This report from the Foreign Affairs Committee (HCP 142, session 2007-08, ISBN 9780215513854), examines global security in relation to Iran, and is the third such report, the other two focusing on the Middle East and Russia respectively (HCP 363, session 2006-07 (Middle East), ISBN 9780215035844 and HCP 51, session 2007-08 (Russia), ISBN 9780215037411). An earlier report on the UK's relationship with Iran was published in 2004 (HCP 80, session 2003-04, ISBN 9780215016119), and this report further explores issues, in particular the challenge posed by the Iranian nuclear programme. The Committee has set out the issues it will consider in this report, including: the extent of the progress Iran has made on nuclear development; the relationship between Iran's domestic political and human rights situation, and its nuclear ambitions; the relationship between Iran's regional and international security situation and its nuclear ambitions; the regional and global implications of Iran's nuclear programme; the history of international engagement with Iran over nuclear non-proliferation; the options open to the international community in addressing the possibility of Iran obtaining nuclear weapons. The Committee,

sets out 16 conclusions and recommendations, including: that the Committee views the potential to develop a nuclear programme as still remaining strong, despite Iran's suspension of an active nuclear weapons programme; the Committee welcomes the supply of enriched uranium by Russia, but that the international community 's diplomatic approach is a long way from achieving all its goals; the Committee condemns unreservedly President Ahmadinejad's call for the destruction of Israel and his hosting of a Holocaust denial conference; that Iranian support for Iraqi insurgents has been responsible for the death of coalition troops and is completely unacceptable and reprehensible and that the Government needs to set out its' analysis of the levels of training, weaponry and finance provided by elements of the Iranian regime.

Each chapter examines how drug trafficking affects a certain security issue, such as rogue nations, weak and failing states, protracted intrastate conflicts, terrorism, transnational crime, public health, and cyber security. This book provides an understanding of how an array of threats to international security are exacerbated by drug trafficking.

The New International Security Review

Online Library Global Security Engagement A New Model For Cooperative Threat Reduction

Worldwide political changes have presented a unique opportunity for forging a new basis of international security relations. The end of the cold war, the dissolution of the Soviet Union, and the ascending role of the United Nations in regional security affairs have transformed the driving issues of international security. These changes both heighten the demand and offer the potential for global cooperation on an unprecedented scale. Traditional security preoccupations and the foundations of past strategy—based on preparation for massive military confrontation—are no longer appropriate. Now world leaders must find alternative strategies to ensure international safety. This book brings together a prominent group of experts, including several recently appointed government officials, to examine an alternative form of security, one that emphasizes collaborative rather than confrontational relationships among national military establishment. Global Engagement offers a complete analysis of the concept of cooperative security, which seeks to establish international agreements to regulate the size, technical composition, investment patterns, and operational practices of all military forces for mutual benefit. It explains how cooperative security also aims to create mechanisms to prevent the proliferation of weapons of mass destruction and regional conflict. The contributors identify the trends motivating the movement toward cooperative security and analyze the implications for practical policy action. They examine the problem of controlling advanced conventional munitions, analyze an integrated control arraignment, discuss international principles of equity

Online Library Global Security Engagement A New Model For Cooperative Threat Reduction

and their relationship to problems of security, and offer regional political perspectives while considering social regional security problems. With the altered security environment, cooperation has clearly become the new strategic imperative. Policymakers are challenged to dispose of large arsenals of conventional and nuclear weapons and redirect their efforts to support preventative management of security conditions. Leading the discussion of the security challenges ahead, the authors of this volume debate the utility of cooperative engagement for future strategy.

