This collection of articles brings together new research from both established and emerging international experts in the study of English grammar, all of whom have engaged with the notion of 'construction' in their work. The research here is concerned with both synchrony and diachrony, with the relationship between Construction Grammar and other linguistic theories, and with a number of issues in the study of grammar, such as raising and control phenomena, transitivity, relative clause structure, the syntax of gerunds, attributive and predicative uses of adjectives, modality, and grammaticalization. Some of the articles are written within a constructional framework, while others highlight potential problems with constructional approaches to English grammar; some of the articles are based on data collected from corpora, some on introspection; some of the articles suggest potential developments for diachronic construction grammar, while others seek to compare Construction Grammar with other cognitive linguistic theories, most particularly Word Grammar. The research reported in this volume presents a series of ways of looking at the relationship between constructions and patterns in English grammar, either now or in the past. The book addresses scholars and advanced students who are interested in English grammar, constructional approaches to language, and the relationship between functional and formal issues in linguistic description and theory.

'New Interchange' is a complete revision of Interchange, one of the world's most popular and successful English courses. 'New Interchange' is a multi-level course for adults and young adult learners of English from beginning to high-intermediate level. Level Two builds on the foundations for accurate and fluent communication established in Level One, extending grammatical, lexical, and functional skills. 'New Interchange' teaches students to use English for everyday situations and purposes related to school, work, social life, and leisure. The underlying philosophy is that language learning is more rewarding, meaningful, and effective when used for authentic communication.

How can teachers make sure that all students gain the reading skills they need to be successful in school and in life? In this book, Karen Tankersley describes the six foundational "threads" that students need to study in order to become effective readers: phonemic awareness, phonics and decoding, vocabulary, fluency, comprehension, and higher-order processing. For each area, the author explains how students

acquire the reading skills they need and offers a series of skill-building strategies and activities that teachers can use in the classroom. Although reading is perhaps most intensely taught in the kindergarten and 1st-grade classrooms, Tankersley emphasizes that helping students become lifelong readers is a task for all teachers, including content-area teachers in middle and high schools. The Threads of Reading addresses key questions about literacy, such as * What makes a difference in reading achievement? * How much reading time is enough? * How can teachers use writing to build reading skills? * How can teachers help students make meaning from their reading? The strategies in this book address many situations, from individual instruction to small- or large-group instruction, from kindergarten to high school. Teachers will appreciate the multitude of activities provided, and administrators will learn to better evaluate the reading programs in place in their districts and schools. Grounded in both research and "teacher lore" from actual classrooms, this book is a solid guide to helping students become lifelong readers.