Political Trust and the Politics of Security Engagement

From cooperation to a new cold war: is this the future for today's two great powers? U.S. policy toward China is at an inflection point. For more than a generation, since the 1970s, a near-consensus view in the United States supported engagement with China, with the aim of integrating China into the U.S.-led international order. By the latter part of the 2010s, that consensus had collapsed as a much more powerful and increasingly assertive China was seen as a strategic rival to the United States. How the two countries tackle issues affecting the most important bilateral relationship in the world will significantly shape overall international relations for years to come. In this timely book, leading scholars of U.S.-China relations and China's foreign policy address recent changes in American assessments of China's capabilities and intentions and consider

Online Library Global Security Engagement A New Model For Cooperative Threat Reduction

potential risks to international security, the significance of a shifting international distribution of power, problems of misperception, and the risk of conflicts. China's military modernization, its advancing technology, and its Belt and Road Initiative, as well as regional concerns, such as the South China Sea disputes, relations with Japan, and tensions on the Korean Peninsula, receive special focus.

The Future of NATO

This edited collection explores the fruitfulness of applying an interpretive approach to the study of global security. The interpretive approach concentrates on unpacking the meanings and beliefs of various policy actors, and, crucially, explains those beliefs by locating them in historical traditions and as responses to dilemmas. Interpretivists thereby seek to highlight the contingency, diversity, and contestability of the narratives, expertise, and beliefs that inform political action. The interpretive approach is widespread in the study of governance and public policy, but arguably it has not yet had much impact on security studies. The book therefore deploys the interpretive approach to explore contemporary issues in international security, combining theoretical engagement with good empirical coverage through a novel set of case studies. Bringing together a fresh mix of world renowned and up-and-coming scholars from across the fields of security studies, political theory and international relations, the chapters explore the beliefs, traditions, and dilemmas that

Online Library Global Security Engagement A New Model For Cooperative Threat Reduction

have informed security practice on the one hand, and the academic study of security on the other, as well as the connections between them. All contributors look to situate their work against a broader historical background and long-standing traditions, allowing them to take a critical yet historically informed approach to the material.

A Decade of Human Security

From the earliest human records, warfare has been both an organizing focus and a prime source of political motivation. Countless battles have been fought in the course of colonizing the planet, and the experience has created a legacy of military confrontation that many people consider immutable. Since preparations for war and the occasional conduct of it have been central preoccupations for virtually all the major states throughout time, it is widely assumed that the pattern is rooted in human nature and will endure indefinitely. But contemporary civilization is undergoing a monumental transformation affecting its most basic features. The combined effects of information technology, population dynamics, and the globalization of economic activity are altering some of the critical operating conditions of human societies and appear to be inducing a new pattern of interaction. Correspondingly, fundamental changes in the practice of war-or what is now more politely called international security-can be expected to follow. Principles of Global Security anticipates the major implications of this massive transformation for

Online Library Global Security Engagement A New Model For Cooperative Threat Reduction

security policy. John D. Steinbruner, one of the nation's leading specialists on defense issues, identifies formative problems and organizing principles relating to the predictable issues of security. He examines in sequence how the configuration of nuclear and conventional forces might be affected, how the problems of communal violence and dangers of technical proliferation might be managed, and how security relationships among the major states might be altered. One of the fundamental implications of globalization in a post-cold war environment is a shift in security policy from deterrence to reassurance, from active confrontation to cooperative engagement. Without an opponent to justify preparation for large-scale traditional missions, nations must establish safer and less volatile patterns of deployment. Maintaining global security in the twenty-first century calls for a reconfiguration of basic relationships among historical opponents, as well as revisions in military practices. This visionary work will stimulate productive thinking among policymakers seeking to reshape the legacies of the cold war with a new conceptualization of international security.

Global security

Today, even as America asserts itself globally, it lacks a grand strategy to replace "containment of communism." In this short, sharp book, Gary Hart outlines a new grand strategy, one directing America's powers to the achievement of its large purposes. Central to this strategy is the power of American ideals, what Hart calls "the fourth power."

Online Library Global Security Engagement A New Model For Cooperative Threat Reduction

Constitutional liberties, representative government, press freedom--these and other democratic principles, attractive to peoples worldwide, constitute a resource that may prove as important to national security and the national interest in this dangerous new century as traditional military, economic and political might. A bracing vision of an America responsive to a full spectrum of global challenges, The Fourth Power calls for a deeper understanding both of the threats we face and the profound strengths at our disposal to fight them.

Global Security, Safety, and Sustainability

The world's fastest growing continent demographically, Africa displays nearly all the features of today's global security challenges: armed conflict, terrorism, irregular migration, organized crime, great power competition, public discontent, and economic turbulence. John Siko and Jonah Victor have developed and taught leading courses on African security problems at two of the world's leading schools of international affairs. They now present their unique lessons and pedagogical approach from the classroom in a concise guidebook that leads students through the most important issues, dynamics, challenges, and considerations for analysing and planning responses to security developments in Africa. This book provides issue-by-issue primers on the causes and consequences of Africa's security challenges that include: -how to anticipate security problems across current political

and economic events -how to analyse African security institutions and military capabilities -how to understand historical trends across the African continent and appreciate unique variations among countries. -how to identify key drivers of future trends -how to connect security analysis to policy planning Learning is supported through the following features:

- Thematic chapters which are optimized to help the reader quickly connect to the key concepts and analytic frameworks within the field.
- The most relevant historical case studies, enabling students to engage in sophisticated analysis and discussion.
- Connections and contrasts between the situations in North Africa and sub-Saharan Africa, which are traditionally studied separately.
- Special sections on understanding race and ethnicity, and advice on traveling in Africa.
- Chapter-end checklists of key questions to enable practical engagement with the topics covered.

Changing Threats to Global Security

The Cooperative Threat Reduction (CTR) Program was created in 1991 as a set of support activities assisting the Former Soviet Union states in securing and eliminating strategic nuclear weapons and the materials used to create them. The Program evolved as needs and opportunities changed: Efforts to address biological and chemical threats were added, as was a program aimed at preventing cross-border smuggling of weapons of mass destruction. CTR has traveled through uncharted territory since its inception, and both the United States and its partners

Online Library Global Security Engagement A New Model For Cooperative Threat Reduction

have taken bold steps resulting in progress unimagined in initial years. Over the years, much of the debate about CTR on Capitol Hill has concerned the effective use of funds, when the partners would take full responsibility for the efforts, and how progress, impact, and effectiveness should be measured. Directed by Congress, the Secretary of Defense completed a report describing DoD's metrics for the CTR Program (here called the DoD Metrics Report) in September 2010 and, as required in the same law, contracted with the National Academy of Sciences to review the metrics DoD developed and identify possible additional or alternative metrics, if necessary. Improving Metrics for the DoD Cooperative Threat Reduction Program provides that review and advice. Improving Metrics for the DoD Cooperative Threat Reduction Program identifies shortcomings in the DoD Metrics Report and provides recommendations to enhance DoD's development and use of metrics for the CTR Program. The committee wrote this report with two main audiences in mind: Those who are mostly concerned with the overall assessment and advice, and those readers directly involved in the CTR Program, who need the details of the DoD report assessment and of how to implement the approach that the committee recommends.

Global Security in the Twenty-first Century

The annual International Conference on Global Security, Safety and Sustainability (ICGS3) is an established platform in which security, safety and

sustainability issues can be examined from several global perspectives through dialogue between academics, students, government representatives, chief executives, security professionals, and research scientists from the United Kingdom and from around the globe. The three-day conference focused on the challenges of complexity, rapid pace of change and risk/opportunity issues associated with modern products, systems, special events and infrastructures. The importance of adopting systematic and systemic approaches to the assurance of these systems was emphasized within a special stream focused on strategic frameworks, architectures and human factors. The conference provided an opportunity for systems scientists, assurance researchers, owners, operators and maintainers of large, complex and advanced systems and infrastructures to update their knowledge on the state of best practice in these challenging domains while networking with the leading researchers and solution providers. ICGS3 2010 received paper submissions from more than 17 different countries in all continents. Only 31 papers were selected and were presented as full papers. The program also included a number of keynote lectures by leading researchers, security professionals and government representatives.

Ethics and Global Security

In 2007/8 world food prices spiked and global economic crisis set in, leaving hundreds of millions of people unable to access adequate food. The international reaction was swift. In a bid for

Online Library Global Security Engagement A New Model For Cooperative Threat Reduction

leadership, the 123 member countries of the United Nations' Committee on World Food Security (CFS) adopted a series of reforms with the aim of becoming the foremost international, inclusive and intergovernmental platform for food security. Central to the reform was the inclusion of participants (including civil society and the private sector) across all activities of the Committee. Drawing on data collected from policy documents, interviews and participant observation, this book examines the re-organization and functioning of a UN Committee that is coming to be known as a best practice in global governance. Framed by key challenges that plague global governance, the impact and implication of increased civil society engagement are examined by tracing policy negotiations within the CFS, in particular, policy roundtables on smallholder sensitive investment and food price volatility and negotiations on the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security, and the Global Strategic Framework for Food Security and Nutrition. The author shows that through their participation in the Committee, civil society actors are influencing policy outcomes. Yet analysis also reveals that the CFS is being undermined by other actors seeking to gain and maintain influence at the global level. By way of this analysis, this book provides empirically-informed insights into increased participation in global governance processes.

Interpreting Global Security

Online Library Global Security Engagement A New Model For Cooperative Threat Reduction

The National Academies of Sciences, Engineering, and Medicine was asked to articulate a 5-year strategic vision for international health security programs and provide findings and recommendations on how to optimize the impact of the Department of Defense (DOD) Biological Threat Reduction Program (BTRP) in fulfilling its biosafety and biosecurity mission.

Because BTRP is just one of several U.S. government programs conducting international health security engagement, both the strategic vision and the success of the program rely on coordinating actions with the U.S. government as a whole and with its international partners. This report provides several recommendations for optimizing BTRP success in its current mission and the wider-looking strategic vision it proposes.

Why do politicians think that war is the answer to terror when military intervention in Iraq, Afghanistan, Pakistan, Syria, Mali, Somalia and elsewhere has

made things worse? Why do some conflicts never end? And how is it that practices like beheadings, extra-judicial killings, the bombing of hospitals and schools and sexual slavery are becoming increasingly common? In this book, renowned scholar of war and human security Mary Kaldor introduces the concept of global security cultures in order to explain why we get stuck in particular pathways to security. A global security culture, she explains, involves different combinations of ideas, narratives, rules, people, tools, practices and infrastructure embedded in a specific form of political authority, a set of power relations, that come together to address or engage in large-scale violence. In contrast to the Cold War period, when there was one dominant culture based on military forces and nation-states, nowadays there are competing global security cultures. Defining four main types - geo-politics, new wars, the liberal peace, and the war on terror she investigates how we might identify contradictions, dilemmas and experiments in contemporary security cultures that might ultimately open up new pathways to rescue and safeguard civility in the future.

Biological engagement programs are a set of projects or activities between partner countries that strengthen global health security to achieve mutually beneficial outcomes. Engagement programs are an effective way to work collaboratively towards a common threat reduction goal, usually with a strong focus on strengthening health systems and making the world a safer place. Cooperative programs are built upon trust and sharing of information and resources to increase the capacity and capabilities of partner countries. Biological engagement programs reduce the threat of infectious disease with a focus on pathogens of security concern, such as those pathogens identified by the U.S. Government as Biological Select Agent and Toxins. These programs

Online Library Global Security Engagement A New Model For Cooperative Threat Reduction

seek to develop technical or scientific relationships between countries to combat infectious diseases both in humans and animals. Through laboratory biorisk management, diagnostics, pathogen detection, biosurveillance and countermeasure development for infectious diseases, deep relationships are fostered between countries. Biological engagement programs are designed to address dual-use issues in pathogen research by promoting responsible science methodologies and cultures. Scientific collaboration is a core mechanism for engagement programs are designed to strengthen global health security, including prevention of avoidable epidemics; detection of threats as early as possible; and rapid and effective outbreak response. This Research Topic discusses Biological Engagement Programs, highlighting the successes and challenges of these cooperative programs. Articles in this topic outlined established engagement programs as well as described what has been learned from historical cooperative engagement programs not focused on infectious diseases. Articles in this topic highlighted selected research, trainings, and programs in Biological Engagement Programs from around the world. This Topic eBook first delves into Policies and Lessons Learned; then describes Initiatives in Biosafety & Biosecurity; the core of this work documents Cooperative Research Results from the field; then lastly the Topic lays out potential Future Directions to the continued success of the World's cooperative science in reducing the threat of infectious diseases.

New Directions in Africa-China Studies

Assessing China's rapidly changing role on the international stage China is again undergoing a period of significant transition. Internally, China's leaders are addressing challenges to the economy and other domestic issues after three decades of dramatic growth and reforms. President Xi Jinping and other leaders also are refashioning foreign policy to better fit what they see as China's place in the world. This has included a more proactive approach to trade and related international economic affairs, a more vigorous approach to security matters, and a more focused engagement on international cultural and educational affairs. In this volume, China specialists from around the world explore key issues raised by a changing China's interaction with a changing world. They chronicle China's emergence as a more capable actor whose engagement is reshaping international affairs in many dimensions. These include: global currency and trading systems; patterns of cooperation and competition in technological innovation; economic and political trends in the developing world; the American-led security order in the Asia-Pacific region; the practice of international military and humanitarian intervention; the use of naval power; the role of international law in persistent territorial and maritime disputes in the East and South China Seas; the international human rights regime; the circulation of Chinese talent trained abroad; a more globalized film industry; and programs to reshape global cultural awareness about China through educational initiatives. Across these diverse areas,

China's capacity—and desire—to influence events and outcomes have risen markedly. The results so far are mixed, and the future trajectory remains uncertain. But across the wide range of issues addressed in this book, China has become a major and likely an enduring participant.

The Handbook of Global Security Policy

Essential reading for cybersecurity professionals, security analysts, policy experts, decision-makers, activists, and law enforcement! During the Arab Spring movements, the world witnessed the power of social media to dramatically shape events. Now this timely book shows government decision-makers, security analysts, and activists how to use the social world to improve security locally, nationally, and globally--and cost-effectively. Authored by two technology/behavior/security professionals, *Using Social Media for Global Security* offers pages of instruction and detail on cutting-edge social media technologies, analyzing social media data, and building crowdsourcing platforms. The book teaches how to collect social media data and analyze it to map the social networks of terrorists and sex traffickers, and forecast attacks and famines. You will learn how to coalesce communities through social media to help catch murderers, coordinate disaster relief, and collect intelligence about drug smuggling from hard-to-reach areas. Also highlighting dramatic case studies drawn from the headlines, this crucial book is a must-read. Illustrates linguistic, correlative, and network analysis of OSINT Examines using

Global Engagement

The EU and China are often characterised as parties whose bilateral political differences still remain too large to bridge, so that they have failed to convert rhetorical promises into tangible results of cooperation, particularly with regards to the field of international security. Yet in terms of their bilateral interaction on security risk management in Africa; EU and Chinese naval officers jointly brought down the number of successful Somali pirate attacks in the Gulf of Aden and to a lesser extent were jointly involved in seeking a resolution to the lingering conflict in Darfur. This book asks how we can make sense as a whole of this relatively sudden shift in regards to the dealings between their respective officials on the topic of security risk management. It argues that the outcomes of Sino-European bilateral dealings on this topic are above all determined by the ability/inability of these officials to build political trust as a complex and cognitive social phenomenon. Consequently, the book applies an innovative conceptual framework on political trust to explain why EU and Chinese officials

Online Library Global Security Engagement A New Model For Cooperative Threat Reduction

bridged their 'endemic' political differences to practically cooperate on Somali piracy but were unable to do so when it came to their interaction on Darfur. To conclude, it examines the longer term impact of this bilateral trust-building process by covering more recent examples of bilateral engagement in Libya and Mali and aims to show that although this trust-building process may be case specific, ramifications may go beyond the realm of their bilateral dealings on security matters in Africa, to impact wider issues of international security. This text will be of key interest to scholars and students of African and Chinese politics, EU politics, security and maritime studies, and more broadly of international relations and to governmental actors.

A Strategic Vision for Biological Threat Reduction

NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT- OVERSTOCK SALE -- Significantly reduced list price The U.S. Government has recently issued seven major studies that together put forth a comprehensive blueprint for major global changes in U.S. national security strategy, defense plans, and diplomacy. These seven studies are brought together in this illuminating book, which portrays their individual contents and complex interrelationships and evaluates their strengths and shortfalls. It argues that while these studies are well-written, cogently argued, and articulate many valuable innovations for the Department of Defense, Department of State, and other government agencies, all of them leave lingering, controversial issues that require further thinking and analysis as future U.S. national security policy evolves in a changing and dangerous world. For all readers, this book offers a quick, readable way to grasp and critique the many changes now sweeping over the new U.S. approach to global security affairs."

The Evolution of International Security Studies

Principles of Global Security

Featuring a diverse and impressive array of authors, this volume is the most comprehensive textbook available for all interested in international organization and global governance. Organized around a concern with how the world is and could be governed, the book offers: in-depth and accessible coverage of the history and theories of international organization and global governance; discussions of the full range of state, intergovernmental, and nonstate actors; and examinations of key issues in all aspects of contemporary global governance. The book's 50 chapters are arranged into 7 parts and woven together by a comprehensive introduction to the field, separate section introductions designed to guide students and faculty, and helpful pointers to further reading. International Organization and Global Governance is a self-contained resource enabling readers to better comprehend the role of myriad actors in the governance of global life as well as to assemble the many pieces of the contemporary global governance puzzle.

partnerships, such as helping to support and train foreign militaries, and about the US military's role in missions other than war, ranging from diplomacy, to development, to humanitarian assistance after disasters or during epidemics. Reveron is a proponent of these non-warfighting missions because he views them as an economical way to promote human security and regional security in trouble spots, which he says is in the US national interest. He also sees these efforts as making it less likely that the US will feel compelled to intervene directly in hot spots around the globe if our partners can maintain their own security or if humanitarian disasters can be averted. This second edition will take into account the Obama administration's foreign policy, the poor legacy of training the Iraqi army, the implications of more assertive foreign policies by Russia and China, and the US military's role in recent humanitarian crises such as the Ebola epidemic in West Africa.

The U.S. government has made safeguarding of weapons-grade plutonium and highly enriched uranium an international policy priority, and convened The 2010 Nuclear Security Summit in Washington, D.C., on April 12 and 13, 2010. During the Summit, India announced its commitment to establish a Global Centre for Nuclear Energy Partnership. The Centre is to be open to international participation through academic

India-United States Cooperation on Global Security is the summary of a workshop held by the U.S. National Academy of Sciences (NAS) together with its partner of more than 15 years, the National Institute for Advanced Studies (NIAS) in Bangalore, India. The workshop identified and examined potential areas for substantive scientific and technical cooperation between the two countries on issues related to nuclear material security. Technical experts from India and the United States focused on topics of nuclear material security and promising opportunities for India and the United States to learn from each other and cooperate. This report discusses nuclear materials management issues such as nuclear materials accounting, cyber security, physical security, and nuclear forensics.

Energy and Water Development Appropriations for 2009

The United States faces an increasingly turbulent world. The risk of violent conflict and other threats to international order presents a vexing dilemma: should the United States remain the principal guarantor of global peace and security with all its considerable commitments and potential pitfalls--not least new and costly military entanglements--that over time diminish its capacity and commitment to play this vital role or, alternatively, should it pull back from the world in the interests of conserving U.S. power, but at the possible cost of even greater threats emerging in the future? Paul B. Stares proposes an innovative and timely strategy—"preventive engagement"—to resolve America's predicament. This approach entails pursuing three complementary courses of action: promoting policies known to lessen the risk of violent conflict over the long term; anticipating and averting those crises likely to lead to costly military commitments in the medium term; and managing ongoing conflicts in the short term before they escalate further and exert pressure on the United States to intervene. In each of these efforts, forging "preventive partnerships" with a variety of

international actors, including the United Nations, regional organizations, nongovernmental organizations, and the business community, is essential. The need to think and act ahead that lies at the heart of a preventive engagement strategy requires the United States to become less shortsighted and reactive. Drawing on successful strategies in other areas, Preventive Engagement provides a detailed and comprehensive blueprint for the United States to shape the future and reduce the potential dangers ahead.

Using Social Media for Global Security

The government's first Cooperative Threat Reduction (CTR) programs were created in 1991 to eliminate the former Soviet Union's nuclear, chemical, and other weapons and prevent their proliferation. The programs have accomplished a great deal: deactivating thousands of nuclear warheads, neutralizing chemical weapons, converting weapons facilities for peaceful use, and redirecting the work of former weapons scientists and engineers, among other efforts. Originally designed to deal with immediate post-Cold War challenges, the programs must be expanded to other regions and fundamentally redesigned as an active tool of foreign policy that can address contemporary threats from groups that are that are agile, networked, and adaptable. As requested by Congress, Global Security Engagement proposes how this goal can best be achieved. To meet the magnitude of new security challenges, particularly at the nexus of weapons of

mass destruction and terrorism, Global Security Engagement recommends a new, more flexible, and responsive model that will draw on a broader range of partners than current programs have. The White House, working across the Executive Branch and with Congress, must lead this effort.

Biological Engagement Programs: Reducing Threats and Strengthening Global Health Security Through Scientific Collaboration

This book will be the first systematic examination of the role that ethics plays in international security in both theory and practice, and offers the reader a concrete ethics for global security. Questions of morality and ethics have long been central to global security, from the death camps, world wars and H-bombs of the 20th century, to the humanitarian missions, tsunamis, terrorism and refugees of the 21st. This book goes beyond the Just War tradition to demonstrate how ethical commitments influence security theory, policy and international law, across a range of pressing global challenges. The book highlights how, from patrolling a territorial border to maintaining armed forces, security practices have important ethical implications, by excluding some from consideration, presenting others as potential threats and exposing them to harm, and licensing particular actions. While many scholars and practitioners of security claim little interest in ethics, ethics clearly has an interest in them. This innovative book extends the traditional agenda of war and peace

to consider the ethics of force short of war such as sanctions, deterrence, terrorism, targeted killing, and torture, and the ethical implications of new security concerns such as identity, gender, humanitarianism, the responsibility to protect, and the global ecology. It advances a concrete ethics for an era of global threats, and makes a case for a cosmopolitan approach to the theory and practice of security that could inspire a more just, stable and inclusive global order. This book fills an important gap in the literature and will be of much interest to students of ethics, security studies and international relations.

Improving Metrics for the Department of Defense Cooperative Threat Reduction Program

National Security Strategy of the United States (2010)

Human security has been advanced as an alternative to traditional state-based conceptualizations of security, yet controversies about the use and abuse of the concept remain. Investigating innovations in the advancement of the human security agenda over the past decade, this book identifies themes and processes around which consensus for future policy action might be built. It considers the ongoing debates regarding the human security agenda, explores prospects and projects for the advancement of human security, addresses issues of human security as emerging forms of new multilateralisms
